Bidding
Bidders who cannot attend the sale may leave written bids (see Bid Form). Bids called in by phone must be confirmed in writing. E-mail bids may be sent up to one hour before each session. Bidders may apply for a phone link to the auction and bid through our staff. Applicants must call at least 24 hours prior to the sale. Phone links are subject to application.

Viewing
Subject to availability, many lots can be sent to established clients (or those who submit references) for examination. Requests must be made no later than 5 days prior to the auction. Lots must be returned on the day of receipt. Postage/insurance costs will be invoiced. Large lots will not be available for mail viewing.

In addition to the regular public viewing hours, prospective bidders may view lots at our galleries by appointment.

Our on-staff philatelists will be pleased to review the description of any lot and provide more detailed information.

Expert Certification
Individual items offered without a Philatelic Foundation certificate (or accepted authority's certificate) dated within the past 5 years may be purchased subject to certification (please see Conditions of Sale for details).

Shipping and Delivery
Instructions for shipping must be given to the gallery prior to or immediately after the sale. Unless special instructions are received, we will follow the shipping guidelines on the back of the Bid Form. Buyers are responsible for all prescribed shipping charges, whether or not the actual expense is equal to the invoiced charge.

Prices Realized
A list of prices realized will be included with every invoice. We accept phone and fax requests for prices realized during or after the auction. Bidders who wish to receive realizations by e-mail should provide an e-mail address on the bid form. Results are also posted to our website immediately after each session at www.siegelauctions.com.

Hotels and Restaurants
We will be pleased to furnish the names of area hotels and restaurants. During peak seasons, we may be able to assist in placing reservations.

Conditions of Sale (Important—please read carefully)

The property described in this catalogue will be offered at public auction by Robert A. Siegel Auction Galleries, Inc. ("Galleries") on behalf of various consignors and itself or affiliated companies. By bidding on any lot, whether directly or by or through an agent, in person, or by telephone, facsimile or any other means, the bidder acknowledges and agrees to all of the following Conditions of Sale.

1. The highest bidder acknowledged by the auctioneer shall be the buyer. The term "final bid" means the last bid acknowledged by the auctioneer, which is normally the highest bid offered. The purchase price payable by the buyer will be the sum of the final bid and a commission of 10% of the final bid ("buyer's premium"), together with any sales tax or use tax which may be due on the sale.

2. The auctioneer has the right to reject any bid, to advance the bidding at his discretion and, in the event of a dispute between bidders, to determine the successful bidder, to continue the bidding or to reoffer and resell the lot in dispute. The Galleries' record of the final sale shall be conclusive.

3. All bids are per numbered lot in the catalogue unless otherwise announced by the auctioneer at the time of sale. The right is reserved to group two or more lots, to withdraw any lot or lots from the sale, or to act on behalf of the seller. The Galleries will execute bidding instructions on behalf of clients, but will not be responsible for any errors in the execution of such bids.

4. Lots with numbers followed by the symbol * are offered subject to a confidential minimum final bid ("reserve"), below which the lot will not be sold. The absence of the symbol * means that the lot is offered without a reserve. In the absence of a reserve, the auctioneer has sole discretion to establish a minimum opening bid and may refuse an offer of less than half of the published estimate. Any lot that does not reach its reserve or opening bid requested by the auctioneer will be announced as "passed" and excluded from the prices realized after the sale. The Galleries may have a direct or indirect ownership interest in any or all lots in the sale resulting from an advance of monies or goods-in-trade or a guarantee of minimum net proceeds made by the Galleries to the seller.

5. Any lot, the description of which is obviously incorrect, is returnable, but only if the lot is returned within 14 days of receipt. All disputed lots must be returned intact with the original packing material. The following lots may not be returned for any reason: Lots containing ten or more items; lots from buyers who have registered for the pre-sale exhibition or received lots by post at the auctioneer's expense, thereby having had the opportunity to inspect them before the sale; any lot described with "faults" or "defects" may not be returned because of any fault or defect. No illustrated lots may be returned because of centering, margins or other factors shown in the illustrations.

6. Successful bidders, unless they have established credit with the Galleries prior to the sale, must make payment in full before the lots will be delivered. Buyers not known to the Galleries must make payment in full within three days from the date of sale. The Galleries retain the right to demand a cash deposit from anyone prior to bidder registration and/or to demand payment at the time the lot is knocked down to the highest bidder, for any reason whatsoever. In the event that any buyer refuses or fails to make payment in cash for any lot at the time it is knocked down to him, the auctioneer reserves the right to resell the lot immediately for sale to the highest bidder.

7. If the purchase price has not been paid within the time limit specified above, nor lots taken up within seven days from the date of sale, the lots will be resold by whatever means deemed appropriate by the Galleries, and any loss incurred from resale will be charged to the defaulting buyer. Any account more than thirty days in arrears will be subject to a late payment charge of 1 1/2% per month as long as the account remains in arrears. Any expenses incurred in securing payment from delinquent accounts will be charged to the defaulters. A fee of $250.00 per check will be charged for each check returned for insufficient funds.

8. All lots are sold as genuine. Any lot which is accompanied by an expert certificate (for U.S. items, the accepted authority is The Philatelic Foundation), dated within the past five years of the sale date, is sold "as is" and in accordance with the description on the certificate. Such lots may not be returned for any reason, including but not limited to a contrary certificate of opinion obtained after the sale. Buyers who wish to obtain a certificate for any item that is not accompanied by a certificate dated within the past five years may do so, provided that the following conditions are met: (1) the purchase price must be paid in full, (2) the item must be submitted to an acceptable experting committee with a properly executed application form within 21 days of the sale, (3) a copy of the application form must be given to the Galleries, (4) in the event that an adverse opinion is received, the Galleries retain the right to resubmit the item on the buyer's behalf for reconsideration, without time limit or other restrictions, (5) unless written notification to the contrary is received, items submitted for certification will be considered cleared 90 days from the date of sale, and (6) in the event any item is determined to be "not as described", the buyer will be refunded the purchase price and the certification fee up to $100.00 unless otherwise agreed.

9. Until paid for in full, all lots remain the property of the Galleries on behalf of the seller.

10. Agents executing bids on behalf of clients will be held responsible for all purchases made on behalf of clients unless otherwise arranged prior to the sale.

11. The buyer assumes all risk for delivery of purchased lots and agrees to pay for prescribed shipping costs (see back of Bid Form).

12. The bidder consents that any action or proceeding against it may be commenced and maintained in any court within the State of New York or in United States District Court for the Southern District of New York, that the courts of the State of New York and the United States District Court for the Southern District of New York shall have jurisdiction with respect to the subject matter hereof and the person of the bidder. The bidder agrees not to assert any defense to any action or proceeding initiated by Galleries based upon improper venue or inconvenient forum. The bidder agrees that any action brought by the bidder shall be commenced and maintained only in a Federal Court in the United States District Court for the Southern District of New York or the State Court in the county in which Galleries has its principal place of business in New York. These Terms and Conditions shall be governed by and construed in accordance with the substantive laws of the State of New York.

Grading Terms, Abbreviations and Values Used in Descriptions

Grade and Centering
Margin width, centering and gum are graded according to Scott Catalogue standards.

**Extremely Fine (EF):** Exceptionally large margins or near perfect centering. The term “Gem” describes condition that is the finest possible for the issue.

**Very Fine (VF):** Normal size margins for the issue and well-centered with the design a bit closer to one side.

**Fine (F):** Smaller than usual margins or noticeably off center. Pre-1890 issues may have the design touched in places.

**Very Good (VG):** Attractive appearance, but margins or perforations cut into the design.

**Good (G) or Average (Ave.):** Cut into or perfs far into design and usually with slight faults. This condition is generally acceptable for rarities, scarce multiples or stamps used on unusual covers.

Covers
Minor nicks, short edge tears, flap tears and slight reduction at one side are normal conditions for 19th century envelopes. Folded letters should be expected to have at least one file fold. Light cleaning of covers and small mends along the edges are accepted forms of conservation. Unusual covers may have a common stamp with a slight crease or tiny tear. These flaws exist in virtually all 19th century covers and are not always described. They are not grounds for return.

Catalogue Values and Estimates
Unless otherwise noted, the currently available Scott Catalogue values are quoted in dollars with a decimal point. Other catalogues are often used for foreign countries or specialized areas and are referred to by their common name: Stanley Gibbons (SG), Dietz, American Air Mail Catalogue (AAMC), Michel, Zumstein, Facit, etc. Estimates are indicated with an “E.” and reflect our conservative valuation in dollars. Reserves will never exceed the low end of the estimate range; they will sometimes exceed Scott Catalogue value for stamps in Extremely Fine condition.

Because of certain pricing inconsistencies in the Scott Catalogue—for example, blocks that have no gum, the absence of premiums for Mint N.H. items, etc.—we cannot guarantee the accuracy of values quoted for multiples, specialized items and collection lots. We generally try to be conservative, but buyers may not return a lot because of a discrepancy in catalogue value due to Scott pricing inconsistencies.

The Art of Quality

INTRODUCING THIS YEAR’S RARITIES OF THE WORLD SALE GIVES ME AN opportunity to write about the Art of Quality. Stamp quality is a hot topic now, because an organization that issues certificates recently devised a numerical grading system and offered “slabbing” (encasing a stamp in plastic) as an option.

The philatelic community’s reaction has been mixed. For my part as an auctioneer, I have learned that the market tells me what to do, not vice versa, so if collectors embrace numerical grading and slabbing as a desirable service, the standard will change, and I will either adapt to it or fail. Until the market gives me clear direction, I will keep an open mind. However, I do have some observations and opinions I would like to express.

The concept of quantifying the quality of a stamp has been tried successfully in coins and diamonds — albeit with some growing pains and persistent problems. Numismatic grading to define a coin’s state (Mint, Uncirculated, Circulated etc.) and the degree of quality (for example, MS-95) has created a more consistent basis upon which trading can take place. Personally, I would not buy a diamond without a GIA certificate that establishes the stone’s size, color and clarity. In both cases — coins and diamonds — the effort to quantify an object’s quality seems to have found a market. Not every buyer needs or cares about a certified grade, but many do, and grading services meet that demand.

My choice of title for this commentary — The Art of Quality — is quite deliberate, because I feel that a stamp encompasses so many different, often competing, elements of condition, that any attempt to apply a numerical standard will fail in competition with subjective prose. The beauty of a rose, an eagle or a Mozart concerto can never be expressed in numeric terms. Yes, there are critical standards used to measure each one’s quality, but who would ever think to call Mozart’s music a “10”. In fact, why use numbers when we have something as eloquent and descriptive as language?

Therefore, at present I do not imagine a day when a stamp collector offers to swap his “M-NH-95 Scott 293” for an “M-NH-95 Scott 245”. Nor do I imagine using these numbers to convey the beauty and quality of the stamps I sell. My goal is to find more and better words to describe what we sell, to place each stamp in the context of its issue and fellow survivors, and to reach beyond the grades Extremely Fine, Very Fine and Fine. I also believe that collectors are smart enough to recognize overgrading and irresponsible salesmanship.

The quality of a stamp is often described as the four C’s — Color, Clarity of impression, Centering and margins, and Cancellation — and, of course, there is increasing emphasis on the state of a stamp’s gum. With all of these factors to consider, how can a number truly reflect quality?

As you peruse this year’s Rarities sale, which contains hundreds of stamps of exceptionally high quality, I hope you will share my feeling that Art sometimes conveys much more than Science.

ALEXANDRIA, DISTRICT OF COLUMBIA

3 ☯ Alexandria, D.C., 5c Black on Buff, Type I (IXI). Cut to shape as always, parts of surrounding rosettes visible all around, uncancelled and neatly affixed by star in octagon wax wafer on Aug. 25, 1846, Quaker-dated folded letter to Nathan Parkins, Parkins’s Mills, Winchester Va., vivid red “Alexandria D.C. Aug. 25” circular datestamp and matching “Paid” and “5” in rectangular frame.

VERY FINE AND REMARKABLY FRESH. ONE OF SIX RECORDED EXAMPLES OF THE ALEXANDRIA POSTMASTER’S PROVISIONAL ON BUFF PAPER, OF WHICH ONLY THREE ARE ON COMPLETE COVERS — THIS IS THE ONLY TYPE I KNOWN ON A COMPLETE COVER. AN OUTSTANDING AND WORLD-RECOGNIZED PHILATELIC RARITY.

Alexandria, a major port city, was ceded to the District of Columbia in 1791. On July 6, 1846, the United States Congress voted to cede Alexandria back to Virginia. In September 1846 the issue was put up for a vote by the white male citizens of Alexandria County (insane persons and paupers excluded), and they voted 763 to 222 in favor of recession. However, it was not until March 1847 that the Virginia General Assembly enacted the recession. A noteworthy aspect of this Alexandria cover is the letter, which refers to the September vote on the question of Alexandria’s status. It reads (in part): “What do the folks in Frederick County say about retrocession? There is a good deal of talk about it here. The commissioners have appointed the first and second days of next month to take the vote...a stranger to whom she had been introduced told her he hoped she would persuade the Alexandrians to go back to Virginia. I think the country people will mostly vote against it and the town people mostly for it.” The Alexandria post office, with Daniel Bryan as postmaster, was most definitely part of the District of Columbia when the provisional stamps were used before March 1847. In the case of this August 1846 cover, we have used the proper designation, despite the Scott Catalogue listing.

Based on Philip T Wall’s census (Chronicle, Feb. 1983), updated with new information, there are six recorded examples of the Alexandria 5c on Buff paper. Of Type I (40 rosettes in border) there is: 1) a cover from only to Bartholomew Cranston, Columbia Pa., stamp uncancelled, black Jul. 10 (1847) datestamp with “Paid” and “5”, the first Alexandria discovered (in 1872-73 by John K. Tiffany), ex Pickman, Colson, Coolidge; 2) complete folded letter to Nathan Parkins, Winchester Va., red Aug. 25 (1846) datestamp with “Paid” and “5”, the cover offered here, ex Lapham, Consul Klep, Isleham, Kaplott; and 3) off-cover stamp, ms. “No. 45” and trace of red postmark, found in 1894, ex Lambert, Shryock, Worthington, Caspary, Lilly. Of Type II (39 rosettes in border) there is: 4) complete folded cover to Burr W. Harrison, Leesburg Va., red Sep. 10 (1846) datestamp with “Paid” and “5”, discovered in 1908, ex Worthington, Hind, Caspary, Lilly, Boker and now in a European collection; 5) complete folded cover with address erased, stamp has ms. “No. 70” and tied by red May 9 (1846) datestamp with “Paid” and “5”, ex Caspary; and 6) uncanceled off cover, ex Ferry, Lapham, not seen or recorded since the 1936 TIPEX exhibition in New York. These are the six recorded examples, which include one off-cover stamp not seen since 1936 and only three complete covers.

The cover offered here was discovered in 1926 by Edward S. Leadbeater of Alexandria while he was visiting relatives in Parkins’ Mills. The letters were addressed to his father of the same name. The cover was sold to Perry Fuller, a Baltimore dealer, for approximately $7,000. It was then sold to Henry G. Lapham and became part of the great Lapham collection of postmasters’ provisionals. The cover was later acquired by Consul Klep Van Velthoven of Belgium and realized $5,250 when the Klep collection was sold at auction in 1956. The Leadbeater cover next appeared at auction when our firm sold the “Texas” collection of U.S. postmasters’ provisionals in 1964, in which sale it realized $9,000. It was sold again through the Siegel firm in 1986 at the auction sale of the “Isleham” collection, where it realized $77,000, more than 2.5 times its then current catalogue value of $30,000.

Baltimore Md., 5c Black on Bluish (3X3). Position 10, showing virtually complete framelines on two sides and large part of frameline at bottom, pen cancel which is lighter than usual, tied by ms. "5", additional manuscript "due 5" marking on 1846 blue folded letter to Northampton N.Y., light strike of red "Baltimore Md. Apr. 22" circular datestamp with matching "Paid", traces of original gum around top edge of stamp reinforce the tie

VERY FINE. AN OUTSTANDING TIED EXAMPLE OF THE 5-CENT BUCHANAN BALTIMORE PROVISIONAL ON BLUISH PAPER. ONE OF PERHAPS THREE KNOWN EXAMPLES USED WITH THE RED BALTIMORE DATESTAMP.

The Baltimore provisionals were printed first on bluish and then on white paper (the Scott catalogue reverses the chronological order). Most examples are known used with the blue Baltimore datestamp; a second usage of the same date is recorded also struck in red (Hayes census No. 15). The third, dated April 3, 1846, is offered in the following lot.

Baltimore Md., 5c Black on Bluish (3X3). Position 3, full framelines at left and bottom, virtually complete at top, cancelled by four neat pen strokes with one just tying the stamp on Apr. 3, 1846 folded letter to New York, lightly struck red "Baltimore Md. Apr. 6" circular datestamp, matching "Paid" and "5" in circle, couple light file folds, one crease thru stamp.

VERY FINE APPEARANCE. A CHOICE TIED EXAMPLE OF THE 5-CENT BUCHANAN PROVISIONAL ON BLUISH PAPER — ONLY THREE RECORDED WITH RED BALTIMORE DATESTAMP.

As noted in the previous lot description, there are three Baltimore provisional cover postmarked in red, all April 1846 dates.

No. 24 in the Hayes census. With 1993 P.F. certificate.
8 ☞ **Baltimore Md., 5c Blue entire (3XU1).** Unusually clear strikes of provisional markings, matching "Baltimore Md. Jun. 23" circular datestamp on buff entire to Reading Pa.

The Brattleboro provisional's history is known from testimonials by the postmaster (1845-48), Dr. Frederick N. Palmer, and the engraver/printer, Thomas Chubbuck, also of Brattleboro. This information is presented in Luff's book, as adapted from articles appearing in philatelic journals in the late 1860s. These accounts, which were given twenty years after the events, are a bit hazy in their recollections of specific details. For example, Chubbuck recalls the plate of eight subjects and sheets of eight stamps, but there is no question that the plate comprised ten subjects. Neither one could remember exactly when the stamps were issued, but it seems likely that they were released during the summer of 1846. This approximation is supported by a folded letter dated August 27, 1846, bearing a Brattleboro stamp and the comment "I pay this just to shew you the stamp. It's against my principles, you know." (see lot 15).

The postmaster, Dr. Palmer, went to considerable expense to produce his provisional stamp. Considering that this small post office had revenues of slightly more than $1,700 in 1847, the $9 paid by Dr. Palmer for engraving and printing his stamps is a relatively large out-of-pocket expense, which was not reimbursed by the Post Office Department. It is unclear whether 500 stamps, 500 impressions of the ten-subject plate (5,000 stamps), were printed. However, the $9 divided by the estimated number of stamps actually purchased by local patrons (estimated at 400-500) gives a production cost of 2c per stamp.

The stamp itself is small and rectangular in shape. The central design element is Palmer's autograph initials "F.N.P.". At top is the post office name, at sides the letters "P.O.", and at bottom the denomination "5 Cents". It was printed in black on a thick buff paper. The soft, porous quality of this paper makes it extremely susceptible to thinning, and almost every Brattleboro copy known shows surface scuffs or thins of varying severity.

The stamps were printed from a plate of ten subjects, arranged in two horizontal rows of five. Directly below the center stamp of the bottom row is the imprint "Engd. by Thos. Chubbuck, Bratto." (see lot 11). The arrangement of the other positions has been the subject of numerous philatelic studies. The latest efforts have been made by Calvet M. Hahn and Philip T. Wall.

**Brattleboro Vt., 5c Black on Buff (5X1)**. Position 5 from the upper right corner of the sheet of ten, large margins all around, guideline at left and bottom right, trace of adjoining stamp also shows at bottom, a marvelous deep impression with every line of engraving printed in perfect clarity, tied at lower right by vivid red "Paid" straightline on small piece of cover.

**EXTREMELY FINE GEM. ONE OF THE THREE FINEST EXAMPLES OF THE BRATTLEBORO POSTMASTER'S PROVISIONAL STAMP, OF WHICH A TOTAL OF 32 ARE KNOWN OFF COVER, INCLUDING FIVE SOUND COPIES.**

Of the 32 off-cover Brattleboro stamps recorded by Philip T. Wall, five are sound. Only three of the five have four full margins (the framelines are touched on two others). These three sound four-margin stamps are as follows: 1) Position 5, tied by red "Paid" on piece, the example offered here; 2) Position I, red "Paid", offered as part of the Lapham-Colson-Wall reconstruction, Christie's Oct. 12, 1989 sale, lot 628; and 3) Position 9, light red manuscript control mark, offered as part of the Lapham-Colson-Wall reconstruction, Christie's Oct. 12, 1989 sale, lot 628. In addition to the off-cover stamps recorded by Wall, there are six sound stamps still on covers.

With 2000 P.F. certificate. The Scott Catalogue value does not reflect a transaction involving any of the sound stamps. 9,000.00
Brattleboro Vt., 5c Black on Buff (5X1). Position 8, bottom sheet margin with full imprint “Engd. by Thos. Chubbuck, Bratt.”, large even margins all around, guideline at right, light red pen mark at upper left — found on all ten stamps from the original Chubbuck sheet — faint and almost imperceptible vertical crease at right where the sheet of ten was folded.

EXEMPLARY FINE APPEARANCE. THE FAMOUS AND UNIQUE BRATTLEBORO PROVISIONAL STAMP WITH COMPLETE IMPRINT — FROM THE ORIGINAL CHUBBUCK SHEET AND THE KEYSTONE OF THE LAPHAM-COLSON-WALL RECONSTRUCTION — NOW OFFERED INDIVIDUALLY FOR THE FIRST TIME SINCE 1922. THIS IS THE ONLY UNITED STATES POSTMASTER’S PROVISIONAL ISSUE WITH AN IMPRINT.

Of the 52 Brattleboro provisional stamps recorded by Wall (32 off cover and 20 stamps on 19 covers), only five are from Position 8, below which the imprint is engraved. Two of the five are off cover, and three are on covers, including one cut in at bottom and not showing any part of the imprint. Of the five Position 8 stamps, only the example offered here has a complete imprint; three others show portions of the letters.

This stamp comes from the sheet retained by the printer, Thomas Chubbuck, who sold three stamps to collectors before selling the remaining block of seven to L. H. Bragg in September 1870. Bragg, in turn, sold the block to John W. Scott. The stamps from the Chubbuck block were eventually cut apart and sold to different collectors. In the 1920’s Raymond W. Lapham, with the professional help of Warren H. Colson, reconstructed the Brattleboro plate positions, including some stamps from the Chubbuck sheet. The unique imprint stamp was reported by Fred J. Melville in the September 1922 Stamp Lover (p. 64); its owner was identified as Henry C. Gibson, who presumably sold it to Lapham through Colson (see “The Plating of the Brattleboros”, Calvet M. Hahn, Collectors Club Philatelist, Mar.-Apr. 1988). Since then, it was has always been part of the Lapham-Colson reconstruction, which changed owners in various sales. It last appeared at auction in the Christie’s October 1989 sale of the Weill Brothers’ stock and was sold as part of the reconstruction. In this Rarities sale, collectors now have the opportunity to acquire what is widely regarded as the most outstanding single Brattleboro provisional stamp in existence.

Position 6, large top and bottom margins, full at right and mostly clear of left frameline, beautiful impression on fresh paper, minute spot of frameline scraped at lower left corner and touched up with pencil point — positively trivial and mentioned only for total accuracy — red “Paid” straightline cancel, second strike on large piece with matching “Brattleboro Vt. May 12” (1847) circular datestamp.

EXTREMELY FINE PIECE. AN OUTSTANDING BRATTLEBORO POSTMASTER’S PROVISIONAL STAMP POSTMARKED ON THE LATEST DATE OF ANY RECORDED EXAMPLE. ONLY A FEW EXIST IN THIS CHOICE QUALITY.

Brattleboro Vt., 5c Black on Buff (5X1). Position 8, bottom sheet margin with part of imprint “Engd. by Thos. Chubbuck, Bratt.,” large margins except where just into frameline at upper right corner, red “Paid” cancel, two faint vertical creases that are invisible on face of stamp.

VERY FINE APPEARANCE. ONE OF FIVE RECORDED EXAMPLES OF THE BRATTLEBORO PROVISIONAL STAMP WITH IMPRINT — THE ONLY UNITED STATES POSTMASTER’S PROVISIONAL ISSUE WITH AN IMPRINT.

As detailed in lot 11, only five of the 52 Brattleboro provisional stamps recorded by Wall (32 off cover and 20 stamps on 19 covers) are from Position 8, below which the imprint is engraved. Two of the five are off cover, and three are on covers (one of which is cut in at bottom).

Although faintly creased, this stamp is among the choicest Brattleboro provisionals. Only five off-cover Brattleboro stamps are sound, and many of the others are cut in or have serious faults. This is among the top tier of condition, and it has the added feature of an imprint.

Brattleboro Vt., 5c Black on Buff (5X1). Position 9 above 10, each has three large margins, clear at bottom, each cancelled by red “Paid” straightline, the stamp at top applied first and tied to lettersheet, the stamp below applied immediately after and struck hard with “Paid” — the impression ties thru paper, and offset from the “Paid” above is on the back of the stamp — matching strikes of “Paid” and “Brattleboro Vt. Sep. 17” circular datetamp on 1847 blue folded letter to James H. Wells at Hartford Conn., file fold clear of stamps and markings

EXTREMELY FINE. THE ONLY RECORDED COVER WITH TWO OF THE BRATTLEBORO POSTMASTER’S PROVISIONAL STAMPS. THIS IS REGARDED WITHOUT EXCEPTION AS THE MOST IMPORTANT BRATTLEBORO COVER EXTANT, AND IT RANKS AMONG THE MOST OUTSTANDING COVERS IN UNITED STATES PHILATELY.

This letter to James H. Wells states “I received the enclosed letter yesterday…”, which substantiates the double 5c rate for weight exceeding a half ounce. It was discovered in 1936 along with two other folded letters to Wells in Hartford, each with a single Brattleboro stamp.

The unpublished Brattleboro census by Philip T. Wall lists a total of 52 stamps, including 20 stamps on 19 covers. There is no recorded multiple of any size, and this is the only multiple franking.

Position 9, large margins to just clear of frame-line, small scrapes at lower left and upper right, tiny manuscript "FNP" initials below printed initials of postmaster, tied by red "Paid" straightline with matching "Brattleboro Vt. 28 Aug." (1846) circular datestamp on folded letter datelined "Brattleboro Aug. 27, 1846" to Matthew Hale at Chelsea, Vermont, file fold at center, lettersheet to the right of fold is slightly toned

VERY FINE. THE EARLIEST RECORDED USE OF THE BRATTLEBORO POSTMASTER'S PROVISIONAL AND PROBABLY CLOSE TO THE FIRST DAY OF ISSUE. AN IMPORTANT ARTIFACT OF THIS FASCINATING ERA OF AMERICAN PHILATELY.

This August 27, 1846, letter is written from William R. Hale to his brother, Thomas, and he adds a postscript to the top of the sheet "I pay this just to show you the stamp. It's against my principles you know." From this statement we may infer that the Brattleboro stamp was relatively new — a novelty item — and upon return from a visit to his family, the writer decided to prepay postage ("against my principles you know").

The tiny "FNP" initials on the stamp have been described as a possible control measure, which assumes they were applied by the postmaster, Dr. Frederick N. Palmer (see "The Plating of the Brattleboro", Calvert M. Hahn, Collectors Club Philatelist, Jan.-Feb. 1988). Because this is the earliest recorded date, it is possible that the first sheets sold were initialed by the postmaster, in common with the New York City postmaster.

After this August 28 postmark date, the next Brattleboro cover recorded in Philip T. Wall's unpublished census is September 3, 1846 (found on more than one cover). Unless a new cover is discovered, it is highly unlikely that the August 28 earliest usage date will be revised.

VERY FINE. THE ONLY RECORDED EXAMPLE OF THE BRATTLEBORO POSTMASTER’S PROVISIONAL TIED BY THE CIRCULAR DATESTAMP. ONE OF THE MOST DESIRABLE BRATTLEBORO COVERS EXTANT.

Of the 19 covers recorded by Philip T. Wall in his unpublished census, only this cover has the stamp tied by the town circular datestamp. This cover was found by Maj. Frederick Childs prior to 1892. It was used as the basis of a facsimile that accompanied a reprinted article on the Brattlebros dated December 4, 1892. It was sold in the Siegel 1969 Rarities sale for $8,750 and acquired by Muriel B. Hayes. The cover was part of the Marc Haas collection and sold by this firm again in April 1980 for $15,500. Creighton C. Hart was the next collector to own the cover, and he sold it by private treaty. This is its first auction appearance in 20 years.

ONE OF ONLY FOUR RECORDED USAGES OF THE PROVIDENCE PROVISIONAL STAMP TO A FOREIGN DESTINATION, AND THE ONLY ONE TIED BY THE PROVIDENCE CIRCULAR DATETAMP. FROM A NEW DISCOVERY.

The discovery of this large part of a cover brings the total recorded foreign usages of the Providence provisional stamp to four. There are three covers: 1) tied by ms. on cover to London, Sheffield correspondence, ex Pope; 2) tied by ms. on cover dated Apr. 26 to London, England, Reynolds correspondence; and 3) cancelled by ms. on folded cover to Sheffield, England, filing crease affecting stamp, address partially erased. The piece offered here is notable also for the fact that the stamp is tied by the red Providence datetamp. Less than a dozen covers are known with the provisional tied by the red Providence datetamp.

Excluding the New York postmaster’s stamp, which served a more general use than any other provisional, only five postmasters’ provisional usages to foreign countries have been recorded: the four listed above for Providence and one Baltimore 10c cover.

10-CENT 1847 ISSUE USED FROM CANADA

10c Black (2). Intense shade and proof-like impression on strongly blued paper, large to huge margins — especially wide at sides — cancelled by Montreal 7-ring target perfectly centered on stamp, strong impression of outer ring ties thru paper, used on June 22, 1852 folded letter from Canada to the United States, sent from the Bank of Montreal to D. S. Kennedy in New York City, beneath the 10c stamp is a red "Paid" straightline applied at Montreal — stamp carefully affixed over the marking at the Montreal office — red "Montreal L.C. Ju 22 1852" rimless circular datetamp and matching "Canada" in framed arc, prepayment accepted at New York City with its red curved "Paid" handstamp applied on receipt. EXTREMELY FINE. A SUPERB STAMP ON AN IMMACULATE COVER. VERY FEW EXAMPLES OF THE 1847 ISSUE USED FROM CANADA ARE KNOWN WITH THE CANADIAN 7-RING TARGET CANCEL. THIS COVER IS ONE OF THE MOST OUTSTANDING ITEMS FROM THE HALL COLLECTION.

This cover and another cover from the E. D. Morgan correspondence show similar use of the 10c 1847 Issue from Montreal after demonetization of the issue on July 1, 1851. Supplies of the 1847 Issue sent to Canada could be redeemed through September 30, 1851; however, not all stamps were redeemed, and some were used after demonetization. Although no longer valid on mail posted within the United States, the stamps on mail from Canada to the U.S. seem to have been accepted, as each of the five post-demonetization 1847 covers from Canada (recorded by Hart) has the New York post office "Paid" marking and no indication of postage due. The latest use of 1847's from Canada is an April 6, 1855, cover from Quebec with the 5c 1847. According to Greigton C. Hart, the demonetization order was "not binding on residents of Canada", which appears to be empirically true (reference: C. G. Hart, Chronicle, November 1973).

The red italicized "Paid" on this folded letter is covered by the stamp. Obviously, the "Paid" was applied before the stamp was affixed. How could the stamp be placed on the letter after it was marked "Paid" by the Montreal postal clerk? First we should review some of the physical evidence that explains the usage. The red ink of the "Paid" bleeds through to the face of the stamp, most noticeably on Washington's cheek, to the right of his nose. This evidence indicates that the stamp was applied almost immediately after the red "Paid", which was still moist. The impression of the outer ring of the 7-ring target can be seen on the inside of the lettersheet, which indicates that the stamp was in that exact spot when it was cancelled. The absence of any Canadian rate marking or New York due marking proves that postage was considered prepaid when the letter arrived at the New York post office; if there was no stamp, there would be a "ld" prepaid rate marking. Under ultraviolet light, there is a white ghost outline of the 10c stamp visible on the lettersheet beneath the stamp (when the upper left corner is gently lifted), which also provides evidence that this is the original franking and not a replacement for a Canadian stamp.

The best explanation for this usage is that a stack of letters was brought to the post office, and the receiving clerk marked each one "Paid" in expectation of receiving cash or charging postage to the sender's post office box account (as was done for many of the surviving letters from this correspondence). The Bank of Montreal employee who brought the mail then turned over one or more United States 1847 stamps and requested the clerk to honor them as prepayment. Presumably aware that the addressee, D. S. Kennedy, was the Canadian government's fiscal agent in the United States, the clerk was accommodating. However, he hedged his accommodation by affixing the stamp over the "Paid" marking, canceling it and letting the New York City post office decide whether or not to accept the 10c stamp as prepayment. In the final result, New York accepted the stamp and marked the letter with its distinctive "Paid" arc.

1847 ISSUE USED WITH CARRIERS ANDlocals

Honour’s City Post, Charleston S.C., 2c Black on Bluish, Period after “Paid” (4LB8a).
First setting, position showing upturned pearl at left and inverted period after “Post”,
full to large margins, faint horizontal pre-use crease, tied by pen strokes across each
corner, used with 5c Red Brown (1), margins touching or slightly in on three sides, tied
by several strikes of red grid cancel, matching “5” rate handstamp on blue folded letter
dateline Charleston, Dec. 17, 1850, to John L. Manning at Columbia S.C. — then a state
senator, elected governor of South Carolina in 1852 — from an educator and promoter
of “Southern Education” and the “Abolition of Abolition Text Books” in Southern schools

Very fine. One of five recorded 1847 covers with a Charleston carrier stamp —
each an Honour’s issue — three of which are 5-cent combinations.
A magnificent cover for the 1847 collector or carrier specialist alike.

There are two 10c 1847 covers recorded with the oval Honour’s stamp (4LB1 and 4LB2)
and three covers with the 5c 1847 used in combination with Honour’s 4LB7 or 4LB8a.
The other two 5c covers are double-rate frankings. This is the only single franking, and
the absence of the Charleston post office datestamp suggests that it might have been
urgently prepared for the train trip to Columbia.

ONLY POSITION 7R1E — THE SEVENTH STAMP IN THE RIGHT Pane OF PLATE 1 EARLY — FURNISHED IMPERFORATE 1851 ONE-CENT STAMPS SHOWING THE COMPLETE DESIGN (TYPE I). A HIGHLY DESIRABLE CLASSIC UNITED STATES STAMP.

The census compiled by Mal Brown contains at least 80 unduplicated records of Scott 5. There are probably no more than ten examples existing outside of the Brown census population. Therefore, the 1c 1851 Type I is the rarest of all United States stamps issued regularly prior to the 1868 Grills.

1c Blue, Ty. Ib (5A). Position 6R1E, beautiful Plate 1 Early color, large margins except just barely in at top left, neat grid cancel

VERY FINE. POSITION 6R (AND 8R) FURNISHED THE BEST TYPE IB EXAMPLES.

Type Ib was produced only as an imperforate stamp. Six positions on Plate 1 Early furnished stamps qualifying as Type Ib — Positions 3-6R and 8-9R — distinguished by the complete design at top and nearly complete design at bottom. When first entered on the plate, these six positions (as well as 7R1E) had the complete design at top and bottom. However, unlike 7R, small portions of the bottoms were burnished away. Positions 6R and 8R had less of the bottom erased than the other Type Ib positions, and for this reason they are more desirable examples of the type.

EXTREMELY FINE GEM. A SUPERB EXAMPLE OF THE IMPERFORATE TYPE IA STAMP. ESPECIALLY RARE WITH A FOREIGN TRANSIT CANCELLATION.

Stamps printed from Plate 4 were issued in April-June 1857 before perforations were introduced. The relatively small number of imperforate Plate 4 stamps issued during this period explains the rarity and desirability of any of the imperforate stamp types produced from this plate. The rare Type Ia, showing the full design at bottom, was furnished only by 18 of the 200 subjects on Plate 4.

This block was discovered within the past seven years among a file of old records. It is the largest known block from Plate 1 Early, followed in size by the irregular unused block of eight containing Position 7R1E, an unused and defective block of six (Pos. 51-53/61-631E) and seven or eight unused blocks of four (one used block is also known).

EXTREMELY FINE GEM. A MAGNIFICENT ORIGINAL-GUM EXAMPLE OF THE IMPERFORATE TYPE IV ONE-CENT 1851 ISSUE. A SUPERB STAMP IN EVERY RESPECT.
To describe this extraordinary stamp merely as a Scott 9 with original gum does not do justice to its condition. There is no doubt that it comes from an original-gum multiple cut apart in recent years, because any single 1c 1851 stamp of this quality would have been mounted with hinges in collections going back to the early 20th century. It is also quite possible that the stamp comes from a position in the block that was never hinged, for there is only a small area of unevenness in the gummed selvage, and we see no trace of hinging. For the collector who demands original gum on classic stamps, this is the ultimate example of the 1c Type IV imperforate.

100 1c Blue, Ty. IV (9). Position 91L1, triple transfer, one inverted, recut once at top, immense margins all around with trace of adjacent stamp at top and sheet margin at bottom and at left, neat circular datestamp
EXTREMELY FINE. AN OUTSTANDING EXAMPLE OF THE 1851 ONE-CENT WITH TRIPLE TRANSFER, ONE INVERTED, FROM PLATE 1 LATE.
The three inverted transfers occurred during the making of Plate 1 Early. Positions 71L, 81L and 91L were entered from the three-subject transfer roll in the spaces where the first three entries had been made and erased (but not fully erased). The three entries that were erased were made in the upper corner left corner of the plate (which would produce 10R, 20R and 30R). The plate was turned 180 degrees before starting fresh entries from the transfer roll. Why this was done is not known. Position 91L was re-entered a third time on Plate 1 Early, creating a triple transfer (two upright, one inverted). When Toppan, Carpenter re-worked the worn plate, many of the subjects were re-entered, and all but one were recut at top and/or bottom, creating Scott 9, Type IV, from what we call Plate 1 Late (the same piece of steel in its modified state). Positions 71L and 81L were re-entered, thus becoming triple transfer (one inverted) positions, but 91L was not re-entered.

THIS IS THE LATEST RECORDED USE OF THE TROY & NEW YORK STEAM BOAT MARKING WITH THE "2CTS" FEE RATE HANDSTAMP ON A COVER WITH STAMPS.

This cover is illustrated and described in detail on pp. 232-234 of Vol. II of Ashbrook's The United States One Cent Stamp of 1851-57. The "Troy & New York Steam Boat" marking was applied to covers carried outside of the mails by non-contract steamboats. The marking applied at Troy, and a 2c fee was collected in addition to the normal rate of postage. This 2c fee was paid to the ship's captain; in this way, letters carried by non-contract steamboats did not affect the revenues of the Post Office.

In late 1851 or early 1852, the practice of collecting the additional 2c in postage was discontinued. Mail continued to be carried by non-contract steamboats with the fee of 2c going to the captain, but the Post Office absorbed the fee and the use of the "2cts" handstamp was discontinued.

EXTREMELY FINE GEM. A BEAUTIFUL EXAMPLE OF THE IMPERFORATE TYPE IV 10-CENT 1855 ISSUE FROM THE MISPLACED RELIEF POSITION — THE ONLY RECURT POSITION ON THE RIGHT PANE OF THE PLATE.

When the plate was being entered from the transfer roll (or rolls), three vertical rows were started with the B relief instead of the A relief. These were the first two rows of the left pane, and the third row of the right pane. Only the first position in each vertical row is misplaced — the rest of the sheet was laid out with the A Relief used for the top two rows. Position 3R1, one of the three misplaced relief positions on the plate, also bears the distinction of being one of the eight recut positions, and the only position recut on the entire right pane of the plate.

Only Position 3 was recut in the right pane, and it is the only Type IV position possible with a sheet margin. EXTREMELY FINE GEM PAIR. A SUPERB ORIGINAL-GUM HORIZONTAL PAIR OF THE 12-CENT 1851 ISSUE WITH COLOSSAL MARGINS AND EXTRAORDINARY FRESHNESS.

As this pair amply demonstrates, the spacing between stamps on the plate is very narrow. Most examples (unused and used) have either narrow margins or are cutting into the frame lines. This pair, with full original gum and with such large margins, is a remarkable rarity. In fact, we feel confident saying that this is the finest original-gum pair extant.

Br. Pkt. 19 Nov. 2" credit datetamp, intense shade and proof-like impression

EXTREMELY FINE GEM. A GORGEOUS USED EXAMPLE OF THE 12-CENT 1851 ISSUE. SUPERB IN EVERY RESPECT — COLOR, IMPRESSION, CANCEL, MARGINS, AND FRESHNESS.

The 12c 1851 plate was laid down with very little room between stamps — just barely one millimeter, to be exact. For this reason, collectors have a difficult time finding stamps with large margins. The 12c 1851 was also rarely cancelled exclusively by the red credit markings used by foreign-mail exchange offices; therefore, even when a red credit marking is present, it is usually struck in conjunction with another less attractive marking.

This stamp breaks both rules. The margins are enormous, and the sheet margin at right shows the guideline between the left and right panes (this stamp comes from the left). It was once part of a pair used to pay the 24c treaty rate to England — we know this because of the "19" (cents) credit datetamp applied at the Philadelphia exchange office. In this instance, no other cancel was used, and we are left with a spectacular sheet-margin single cancelled in red. None of the above will be lost on specialists in United States used classics, but for those less familiar with the nuances of the 1851-57 Issue, we should emphasize the truly extraordinary features of this stamp.

This is the only intact block of the 5c Brick Red. The Caspary collection contained a block of three with a fourth stamp added to create a complete block.

Apart from the block offered here, there are perhaps twenty 5c Brick Red stamps with original gum to be found among major auction sales of the past fifty years. About half of the known examples are poorly centered. Almost two-thirds have stains or small faults. Judging from our survey, we estimate that perhaps six or seven sound original-gum Brick Red stamps exist with centering approaching any of the stamps in this block. A well-centered original-gum Brick Red in our sale of the Golin collection (Sale 812) realized $35,000 hammer versus $14,000 Scott value. The three sound stamps in this block would probably be worth $50,000 to $75,000 each if offered as singles, which does not reflect any premium for the uniqueness of the block.

EXTREMELY FINE APPEARANCE. THE INDIAN RED SHADE IS ONE OF THE MOST DIFFICULT STAMPS OF THE 1857 ISSUE TO FIND IN UNUSED CONDITION. THIS IS ONE OF THE BEST-CENTERED, MOST VIVID EXAMPLES WE HAVE ENCOUNTERED.

The so-called Indian Red shade of the 5c 1857 Issue is the rarest of the colors, ranging from Brick Red to Red Brown to Brown. In unused condition, it is an extreme rarity, with perhaps five or six original-gum examples known. We surveyed approximately fifty catalogues of major sales held over the past 70 years and, together with the stamp offered here, we located only eight different examples of the 5c Indian Red in unused condition (four with original gum or part o.g.). Even allowing for copies we have missed, Scott 28A in unused condition is obviously a great rarity. In fact, in Rarities sales conducted by our firm since 1964, only *four* unused 5c Indian Red stamps have been offered, not including this year's sale. The stamp offered here is one of the three best-centered of the group.

EXTREMELY FINE AND PRISTINE CONDITION. A REMARKABLE PONY EXPRESS WAY COVER, PICKED UP AT FORT BRIDGER BY A PONY RIDER ALONG THE ROUTE FROM CALIFORNIA. BELIEVED TO BE A UNIQUE FRANKING AND USAGE.

Based on another Pony Express cover postmarked at St. Joseph on June 27, 1861, this Pony Express trip originated in San Francisco on June 15. Fort Bridger was a regular stop along the Pony route, and this cover was handed to the rider on June 20.

Fort Bridger was established in 1843 by famed mountain man Jim Bridger and a partner, Louis Vasquez, on Black's Fork of the Green River in the southwest corner of what is now Wyoming. It was for many years an important emigrant supply stop and Indian trading post along the Oregon Trail. In 1853 the Mormons took control of the fort after trying to arrest Bridger for selling gunpowder to the Indians — this event led to a dispute over ownership that lasted many years. In 1857, with the outbreak of the Mormon War, the fort was abandoned and burned by the Mormons. In the summer of 1858, Fort Bridger was occupied by United States troops under the command of Albert Sydney Johnston, 2nd U.S. Cavalry. Fort Bridger postal markings from this early period carry the "U.T." Utah Territory designation. In 1861 most of the troops headed east to participate in the Civil War.

EXTREMELY FINE GEM. A SUPERB USED EXAMPLE OF THE SHORT-LIVED 90-CENT 1860 WITH A FOREIGN TRANSIT DATESTAMP.

The basic 24c and 30c rates to England, France and Germany created a large volume of mail franked with those values of the 1857-61 series. However, the 90c saw much more limited use, partly due to the rates in effect, but more because of the American Civil War. When supplies of current postage stamps were declared invalid in the South and ultimately demonetized by the Federal government, the 90c had been in use for only one year. For this reason, genuinely cancelled copies and covers bearing the 90c are extremely rare. Approximately 180 used examples have been certified by The Philatelic Foundation, of which one-quarter are sound.

The cancel most often seen on genuine used examples of the 90c is the New York red grid. The stamp offered here, with a London transit datestamp and a lightly-struck black grid, is a remarkable rarity.

As experienced collectors who seek choice used classics have discovered, so many of the 90c 1861’s in higher grades are rejected because of heavy cork cancels. The stamp was typically used on high-rated foreign mail, and it was customary to cancel outbound foreign mail with distinctive large cork cancels. VERY FINE. AN ATTRACTIVE EXAMPLE OF THE 3-CENT SCARLET TRIAL PRINTING. THIS PEN-MARKED EXAMPLE COMES FROM THE ROTHFUCHS GROUP OF 1893.

As has been documented by Jerome S. Wagshal in a series of Chronicle articles (Nos. 56, 60, 61 and 62), a Washington D.C. stamp dealer, Carl F. Rothfuchs, obtained a supply of the 3c Scarlet in 1893 — probably from the Post office Department in exchange for his assistance with the Columbian Exposition — and sold them with pen marks and original gum. The Rothfuchs lot is not from the same supply acquired by John W. Scott in the late 1870's, from which stamps exist uncanceled and cancelled with a New York City Station D oval.

EXTREMELY FINE GEM. MAGNIFICENT QUALITY FOR THE 5-CENT BROWN 1861 ISSUE, WHICH RARELY COMES WELL-CENTERED WITH FULL ORIGINAL GUM.

The 5c Brown stamp in the 1861-66 series is one of those that challenge collectors who demand choice original-gum examples. The vast majority of 5c Brown stamps are off-center or faulty. By virtue of its pristine original-gum condition and perfect centering, the example offered here is truly rare.

** 15c Black (77). Original gum in Mint Never Hinged state, sharp proof-like impression on bright and fresh paper, wide margins

Throughout recent Siegel sales that have contained a remarkable group of original-gum 1861-66 Issues, we have made frequent reference to the rarity of these stamps in choice condition. With the exception of the rare 5c and 24c shades, our experience shows that the 15c Lincoln is the most difficult stamp to obtain in sound, choice original-gum condition. It is most often found without gum or with disturbed gum. Examples with full original gum are frequently off-center. The block of six (straight edge at left), ex Caspary, Lilly and Ishikawa, is well-centered with original gum, but our search of numerous other major auction sales produced few other examples apart from the block. Therefore, this stamp could be the rarest face-different design of the 1861-66 series in choice original-gum condition. As a Mint Never Hinged stamp, it should be considered an even greater rarity.

163 * 24c Dark Lilac (78). Original gum, well-centered, incredibly deep shade and sharp impression on bright fresh paper
EXTREMELY FINE AND CHOICE. THE 24-CENT 1861-66 IS EXTREMELY RARE IN WELL-CENTERED ORIGINAL-GUM CONDITION. THE SHADE AND IMPRESSION OF THIS STAMP ARE VERY RARELY ENCOUNTERED.
This stamp and the stamp in the previous lot are Dark Lilac shades, but the impression is better defined in this example, and the shade is more intense. Every background line and detail of the lathework is printed with perfect clarity. The paper of this stamp is whiter, slightly thicker and more opaque — it is similar to the paper on which the Blackish Violet (Scott 78c) is found — and we suspect that the printings in this Dark Lilac shade and Blackish Violet shade occurred in close proximity, probably on similar paper stock.
The Scott value is based on a typical 24c stamp and does not begin to reflect the rarity of this stamp, in terms of its condition and depth of color.

164 E 1c Blue, A Grill, All-Over Grill Essay with Points Up (unlisted in Scott). Original gum, full and well-defined grill, a few perfs missing at right, centered to right as are all four known. 

One of four recorded examples of the 1867 one-cent all-over grill essay, which is unlisted in Scott. This is the upper right stamp from the ex-Steel, Earl of Crawford and Worthington block of four.

The four recorded examples of the 1c A Grill essay come from the block of four that originated in the Charles F. Steel archive and was part of the Earl of Crawford and George Worthington collections. The grill has tiny "X" pyramidal points impressed into the back, which differs from the essay grill made of small squares (79-E15a/b); it is very similar to the issued A Grill. The 1c block and a 5c block with the identical grill were acquired by the Earl of Crawford from the archive of papers and stamps retained by Charles F. Steel, who patented the grilling device. For more information about the origins of the experimental A and C grills, please refer to Chronicle 134 and to our October 1998 catalogue of the Zoellner collection (also available in the Siegel Encyclopedia at www.siegelauctions.com/enc/1867.htm).

Two of the stamps from Steel's 5c block have actually been certified by the Philatelic Foundation as Scott 80, which indicates how similar these grills are to the issued A Grill (Scott 79, 80 and 81). We believe that the 1c and 5c A Grills from the Steel blocks deserve Scott Catalogue listings — we would go so far as to put them at the front of the catalogue, not in the essay section. There is precedent for giving the 1c and 5c grilled stamps from the Steel blocks full Scott listings: the 4c Pan-American Invert and the 4c and 8c Bluish Paper stamps. None of them were issued at the post office, but nonetheless they are experimental stamps that reached the public through official channels. Whether or not Scott's editors concur with our view, collectors should consider the stamp offered here to be an integral part of classic U.S. philately.

EXTREMELY FINE APPEARANCE. IN TERMS OF CENTERING AND MARGINS, THIS STAMP RANKS AMONG THE TOP FIVE ORIGINAL-GUM EXAMPLES OF THE 2-CENT Z GRILL.

To form our assessment of this 2c Z Grill, we conducted a survey of approximately 100 auction catalogues for major United States collections sold over the past 60 years. The majority of these collections contained only used or very poor unused examples of 8SB. Many accomplished collectors were never able to locate a sound, well-centered original-gum 2c Z Grill. Although the stamp offered here is indeed creased, its appearance far surpasses most of the known copies. In our September auction (Sale 814), a sound, Extremely Fine 2c Z Grill realized $24,000 hammer.

167 2c Black, Z. Grill (85B). Well-centered with wide and well-balanced margins, full and clearly-defined grill showing all of the points, light cork cancel which is virtually face-free

EXTREMELY FINE GEM. AN OUTSTANDING STAMP THAT RANKS AMONG THE FINEST USED EXAMPLES OF THE 1868 2-CENT Z GRILL.

If one were to view this as an ungrilled 2c Black Jack, it would merit the highest rank among used examples. The plates used to print these stamps did not provide enough space between subjects for the large 12-gauge perf holes. Consequently, most Black Jack stamps have perfs touching the design on one or two sides. This scarcity of centered copies multiplies exponentially when the Z Grill is factored into the equation. Only a small quantity of 2c sheets were grilled during the period when the Z device was active — after the D Grill, the Z is the rarest of Black Jack grilled stamps — and discriminating collectors are well aware of the rarity of well-centered examples of 85B. This stamp is perfectly centered and has margin width that significantly surpasses the issue standard.

A nearly identical copy sold in our September sale for $11,500 hammer, a formidable demonstration of the rarity and desirability of well-centered 2c Z Grills in this condition.

Deep Rose shade on fresh paper, remarkably well-centered
with long full perforations, strong grill impression
EXremely FINE Gem example of the 3-cent Rose E
Grill. Rarely seen in this Choice Condition.
The 3c E Grill should not be confused with the F Grill in
terms of condition. It is far rarer in this original-gum condi-
tion and Extremely Fine Gem grade. The reason could be
that multiples, from which such choice stamps can be
harvested, have always been scarce, and single stamps saved
by collectors in albums typically have disturbed gum from
multiple hinges. Therefore, this lightly hinged 3c E Grill,
with its intense shade and enormous margins, should be
given special attention.

EXTREMELY FINE. AN OUTSTANDING ORIGINAL-GUM EXAMPLE
OF THE 10-CENT E GRILL WITH REMARKABLE CENTERING —
RARE IN THIS CHOICE CONDITION.
Our comments about the relative rarity of 3c E and F Grills in
choice original-gum condition (see lot 171) apply to the 10c,
and perhaps even more so. While blocks of the 10c F Grill
have been broken in recent years, yielding some choice single
stamps, the 10c E Grill blocks are extremely rare and always
have been. Caspary’s block of 18 was broken years ago, but
many of the stamps had faults or disturbed gum. Few other
blocks have become available to furnish singles. The centering
and soundness of this 10c E Grill place it high on the condition
census.

5-CENT BROWN F GRILL WITH ORIGINAL GUM. AN EXCEED-
INGLY RARE STAMP IN THIS CHOICE CONDITION.
The 5c 1861-68 Issues are extremely difficult to find in sound,
well-centered, original-gum condition. The narrow spacing
between stamps on the plate and large 12-gauge perforations
resulted in stamps that are frequently off center. This applies to
Scott 67, 75, 76 and 95 alike. None of these is easy to locate in
centered original-gum condition (to understake the matter), but
the limited production of 5c F Grills leaves collectors with an
even smaller supply. By virtue of its color, centering and fresh-
ness, we believe the stamp offered here is superior to any we
have seen offered in years.

**EXTREMELY FINE FOR THIS SCARCE ISSUE. A CHOICE ORIGINAL-GUM EXAMPLE OF THE 1868 24-CENT F GRILL IN AN EXTRAORDINARY STATE OF FRESHNESS.**

The higher-denomination F Grills were produced in limited quantities and seem to have caused National Bank Note Co. difficulty in applying perforations. They are typically off center with very choppy perfs. This stamp is uncharacteristically well-centered and has well-formed perforations. Although centered slightly to left, we feel it deserves the Extremely Fine grade, considering how high it is positioned in a condition census.

EXTREMELY FINE GEM. A SUPERB EXAMPLE OF THE 2-CENT 1861 RE-ISSUE IN EVERY RESPECT — CENTERING AND MARGINS, COLOR, IMPRESSION, PAPER AND GUM — AND ARGUABLY UNSURPASSED IN QUALITY.

Although the 2c Black Jack Re-Issue plate left ample space between stamps, centering and margins on this issue still present a problem, as the vast majority are off center. If we look at just the original-gum examples, very few can be placed in the same class to which this stamp belongs. Its precise centering and colossal margin width are reason enough to consider this stamp the finest Black Jack Re-Issue extant.

EXTREMELY FINE GEM. A SUPERB EXAMPLE OF THE 3-CENT 1861 RE-ISSUE — ONE OF THE RAREST OF THE SET IN THIS CHOICE CONDITION.
In our experience, the 3c 1861 Re-Issue has the dubious distinction of being one of the three most difficult stamps in the set to obtain in this Extremely Fine Gem original-gum condition (the others are the 24c and 30c). It is rarely found well-centered, and those in Very Fine or Extremely Fine grade usually have disturbed gum or no gum at all. In this stamp, we have the rare combination of centering and original gum, elevating it to one of the finest extant. We should note that the collector who owns this stamp flew 3,000 miles to an auction in California for the sole purpose of buying this one stamp — today’s bidders might consider doing the same.

EXTREMELY FINE GEM. A MAGNIFICENT 12-CENT 1861 RE-ISSUE WITH THE FINEST ATTAINABLE CENTERING, IMPRESSION AND STATE OF FRESHNESS.
Seeking only the finest examples of 1861 Re-Issues, the collector who consigned this stamp (and others in the sale) succeeded in locating a perfectly-centered 12c with original gum. Although wide margins are the norm for the 12c Re-Issue, this stamp’s centering and freshness are the critical elements that distinguish it from virtually all others.

15c Brown & Blue, Ty. 1 (118). Original gum, a pristine back with only a slight trace of hinge, nearly perfect centering with wide margins, sharp impressions with well-aligned vignette and frame, bright colors and overall freshness rarely encountered in this issue
EXTREMELY FINE GEM. THE 15-CENT 1869 TYPE I IS VERY RARE IN THIS CHOICE ORIGINAL-GUM CONDITION. A SPECTACULAR STAMP AND CERTAINLY ONE OF THE FINEST KNOWN.
The 15c Type I comes from the first 1869 printing; in May 1869 the 15c went to press using the second frame plate, which produced Type II. In a condition census, both Type I and II would show similar numbers known in the top tier of original-gum condition — probably 8 to 10 of each. However, Type I is generally a rarer stamp and carries a much higher Scott Catalogue value. Very few of this quality have been offered in years, and we anticipate vigorous competition.

15c Brown & Blue, Ty. II (119). Original gum, nearly perfect centering with wide margins all around, deep shades of Brown and Blue, fresh and bright
EXTREMELY FINE GEM. ONE OF THE FEW 15-CENT TYPE II 1869 PICTORIAL STAMPS IN EXISTENCE WITH ORIGINAL GUM, SUPERB CENTERING AND FRESHNESS.
As noted in lot 195, the 15c Type I and II stamps are probably of equal rarity in Extremely Fine original-gum condition — we estimate 8 to 10 of each. Although large blocks of the Type II existed (or exist), none contain perfectly centered stamps. Of the single stamps available to collectors, gum is frequently a problem due to repeated use of hinges. This Type II is both centered and lightly hinged, and the vignette is nicely aligned to the frame, something that perfectionists will appreciate.

EXTREMELY FINE GEM. A SUPERB STAMP WITH REMARKABLY CHOICE CENTERING. THE 30-CENT 1869 IS ESPECIALLY RARE IN ORIGINAL-GUM CONDITION.

Our experience with the 1869 Pictorial Issue has shown that the 30c with grill (as opposed to Scott 121a without grill) is extremely rare in well-centered original-gum condition. Centering seems to be a challenge in this issue, and our best estimate is that 12 to 15 stamps exist in the Extremely Fine grade with original-gum.

204 (★) 90c Carmine & Black (122). Vertical block of six, unused with traces of original gum, well-centered, intense vignette impression, frame varies from bright Carmine at left to a pinkish slightly dry print at right, which suggests this is a right margin block, faint thin spot on right center stamp, perfs strengthened and rejoined in places.

The distinctive Japanese bamboo "chops", as they are called, were used to cancel stamps on mail originating at the United States consular post offices in Japan between 1867 and 1871. They are easy to identify by the shape and grayish ink. A substantial number of 10c 1869's exist with these chop cancels, both on and off cover. We are aware of three 90c 1869 stamps with the same "X" chop, and, based on the early impressions and colors of the stamps, they appear to have been supplied to Japan from a very early printing.

1869 PICTORIAL ISSUE WITHOUT GRILL

The presence of the 15c Type I (and absence of Type II) among the Without Grill varieties leads us to the conclusion that these stamps come from the earliest printing, because the Type I frame plate was used only for the first printing. The two recorded 50c Without Grill top sheet-margin blocks show the imprint but no plate number on the flag plate; however, the number 21 appears on plate proofs, which indicates that the Without Grill impressions came first. Therefore, we believe there is sufficient evidence to assign all values of the Without Grill stamps to the first printing.

The four bicolored 1869 Without Grill stamps offered here come from a single source and have been held for decades. They are remarkably fresh and choice, but apart from the desirability of their condition, the colors, gum and paper provide us with a well-preserved representation of what these stamps looked like at the time of issue. The fact that all four have remained together suggests that they were acquired at the same time. However, we have no information on their provenance.

EXTREMELY FINE GEM. A RARE STAMP IN ANY CONDITION. THIS 3-CENT 1869 RE-ISSUE RANKS AMONG THE VERY FINEST IN TERMS OF COLOR, CENTERING, FRESHNESS AND GUM.
Original sales figures show that among the 1869 Pictorial Re-Issues, the 3c and 90c stamps accounted for the smallest number of units sold (1,406 and 1,356, respectively). Overall, the 1869's were popular with stamp collectors, far outselling the 1851-60 and 1861-66 Re-Issue sets. However, the 90c stamp's high denomination and the availability of ordinary 3c stamps limited demand. Today, both are rare, and handling over the years has not been kind to most of the surviving examples. The stamp offered here ranks among the finest of the surviving copies.

EXTREMELY FINE GEM. A PERFECTLY-CENTERED MINT NEVER HINGED EXAMPLE OF THE UNGRILLED 2-CENT 1870 NATIONAL BANK NOTE ISSUE. A TRUE CONDITION RARITY WITH SUCH SUPERB COLOR, CENTERING, FRESHNESS, IMPRESSION AND GUM.

As scarce as the 2c 1873 Continental stamp (Scott 157) is in Mint N.H. condition, the 2c 1870 National printing (Scott 146) is rarely obtainable in this state. The stamp offered here is easily one of the finest — if not the finest — we have encountered. Collectors on a quest to acquire the Bank Note issues in Extremely Fine Mint N.H. condition will be hard-pressed to locate a stamp of comparable quality.

EXTREMELY FINE GEM. AN EXCEEDINGLY CHOICE EXAMPLE OF THE 15-CENT UNGRILLED NATIONAL BANK NOTE ISSUE — THE FINEST CONDITION ATTAINABLE.

The 15c 1870 National Grilled Issue (Scott 141) is widely recognized as an extremely rare stamp in choice original-gum condition. Less well known is the fact that its ungrilled counterpart — Scott 152 — is comparably challenging to find in such condition. This stamp has all of the National printing characteristics — vibrant shade, sharp perf teeth and slightly brownish gum — but it defies the norm by having exceptional attributes of centering, light hinging and freshness.

EXTREMELY FINE GEM. A SUPERB EXAMPLE OF THE 90-CENT CONTINENTAL BANK NOTE ISSUE — ARGUABLY THE FINEST OF ALL.

As we remarked in the description of the 15c 1870 (lot 230), the rarity of the 1870 Grilled Issue in superb original-gum condition overshadows its ungrilled counterpart. The 90c 1870 Ungrilled National is not only overshadowed by the 90c Grill, collectors are misled by the availability of Scott 166, the 1873 Continental printing. The difference in shades is distinct, yet collectors have a tendency to under-rate the 1870 National printing. Most original-gum examples are poorly centered. This example is remarkable for its centering, incredibly fresh gum and intense color. It is everything a 90c National should be, without any of the usual problems. Of the five or six that can be considered Extremely Fine, this is, in our opinion, the finest.

EXTREMELY FINE GEM. ONE OF THE MOST OUTSTANDING ORIGINAL-GUM EXAMPLES OF THE 30-CENT 1873 CONTINENTAL WE HAVE EVER ENCOUNTERED.

Lost among the National, Continental and American Bank Note Special Printings, and the American Bank Note Co. Issues is the 30c 1873 Continental printing. Scott 165 is distinguished from its National counterpart by shade and the shape of the perforations, and from its American counterpart by paper. Many philatelists — even advanced collectors — have difficulty classifying Scott 165. When it comes to naming the most elusive Bank Note stamps in choice original-gum condition, the 30c 1873 is often overlooked. However, go to any serious collection and look for this stamp, and most of the time it is missing or represented by something that compromises quality. The 30c 1870 is frequently found filling the space for Scott 165. The 30c 1873 is extremely rare in any original-gum condition that approaches this example. Blocks have always been rare — for example, Caspary did not have one; Lilly had one well-centered block of four and an off-center block of six — which means that singles could not be harvested from multiples. We hope that collectors who still have a tendency to overlook the 30c Continental will be awakened to its rarity in Extremely Fine original-gum condition by our comments.

30c Greenish Black, Continental Grill (165c). Unused (no gum), clear and easily recognizable Continental grill points on crisp white paper in a greenish shade typical of Continental printings, fine impression and fresh color, slight paper fold — probably caused by grilling — which is described on accompanying certificate as a faint vertical crease

VERY FINE AND POSSIBLY UNIQUE. THIS IS THE ONLY EXAMPLE OF THE 30-CENT CONTINENTAL GRILLED STAMP CERTIFIED AS GENUINE BY THE PHILATELIC FOUNDATION.

It is believed that the Continental grills were made experimentally in 1876, after a stamp-cleaning court trial renewed fears of stamp re-use. The primary source of the rare J Grills was the Worthington collection, which was dispersed in 1917. It is believed that most or all examples in collectors' hands came from the archive of Charles F. Steel, who patented the grilling machines used between 1867 and 1873.

The Scott catalogue notes that "Although perforated, these stamps were usually cut apart with scissors. As a result, the perforations are often much mutilated and the design is frequently damaged." For additional information, please see an article by William E. Mooz in *Chronicle* 183 titled "Scissors Cutting of the 1875 Special Printing Issues." The example offered here, with its design complete and perforations intact on two sides, is among the finer examples known of this rarity.

We credit Larry Lyons with illuminating the extreme rarity of Scott 194. After our 1998 Zoellner sale, in which he acquired a 3c American Special Printing similar to the stamp offered here, he commented to us that his research revealed only a handful of examples in the marketplace over 20 years. He paid $27,000 hammer for the Zoellner stamp, and his judgement was vindicated when he sold the stamp in Shreves' January 2000 sale for $40,000 hammer.

EXTREMELY FINE GEM. THIS IS ONE OF THE FINEST ORIGINAL-GUM EXAMPLES OF THE RARE 4-CENT COLUMBIAN ERROR OF COLOR.

The 4c Columbian color error was caused by the use of a wrong batch of ink, and spectrographic analysis has shown that the blue inks of the 4c error and 1c Columbian have the same components. There are two slightly different shades of the 4c error, this being the deeper of the two.

Stamps from at least two panes reached collectors, and the few cancelled examples indicate that stamps used by the public came from other panes. It is likely that a number of full sheets were printed using the wrong ink, and most of the stamps have simply been lost to philately.

A significant number of the 4c error stamps extant have faults, poor centering and/or heavy hinge remnants. The examples that periodically appear at auction rarely grade better than Very Fine. This extraordinary stamp is Extremely Fine and has unusually clean gum. It is certainly among the finest known examples of this classic commemorative error.

THE MAINE SAFE DEPOSIT BOX FIND

Every collector imagines discovering rare and valuable stamps in a remote spot, a flea market or dormant heirloom chest. The four stamps offered here are offered out of sequence, so that our consignor's discovery can be seen intact. Hidden in a safe deposit box in Maine were these four stamps: $2.00 and $5.00 Columbian and $1.00 and $2.00 Trans-Mississippi issues. Each stamp was contained in an envelope. Each is Mint Never Hinged, as fresh and pristine as the day it was sold at the post office. Obviously, someone who wanted perfectly centered stamps bought them, and we suspect that they were bought in 1893 and 1898 at a post office window. The buyer must have been a stamp enthusiast, if not a collector, because he picked the best-centered copies imaginable, and he never mounted them in an album. They were simply tucked away for more than a century. The Maine climate has been good to these stamps, and we doubt that any finer examples exist. It appears that the collector’s budget was exactly $10, and there is no doubt that his $10 was invested wisely in 1893 and 1898.

$2.00 Columbian (242). Brilliant Mint N.H., incredibly deep shade with color and paper as fresh as the day it was issued, perfectly centered with full perfs all around. EXTREMELY FINE GEM. THIS MINT NEVER HINGED EXAMPLE OF THE $2.00 COLUMBIAN COMES FROM THE MAINE SAFE DEPOSIT BOX FIND AND RANKS AMONG THE TWO OR THREE FINEST KNOWN.

Typically, when a collector is assembling an Extremely Fine, Mint Never Hinged set of Columbians, the scarcity-and-demand factor leaves the $2.00 space empty to the very end. It is simply one of the rarest stamps of the set in this condition. The Zoeilner collection sold by the Siegel firm had a lightly hinged stamp. The Weisman collection had a Mint N.H. stamp, but it was not centered, and the Lyons collection had a used $2.00 (both sold by Shreves). The Scott value of $3,000.00 for a Mint N.H. stamp (in Very Fine grade) does not begin to reflect the true rarity of such examples.

$5.00 Columbian (245). Pristine Mint N.H. state, perfectly centered with massive margins, evenly framing design, intense shade and proof-like impression on brilliant white paper, long full perforations. EXTREMELY FINE GEM, AS PERFECT AND FRESH AS THE DAY IT WAS PURCHASED AT THE POST OFFICE IN 1893. ARGUABLY THE FINEST MINT NEVER HINGED EXAMPLE OF THE $5.00 COLUMBIAN IN EXISTENCE.

We could not begin to count the number of $5.00 Columbian stamps sold by the Siegel firm over 70 years. However, the number of Extremely Fine, Mint Never Hinged, examples could probably be counted on two hands, and, if they were assembled for comparison, we seriously doubt if any could surpass (or match) the stamp offered here. This gem from the Maine Safe Deposit Box find must have been carefully selected from a sheet in 1893 and kept hidden from light, moisture and handling for the past 107 years.
260 ** $1.00 Trans-Mississippi (292). Mint N.H., intense shade and impression, remarkably bright paper and fresh
EXTREMELY FINE GEM. A MAGNIFICENT MINT NEVER HINGED EXAMPLE OF THE $1.00 TRANS-MISSISSIPPI.
The $1.00 Trans-Mississippi is considered by many to be the most beautiful of all United States postage stamps. Although Mint Never Hinged examples have been supplied from blocks and sheets broken over the years, the centering of this example is unusually choice. Again, the person who purchased it — probably direct from the post office — was careful to choose the best-centered stamp in the sheet. .......................... 2,250.00

261 ** $2.00 Trans-Mississippi (293). Mint N.H., remarkably wide margins framing the design with white, rich color and sharp proof-like impression, bright and fresh
EXTREMELY FINE. AN EXCEPTIONALLY CHOICE EXAMPLE OF ONE OF THE MOST DIFFICULT OF ALL COMMEMORATIVES TO OBTAIN IN THIS QUALITY. A TRUE CONDITION RARITY.
The last of the gems from the Maine Safe Deposit Box find is this $2.00 Trans-Mississippi, from the first commemorative issue printed by the Bureau of Engraving and Printing. It appears as though just ordered from a new-issue service. The color, paper and gum are brighter and fresher than we have ever seen. .......................... 3,750.00

EXTREMELY FINE GEM. AN OUTSTANDING EXAMPLE OF THE 8-CENT UNWATERMARKED BUREAU ISSUE.

The Unwatermarked 1894 Issue, the Bureau's first effort at perforating postage stamps, is notorious among collectors for poor centering. Every Rarities sale, we include a stamp that is far from rare in typical condition, but deserves Rarities status by virtue of its extraordinary quality. Here we have this year's Condition Rarity.

EXTREMELY FINE AND CHOICE. VERY RARE IN THIS QUALITY WITH ORIGINAL GUM. THIS EXAMPLE WITH ITS HUGE MARGINS REPRESENTS THE FINEST ATTAINABLE QUALITY.

The 1894 unwatermarked issue was the first U.S. stamp issue printed by the Bureau of Engraving & Printing. This issue is notoriously difficult to find well-centered, as production was marred by initial problems as the Bureau feverishly worked to satisfy the public demand for stamps. The $2.00 is one of the rarest of the set in this original-gum condition and choice grade.

EXTREMELY FINE GEM. A SUPERB EXAMPLE OF THE $5.00 UNWATERMARKED BUREAU ISSUE IN THE FINEST CONDITION OBTAINABLE. A BEAUTIFUL STAMP.

The two most difficult denominations of the 1894 Unwatermarked Bureau Issue to find in superb original-gum condition are the $1.00 Type II (Scott 261A), and the $5.00. The example offered here is among the finest we have encountered.

A VERY RARE BLOCK OF THE 1894 $5.00 UNWATERMARKED BUREAU ISSUE CONTAINING TWO VERY FINE-EXTREMELY FINE STAMPS AT RIGHT.

As stated in the previous description, the Bureau of Engraving and Printing initially struggled with gumming and perforating postage stamps. This block vividly demonstrates the Bureau's quality-control problems: the left pair is Fine with perfs close, the right pair is well-centered, with an Extremely Fine stamp at top right. ......................... 18,500.00

EXTREMELY FINE GEM. A SUPERB MINT NEVER HINGED EXAMPLE OF THE 50-CENT TRANS-MISSISSIPPI ISSUE.

The 50c Trans-Mississippi is extremely scarce in well-centered condition. It also seems that fewer 50c stamps exist in Mint N.H. condition, relative to the two dollar values of the set. The combination of Extremely Fine centering and Mint N.H. condition is exponentially rarer — not to mention the plate number selvage.

The 4c Pan-American Invert was a special printing and not regularly issued. If the reported numbers are correct, a total of 203 4c Inverts was released, both with and without the overprint. An unknown quantity of the 4c Pan-American invert was overprinted with a small "Specimen" overprint. Some examples, both with and without the overprint, were given away by Third Asst. Postmaster General Edwin C. Madden. When postal authorities learned of the practice, they destroyed 194 copies and put one pane of 100 into the official archives. At a later date, 97 of these were later traded for rarities missing from the archives.

288 ** 50¢ Orange (310). Mint N.H. top plate no. single, extraordinarily wide and well-balanced margins, vibrant color and pristine condition.

EXTREMELY FINE GEM. AN OUTSTANDING MINT NEVER HINGED EXAMPLE OF THE 50-CENT 1902 ISSUE WITH PLATE NUMBER SELVAGE.

The 1902-03 Regular Issue was a great improvement over the Bureau's first efforts in 1894 and 1895. Perforations tend to be cleaner, and centering better, but the large plate layout and perforating method still resulted in a large number of poorly centered stamps. Furthermore, stamps issued in choice condition seldom stayed that way, because the boom in stamp collecting that began with the Roosevelt administration caused hordes of hinge-bearing philatelists to mount stamps over and over again. For this reason, today's collectors have grown accustomed to paying many multiples of Scott value for Extremely Fine stamps in Mint Never Hinged state. Anyone who has pursued this set can testify that the 50¢ is rarely encountered in such condition. The 50¢ 1902 offered here probably ranks among the five highest-quality examples in existence.

Mass. city registry oval cancels, deep rich color, natural s.e. at left, five stamps with few trivial creases as one would expect on a used multiple of this size, rejoined along vertical row of perfs at center, perf separations reinforced between stamps — all to be expected in a used multiple of this size. VERY FINE APPEARANCE. THIS IS THE LARGEST KNOWN USED MULTIPLE FOR THE $2.00 1902 ISSUE.

EXTREMELY FINE GEM. A SUPERB MINT NEVER HINGED EXAMPLE OF THE $5.00 1902 ISSUE
IN THE FINEST ATTAINABLE QUALITY.
The $5.00 1902 is one of the rarest of all 20th Century regular issues in Mint Never
Hinged condition. Perhaps because collectors proudly hinged this dollar value in their
albums, very few stamps seem to have escaped such a fate. Only blocks — rarely well-
centered and also often hinged — have provided the few Mint Never Hinged stamps that
exist today. This remarkable stamp is easily one of the finest extant.

VERY FINE AND CHOICE. THE EARLIEST RECORDED USE OF A COMPLETE JAMESTOWN SET ON COVER, OF WHICH FOUR ARE KNOWN. A GREAT 20TH CENTURY COMMEMORATIVE RARITY.

R. C. Munroe serviced all four of the covers dated May 10, 1907, which were sent by registered mail to Springfield and have his written return address on the reverse. There is one cover known with a single 5c Jamestown and one 5c Lincoln (304) dated May 9 from Fortress Monroe Va. to Boston (the earliest use of the 5c). The four Munroe covers with complete sets are the second earliest use of the 5c and the earliest use of the complete set on cover.

The last time a Munroe cover appeared at public auction was Sept. 1997 when it realized $16,000 hammer. Prior to 1997, the last Munroe cover appeared at public auction in our 1981 Rarities sale, where it realized $9,000 hammer. ...................... E. 15,000-20,000

**EXTREMELY FINE GEM. ONE OF THE FINEST RECORDED EXAMPLES OF THE RARE 4-CENT BLUISH PAPER — ARGUABLY THE MOST DIFFICULT OF THE BLUISH PAPER ISSUE TO FIND IN SUCH PRISTINE CONDITION.**

A review of our Levi records of the Bluish Paper stamps shows that the 4c is much rarer than the 8c in well-centered condition. This stamp, with margins that would be impressive on a normal 4c, easily ranks among the two or three finest known.

15c Pale Ultramarine, Bluish (366). Mint Never Hinged, from the top right corner of the sheet with full 23mm selvage, the stamp itself is perfectly centered with long full perforations all around, rich color, remarkably fresh

EXTREMELY FINE GEM. AN EXTRAORDINARY STAMP — POST-OFFICE FRESH, PERFECTLY CENTERED, MINT NEVER HINGED AND WITH FULL CORNER SHEET MARGINS. IN OUR EXPERIENCE, THIS IS QUITE POSSIBLY THE FINEST-QUALITY BLUSH PAPER STAMP IN EXISTENCE.

The 4c and 8c stamps are correctly recognized as the rarest of the Bluish Paper issue, but they were never sold over the post office counter and used by the public. Of the values that were regularly issued, the 5c is the rarest, followed by the 13c, and then by the 15c, 10c, 6c and 3c (the 1c and 2c are common). If Mint Never Hinged stamps are isolated from the supply available to collectors, the rarity factors increase significantly for all of the values. The 15c is extremely rare in well-centered Mint N.H. condition, and the Scott premium for N.H. condition is significantly understated ($2,100 versus $1,350 for hinged).

This Mint Never Hinged stamp, with full corner sheet margins and perfect centering, is not just the finest 15c Bluish Paper example we can locate in our extensive records — it is, in our opinion, the finest single example of any of the higher-denomination Bluish Paper stamps. There is simply nothing that compares to it.

ORANGEBURG COIL

The Orangeburg coil was made by the Post Office Department in 1911 specifically for use by the Bell Pharmaceutical Company. The 3c coil stamps were used to send samples of their products to physicians. Due to the quantity of mail, they were put through the first-class cancelling machine at Orangeburg, New York. The Orangeburg coil stamps' use on third class mail and the fact that philatelists were generally unaware of their production account for their rarity today.

FRESH AND VERY FINE. AN OUTSTANDING EXAMPLE OF THE RARE 30-CENT PERF 10 ON UNWATERMARKED PAPER.

In an article in Philatelic Opinions V published by the Philatelic Foundation, William T. Crowe, head of the Expert Committee, discusses the discovery of this rare stamp and how it might have been issued. The production of Scott 476A occurred during the period of transition from gauge-10 perfs to gauge 11. Bureau records do not list a 30c printing on unwatermarked paper that was perforated 10, but the existence of two certified panes—one bottom-right pane from Plate 6917 and one top-right pane from Plate 6911—is evidence that the combination of new unwatermarked paper and old 10-gauge perfs occurred, even if inadvertently. Stamps from these two panes (200 total), two left sheet-margin blocks of four and a bottom plate no. 6914 single, none of which have any trace of watermark, are the only accepted examples of Scott 476A.

2c Carmine Rose, Ty. II, Rotary (539). Mint N.H., rich color and sharp impression, exceptionally well-centered

EXTREMELY FINE GEM. A SUPERB MINT NEVER-HINGED EXAMPLE OF THIS RARE ROTARY-PRESS PRINTING. AN EXCEEDINGLY DIFFICULT STAMP TO FIND IN SUCH CONDITION.

At the beginning or end of a coil-stamp print run from the 170-subject rotary plates, some leading or trailing paper was left over that was too short for rolling into 500-stamp rolls. In 1919, the Bureau devised a plan to salvage this waste by converting the stamps from coil stamps into sheet stamps. This was accomplished by cutting the sheets into panes and putting the panes through the flat-plate perforator in use at the time, giving the stamps perforations on all sides.

Since Scott 539 was put through two different perforating machines of differing gauges at different times, most of the stamps are off-center. The stamp offered here is a true condition rarity by virtue of its centering, margins and Mint N.H. state.

EXTREMELY FINE GEM. EASILY ONE OF THE FINEST OF THE FEW EXTANT MINT NEVER-HINGED EXAMPLES OF THIS MAJOR RARITY. PROBABLY FEWER THAN 20 ARE KNOWN IN ANY KIND OF UNUSED CONDITION.

A small quantity of 1c Rotary Press stamps was perforated 11 at the end of 1922, using remainder sheets from the earlier printings that were normally perforated in 10 gauge or 11/10 compound gauge. Its existence as a Perf 11 variety was discovered in 1936, and the stamp received its Scott catalogue listing in 1938. Most of the recorded copies of Scott 544 are off-center or have been damaged — the result of poor production standards and poor handling.

The Perf 10 variety occurs only on a few stamps in a sheet affected by the error. Depending on the direction in which the sheet was perforated, the horizontal or vertical perforations are affected.

1c Light Blue, Imperforate (563d). Vertical strip of three, large margins on three sides, in at bottom of bottom stamp, neat “San Francisco California” precancel, some slight wrinkling.

**VERY FINE AND EXCEEDINGLY RARE. THIS IS THE LARGER OF THE TWO KNOWN IMPERFORATE MULTIPLES. AN OUTSTANDING SHOWPIECE OF WHAT IS PROBABLY THE RAREST TWENTIETH CENTURY IMPERFORATE ERROR.**

In his book *United States Stamps 1922-26*, Gary Griffith outlines the history of the strip of three offered here and the horizontal pair, which are the only known examples of this variety (no singles are recorded). Both multiples bear the San Francisco precancel. The pair, ex Lilly, is almost completely separated by scissors and was discovered in 1923 or 1924 affixed to a package containing law books. Even in faulty condition, the pair realized $1,700 in 1968. The strip of three offered here was first discovered around 1982, and it is essentially sound (some wrinkles noted on certificate).

5c Blue, Horizontal Pair, Imperforate Vertically (586a). Inverted “Portland Oregon” precancel, wide margins at sides showing that the pair was imperforate vertically (not just between the stamps), deep rich color, left stamp thin spot and small tear at top left

**VERY FINE APPEARANCE. THIS IS THE UNIQUE LISTING PAIR OF THE 5-CENT ROOSEVELT IMPERFORATE VERTICALLY. A GREAT 20TH CENTURY RARITY.**

In his book *United States Stamps 1922-26*, Gary Griffith gives us what little information is known about this pair. Griffith states that the pair was first documented in 1935, and that Johl notes that one pair is known. The Scott Catalogue first listed the variety in 1936. The current Scott Catalogue lists the item as “Horizontal Pair, Imperforate Between” and does not give a catalogue value. The catalogue listing should be amended to read “Horizontal Pair, Imperforate Vertically”.

**EXTREMELY FINE. SOUND COPIES OF THE 1923 ROTARY PERF 11 ISSUE RARE, AND ONLY A FEW HAVE THE CENTERING AND MARGINS OF THIS SUPERB STAMP.**

The 1c Green, Scott 594, is waste from a horizontal rotary printing used to make coils. At the beginning or end of a coil-stamp print run from the 170-subject rotary plates, some leading or trailing paper was produced that was too short for rolling into 500-stamp rolls. In 1919 the Bureau devised a plan to salvage this waste by perforating and cutting the sheets into panes. They were put through the flat-plate perforator in use at the time, giving the sheets full perforations on all sides. In 1923 coil waste from the new 1c and 2c rotary production was turned into stamps later classified as Scott 578-579 and 594-595. These were the last of the coil-waste issues. Fewer than 100 survive of Scott 594 today.

1c Green, Rotary Perf 11 (596). Bold "Kansas City Mo." Bureau precancel, dark shade and rich color, fine impression, well-centered for this difficult stamp with perfs clear all around.

VERY FINE AND CHOICE SOUND COPY OF SCOTT 596. AMONG THE FINEST OF THE TWELVE RECORDED EXAMPLES, OF WHICH ONLY SEVEN ARE SOUND. ONE OF THE GREAT RARITIES OF 20TH CENTURY UNITED STATES PHILATELY.

The Rotary Perf 11 rarities (Scott 544, 594, 596 and 613) were created during an attempt by the Bureau of Engraving and Printing to salvage waste from the end of the paper during rotary press printings. The rotary press, first used for printing coil stamps in 1915, was a new printing method designed for rapid production. Rather than print stamps on a flat plate one sheet at a time, the rotary press was fitted with a cylindrical plate that continually applied impressions to long rolls of paper.

Rotary press stamps have dimensions that differ slightly from their flat plate counterparts, due to the curvature of the cylinder. If the plate is wrapped around the cylinder from top to bottom (endwise) then the design is slightly longer; if wrapped around from side to side (sidewise) then the design is slightly wider.

At the beginning or end of rotary press printings, there is some leading or trailing paper that is too short for either rolling into coil rolls, or for perforating for 400-subject plates. In 1919, the Bureau devised a plan to salvage this waste by perforating and cutting the sheets into panes. These were put through the flat-plate perforating machine in use at the time, giving the stamps full perforations on all sides.

Scott 596 is waste from a vertical rotary press printing used to make sheet stamps — a fact proven by the existence of precancelled copies such as the example offered here.

Our updated census of Scott 596 published in our Zoellner sale (and available at our web site at: http://siegelauctions.com/enc/census/596/596.htm) records twelve used stamps. Of these, seven are precancelled at Kansas City Mo. There are no known unused examples.

2c Harding, Perf 11 (610). Three First Day covers with George W. Linn cachet, each different sizes (Sizes IIa, IIla and IIlb), all with "In Memorium, Warren G. Harding Twenty-Ninth President, Born Nov. 2, 1865, Died Aug. 2, 1923" at lower left, and "Marion Ohio Sep. 1, 1923" postmark, different thicknesses of mourning borders, Fine-Very Fine group of scarce Linn's cacheted Harding covers, widely recognized as the first cacheted First Day Covers, Planty's Photo Encyclopedia of Cacheted F.D.C.'s states that "All complete classic collections [of FDC's] should start with this cover" — a set of four realized $2,400 hammer in last year's Rarities sale. ................. E. 1,500-2,000

2c Harding, Perf 11 (610). Six uncacheted First Day covers comprising: two from Marion O.; two from Caledonia O.; one from Bucyrus O.; last from Brooklyn N.Y., Very Fine and extremely rare group. The first five were prepared by William G. Windhurst, who owned and operated the Waldorf Pharmacy across the street from the Marion post office where the Harding stamps were sold. There are seven different types of Windhurst covers known, five of which are represented here. They are differentiated by the postmark city, presence of pharmacy imprint, address and pharmacy advertisement. This is a wonderful opportunity for the Harding collector to acquire the rare Windhurst first day covers of which only a few are known. This is the first time they have been offered as a group at public auction. ............................................. E. 3,000-4,000

2c Harding, Perf 11 (610). Complete set of seven different uncacheted unofficial First Day covers from the Ohio towns of Dublin, Columbus, Delaware, Linworth, Powell, Waldo and Worthington, the Columbus has natural s.e. at left, all prepared by George W. Linn, five addressed to him in Columbus O., other two also addressed to Columbus, fresh and Very Fine, mailed by Linn on his way home after sending some first day covers at Marion, the official city of issue, a similar group realized $1,600 in last year's Rarities sale. ............................................. E. 1,500-2,000
342° 2c Harding, Rotary Perf 11 (613). Incredibly well-centered, sharp impression, light wavy-line machine cancel, insignificant faint corner crease at top left not mentioned on accompanying certificate.

EXTREMELY FINE CENTERING AND VIRTUALLY PERFECT CONDITION. AMONG THE TOP FIVE OF THE 43 2-CENT HARDING ROTARY PERF 11 STAMPS RECORDED IN OUR CENSUS.

The 2c Harding Rotary Perf 11 stamp was discovered in 1938 by Leslie Lewis of the New York firm, Stanley Gibbons Inc. The Weills found three additional singles among unsorted 2c stamps soaked off envelopes.

Gary Griffith presents his hypothesis in United States Stamps 1922-26 that rotary-printed sheets of 400 were first reduced to panes of 100 and then fed through the 11-gauge perforating machine normally used for flat plate sheets. This method distinguishes sheet-waste stamps — Scott 544, 596 and 613 — from the coil-waste stamps and explains the existence of a straight-edge on Scott 613.

Our census of the 2c Harding Rotary Perf 11 stamp (as published in our Zoellner sale and available at our web site at: http://siegelauctions.com/enc/census/613/613.htm) records 39 used singles (one faintly cancelled, if at all) and two used pairs. Of the singles, 22 are sound, but of these only five rate a grading of Very Fine or Extremely Fine. The stamp offered here certainly ranks in the top five in centering and, in our opinion, in the top ten in desirability.

EXTREMELY FINE AND CHOICE. A PRISTINE EXAMPLE OF THIS POPULAR MODERN ERROR.

Popularly called the "C.I.A. Invert", a single pane of 100 stamps was purchased at a the McLean Va. Post Office by employees of the C.I.A., for use on mail from the agency. After using five stamps, they noticed the error, pooled together funds to buy a replacement sheet and kept the rest of the pane for themselves. When it was discovered who had purchased the stamps, a scandal ensued over who actually owned the stamps. .................... 14,500.00

EXEMPLARY FINE. ONE OF THE WIDEST-MARGINED AND FRESHEST EXAMPLES OF THE FAMOUS INVERTED JENNY.

According to *Jenny* by George Amick (Amos Press, 1986), the original sheet of 100 inverted "Jenny" stamps was purchased by William T. Robey on May 14, 1918, one day after the stamp was placed on sale. Robey bought the sheet at the New York Avenue Post Office window in Washington, D.C. Soon after, the sheet was sold to Col. Edward H. R. Green through Eugene Klein, a Philadelphia stamp dealer. Green paid $20,000 for the sheet, then instructed Klein to divide it into singles and blocks, and to sell all but a few key position blocks.

It is well known among stamp specialists and professionals that examples of this stamp come in different grades of freshness and condition. Many of the original 100 stamps were mistreated by collectors during the years, despite the stamps' rarity and value. Colonel Green himself allowed moisture to affect some of the stamps he retained. Other examples have become slightly toned from improper storage and climatic conditions. Hinging has caused thins and creases in numerous stamps, and at least seven have been "lost" to philately — or nearly so as in the case of the copy swept up in a vacuum cleaner.

This stamp is in an extraordinary state of freshness, with excellent color and brightness. .......................... 150,000.00
THE McCoy INVERTED JENNY

24c Carmine Rose & Blue, Center Inverted (C3a). Position 75, original gum, deep rich colors, small tear at left, some thinning, a few perfs at top right blunted

EXTREMELY FINE APPEARANCE. THIS IS THE LOWER LEFT STAMP FROM THE FAMOUS McCoy BLOCK. A WONDERFUL STAMP WITH A FASCINATING STORY.

The Inverted Jenny offered here was originally the lower left stamp in the famous McCoy block. The block was once owned by Arthur Hind, and sold at the 1933 auction of his stamps to Scott Stamp & Coin Co. It was then sold in 1936 by Spencer Anderson to Ethel B. Stewart (later Ethel McCoy). Early in the morning on September 23, 1955, at the APS annual convention in Norfolk Va., a thief broke into a protective case housing the block of four of the Inverted Jenny that belonged to Ethel B. McCoy. A scrap of mounting paper and the blank album page were all that remained in the exhibit frame when the theft was noticed. The block would never be found intact.

Three years later, the position offered here, the lower left stamp of the block, was offered by a Chicago dealer to the Weills of New Orleans. Recognizing the stamp as part of the stolen McCoy block, the Weills notified the FBI, but the single stamp's value fell below the minimum necessary for the law-enforcement agency's involvement. With no other option, the Weills returned the stamp to the dealer, who claimed that he bought it prior to the 1955 theft.

The stamp resurfaced briefly in 1970 and then again in 1977, when the Philatelic Foundation positively identified it as Position 75 from the McCoy block. By then, it was of sufficient value to warrant an FBI investigation. After its recovery and a protracted custody battle, the stamp was donated by Mrs. McCoy to the American Philatelic Research Library and was sold on their behalf in 1981, realizing $115,000. Only one other stamp (Position 65) has been recovered since the 1955 theft.

Uncancelled, margins mostly clear of ornaments, slightly creased with minor surface disturbances, mounted on paper with notation "Ferrary Sale June 18/24". Very Fine. One of the rarest of all local post stamps — perhaps three or four genuine examples exist.

Researchers have argued over the origins of this post, but the best evidence available indicates that it was run briefly in 1856 as American Express Co. (no relation to the well-known firm by the same name) by proprietors Smith and Dobson, and was changed to Smith's City Express Post after Dobson departed. Large margins, gum stain, uncanceled as usual, used on brown cover to local street address, pencil "WB—Deliver this without fail this day. Dean" and "Paid Bouton" printed in identical pencil, with Mar. 1, 1848, letter enclosure, couple minor stains in cover

Very fine. One of seven or eight reported examples of Bouton's Manhattan Express stamp. Only four covers are known.

The Manhattan Express was operated by William V. Barr as early as October 1845 until sometime soon after Valentine's Day 1847, when Barr sold out to John R. Bouton. The first stamp issued under Bouton's ownership is the 2c on Pink (17L1). Approximately seven or eight examples are known, uncanceled, including four used on covers.

Brady & Co., New York N.Y., 1c Red on Yellow (22L1). Large margins on three sides, clear at top, tied on piece by blue "Brady & Co. City Despatch Post, 97 Duane St." oval handstamp, Very Fine and extremely rare example of this local stamp. The original Clark & Co. local post is reported by Sloane to have started in early 1857; it used stamps of the same letter-box design with the "Clark & Co." label. In the summer of 1857, the post was sold to Abner S. Brady, who is known to have had financial trouble maintaining the operation. This information comes from a letter written by Brady, in which he states "I am not making anything yet in the business..." (Aug. 13, 1857 letter quoted by Sloane in Stamps, Mar. 9, 1935). VERY FINE. ONLY SEVEN EXAMPLES OF THE NEWARK CITY LETTER EXPRESS ONE-CENT STAMP ARE KNOWN ON COVERS. ONE OF THE RAREST LOCALS.

The Newark Daily Advertiser carried daily advertisements for Peck & Company's City Letter Express from June 12 through September 29, 1856. Augustus L. Peck's partner in the City News Office was R. Jaques, and their office was located at 324 Broad Street. The City Letter Express provided letter delivery to the mails (1c) and within the city (2c). Their competitor, Rogers' Penny Post, only carried letters to the post office. Peck's advertisements also solicited package-express business, which may have been on behalf of the New Jersey Express Company, which had its business in Newark during the same period (reference: Elliott Perry, Pat Paragraphs, reprint, pp. 405-408).

Our records contain just seven examples of the 45L1 stamp on cover, including six dated in late 1856 or this February 1857 cover. The City Letter Express stamps were usually left uncancelled, but three covers have Newark datestamps tying the local. One of the tied examples realized $15,500 hammer in our November 1999 Golden sale.

**VERY FINE APPEARANCE. ONLY TEN EXAMPLES OF FLOYD’S GREEN STAMP ARE KNOWN TO US, AND OF THESE ONLY TWO HAVE ORIGINAL GUM.**

John R. Floyd advertised the start of his Penny Post in July 1860. In June 1861, after the outbreak of the Civil War, Floyd sold the firm to Charles W. Mappa, but continued to assist in managing the post for several months before leaving for war in January 1862. Mappa in turn sold out to Kimball & Waterman in May 1862, and the post continued at least until November 1862 and then closed.

The Brown and Blue stamps were the first issued, and the Blue continued to be issued from 1860 through 1862. The Green stamps are known used only in October and November 1862, thus they appear to be the last printing, probably by Kimball & Waterman before the post was closed. The Blue is the most common, and the Brown is extremely scarce. The Green is by far the rarest, with only two recorded covers, five or six used stamps off cover, and three unused stamps (two with original gum) known to us. *Freeman & Co.’s Express, (unstated value) Blue, “To be dropped in New-York Post-Office” (164L1).* Margins clear to slightly in, faint toning, minor faults

ONE OF THREE OR FOUR KNOWN EXAMPLES OF THE FREEMAN & CO. EXPRESS STAMP. A MAJOR RARITY OF THE TRANSCONTINENTAL EXPRESSES.

John H. Freeman was a prominent California expressman. In 1851 he sold his business to Adams & Co. and became their agent in Sacramento and Panama. Soon after the collapse of Adams in 1855, Freeman established Freeman & Co.’s Express, and his business grew until November 1859, when he stopped service after selling out to Wells, Fargo & Co.

The Freeman & Co. “To be dropped in New-York Post-Office” blue stamp is identical — except for the company name — to Wells, Fargo & Co.‘s Black stamp, listed as Scott 143LP1. It is likely that Freeman & Co. started the service not long before selling out in 1859. Freeman would carry letters outside the mails from California to New York and deposit them (with or without U.S. postage) into the post office. Wells, Fargo & Co. adopted the same stamp design in 1860. The “Dropped” stamps of Freeman or Wells Fargo are extremely rare, and it seems that they were not used extensively. Of the Freeman & Co. stamp, there are two confirmed off-cover examples (and a possible third) and one genuine cover.

412* ★ Jefferson Market P.O., New York N.Y., (2c) Black on Pink Glazed (88L1). Unused (no gum), three full to large margins, slightly in at top, creased and usual cracks in surface coating FINE APPEARANCE. ONLY FOUR EXAMPLES OF THE JEFFERSON MARKET STAMP ON PINK PAPER ARE RECORDED. AN OUTSTANDING NEW YORK CITY LOCAL ISSUE.

The Jefferson Market P.O. was not officially connected to the New York Post Office, but used the "Post Office" designation in its name, much like Swarts and other contemporaries. The post is believed to have been operated by Godfrey Schmidt, who was listed in the 1850-51 city directory as Godfrey Smith at 6 Greenwich Avenue (source: Elliott Perry). In addition to the stamps issued by the Jefferson Market P.O., a stampless cover was reported by Thomas C. Mazza in The Penny Post (Jan. 1995). The stampless folded letter is addressed to Sing Sing N.Y. and bears a clear strike of a large Eagle-type frame containing "Jefferson Market Post Office/By G. SCHMIDT & CO." in two lines. It also has a red New York Jun. 30 datestamp, and the letter is year-dated 1850. One of the recorded 88L2 covers is clearly dated Apr. 15, 1851, which establishes at least a ten-month existence for the post, corresponding to the city directory listing for Godfrey Schmidt (Smith).

Our records contain four examples of 88L1 (Pink paper), all uncancelled off cover, and four of 88L2 (Blue paper), used on separate covers. We list all of the 88L1's here: 1) unused, surface cracks, ex Caspary, Boker, Lilly, Golden (realized $7,500 hammer); 2) unused, surface cracks, ex Abt, Golden (realized $3,750 hammer); 3) unused, surface cracks, ex Caspary (on cover, did not originate), Middendorf (on piece); and 4) unused, creases, surface cracks, the stamp offered here.

VERY FINE APPEARANCE. A VERY RARE TIED EXAMPLE OF THE NEW YORK CITY EXPRESS POST GREEN STAMP. THE ONLY NEW YORK CITY EXPRESS POST COVER WITH A HUDSON RIVER ROUTE AGENT’S MARKING.

The great similarity between this issue and the Boyd’s Eagle series can mislead collectors into thinking that 111L1 is common. The New York City Express Post stamp is far rarer, with about fifteen covers known in total, for both the Black on Green and Orange on White stamps. All are to-the-mails usages, and about half are tied.

VERY FINE. THE ONLY RECORDED EXAMPLE OF ANY PIPS DAILY MAIL STAMP WITH A CANCELLATION. AN OUTSTANDING LOCAL-POST RARITY.

Very little is known about Pips Daily Mail, but the stamp itself identifies George Abrahams, Stationer, as the proprietor at 86 Hamilton Avenue in South Brooklyn. The stamps come on five varieties of paper, and, although not rare unused, the cancelled example offered here is the only Pips Daily Mail stamp known used. The double-circle datetamp is typical of the style used in New York City in 1862 and 1863, when the post is reported to have operated.

Robison & Co., Brooklyn N.Y., 1c Black on Blue (128L1). Ample to large margins, some faint soiling, but no evidence of cancellation.

VERY FINE. ONE OF OF THE FINEST OF THE SEVEN REPORTED OFF-COVER EXAMPLES OF ROBISON & CO.'S LOCAL-POST STAMP.

Robison & Co. was a relatively small local post in Brooklyn, New York. Elliott Perry located three Robisons in the city directory listings who were in the express business: Cornelius D. Robison at 140 Chambers, 1857-58; Francis Robison at 707 Greenwich, 1857-58; and William Robison at 64 Cedar, 1852-53. It is not known which, if any, of these men was the proprietor.

The most famous example of the Robison & Co. local-post stamp is the one tied on cover to Jas. H. Watson, 231 Henry Street in Brooklyn. The cover was discovered circa 1895 by F. E. Kneeland Jr., a Brooklyn teen-aged boy who found it while searching through a relative's papers. It passed to Ferrary, then to Caspary, and was later to become one of the cornerstones of the Boker collection. Other examples of Robison & Co.'s stamp must have been discovered in the 1860's, because catalogues published in 1864 and 1865 contain listings for a Robison & Co. post.

Our records contain eight examples of 128L1, including seven off cover and the one on cover. Five of the off-cover stamps are known to have small faults. The stamp offered here and possibly one other (shown in Sloane's records) are the two finest of the group.

EXEMPLARY FINE STAMP AND COVER. ONLY FOUR YELLOW THIRD AVENUE POST COVERS ARE KNOWN TO US.

The origin of the Third Avenue Post Office was reported in 1872 by W. Dudley Atlee in Vol. X of the Stamp Collectors Magazine, and Atlee's account was quoted in Charles H. Coster's article in the August 1874 American Journal of Philately. It reads, in part: "According to Mrs. S. Allan Taylor, this post was established in 1855 or 1856, by one S. Rothenheim, carrier for Boyd's post. The stamps he made himself, with a handstamp of either brass or metal. He afterwards gummed and trimmed them carefully, and put them up in pill boxes for sale, on the principle that they got lost and destroyed better that way, and more were the sooner asked for. Street letter boxes being generally kept at groceries, the usual place for the stamps was the till or cash drawer, where they got greatly tossed about, and being separate, small and gummed, they were easily destroyed..." Dated covers corroborate the existence of the post in 1855 and 1856. Elliott Perry located four city directory listings for S. Rothenheim (Simon and Simeon), including a letter carrier named Simeon residing at 121 W. 28th Street in 1855, but none in proximity to Third Avenue.

VERY FINE. AN EXCEEDINGLY RARE ST. JOSEPH “RUNNING PONY” COVER FREE FRANKED BY THE MOST COLORFUL OF THE FOUNDERS OF THE PONY EXPRESS.

The Pony Express began its inaugural trip on April 3, 1860, under the ownership of the Central Overland and Pike’s Peak Express Company. The three founders were William H. Russell, Alexander Majors and William B. Waddell. The Pony Express was absorbed by Wells, Fargo & Co. in April 1861 after failing to secure a government contract at the beginning of the Civil War due to a variety of circumstances, including Russell’s often reckless behavior (see following lot). .................................................. £ 15,000-20,000
Pony Express. Letter datelined "Washington D.C March 3rd 1861", written entirely in W. H. Russell's hand and signed by him, with important contents: "the Poney Must Go. Spair neither Horses Money or Human Beings. Have the trail open at South Pass & through the Wasatch Mountains if we succeed it means a Daily mail across the Continent Jim it must go. Yours Respectfully, W. H. Russell", some staining spots and two folds

AN IMPORTANT HISTORICAL LETTER WRITTEN BY WILLIAM H. RUSSELL, A FOUNDER OF THE PONY EXPRESS, ONE MONTH BEFORE OWNERSHIP OF THE PONY EXPRESS PASSED INTO THE HANDS OF WELLS, FARGO AND COMPANY.

The Pony Express was absorbed by Wells, Fargo & Co. in April of 1861 (Russell was forced to resign on April 26, 1861). The letter offered here, written from Washington D.C. on March 3, 1861, clearly illustrates Russell's desperation in his attempts to secure a government contract. By 1861, the Central Overland and Pike's Peak Express Company, which ran the Pony Express, was hemorrhaging money. Early in 1861, Russell was implicated in a financial scandal that doomed him (see Coburn's Letters of Gold, pp. 257-258).

As part of the settlement, Russell agreed to return bonds that had been advanced against services never performed. The due date for his return of the bonds was March 4, 1861, the date Lincoln assumed his presidency and the day after this letter was written.

The cover offered in the previous lot is addressed to the same recipient; however, the letter was written months after the cover was carried. ...................... E. 3,000-4,000

EXTREMELY FINE APPEARANCE. THE DISCOVERY EXAMPLE OF A NESBITT IMPRINT ON THE FAMOUS PONY EXPRESS "GARTER" STAMP, HERETOFORE BELIEVED TO HAVE BEEN PRINTED IN SAN FRANCISCO AND NOW KNOWN TO BE THE PRODUCT OF GEORGE F. NESBITT & CO., THE PROMINENT NEW YORK PRINTER WHO PRODUCED THE NESBITT SERIES OF U.S. POSTAL STATIONERY.

This remarkable stamp recently came to light in England and is offered for the first time. The Wells, Fargo & Co. stamp, known to collectors as the Garter issue, is known used on westbound transcontinental covers carried by the Pony Express. It has always been assumed that the stamp was printed by Britton and Rey, the San Francisco printers who produced the famous Pony Express issues. However, with this discovery of an imprint example, the true identity of the printer is now known. The stamp was created for use on mail originating from the east coast, thus it makes perfect sense that the New York City office of Wells, Fargo & Co. should make arrangements with one of the city’s prominent stamp and stationery printers for the production of the Garter issue.

Goliad Tex., 5c Black on Dark Blue Glazed (29X8). Repaired with blue surface color painted in at upper right, pen stroke cancel, tied by "Goliad Tex." circular datetamp on small cover to Columbia Tex., pencil "Missent" and "Columbus Texas Feb. 23" (ca. 1864-65) circular datetamp, an additional stamp removed, large tear sealed with tape, soiled and other minor faults.

THE UNIQUE GOLIAD 5-CENT PROVISIONAL ON DARK BLUE PAPER — ONE OF FIVE RECORDED 5-CENT TYPE II GOLIAD PROVISIONALS AND THE ONLY EXAMPLE KNOWN ON COVER. ONE OF THE RAREST STAMPS IN THE WORLD.

The Goliad provisional stamps were printed by Rev. A. M. Cox and issued by the postmaster, J. A. Clarke, whose name is included in the Type II stamps. It is our theory that the Type I stamps with the postmaster's signature control mark were issued in 1861-62, and the Type II stamp were issued in 1863. The 5c Type II stamps were unnecessary after June 30, 1862, because the rate was increased to 10c. However, they were printed and used, as evidenced by surviving stamps and covers.

Our records contain four examples of 29X6 (5c Black on Gray) and one 29X8 (5c Black on Dark Blue). The 29X6 stamps are listed for the record: 1) pair with one stamp showing the "GOLLAD" error, ex Caspary; 3) pen cancel, 1998 Rarities sale; and 4) pen cancel, small fault at lower left, ex Hessel. The 5c Black on Gray is not known on cover. Of 29X8, the 5c Black on Dark Blue paper, there is only this stamp on cover. The stamp removed from the cover has never been recorded and is probably destroyed. Only three 10c Black on Dark Blue (29X9) stamps are recorded, two off cover and one on piece. Therefore, the item offered here also represents the only on-cover example of either Dark Blue stamp.

Unused, full margins with framelines all around, beautiful rich colors and clear impressions, affixed to square piece of paper cut from the diary of the Lenoir postmaster's son, assistant and creator of the provisional stamp, G. W. F. Harper, the slip is dated September 19, 1861 — the date of issue — and attached to a signed and notarized statement by G. W. F. Harper, attesting to the origin of the stamp and diary entry, dated August 11, 1887, the statement reads (in part): "that he retained and pasted in his Diary at the time, the first good impression made from the die, that he had said Diary and the stamp attached in his possession since Sept 19, 1861 ..", some negligible splits along folds in document

EXTREMELY FINE. A REMARKABLE TESTIMONIAL FROM G. W. F. HARPER, WHO CARVED THE WOODCUT DEVICE USED TO PRINT THE LENOIR PROVISIONAL STAMP. ONE OF THE MOST SIGNIFICANT LENOIR ITEMS EXTANT.

Based on sworn testimony from James Harper and his son, G. W. F. Harper, the Lenoir provisional was impressed from a pear-wood device carved by Postmaster Harper's son and used on September 19, 1861 (see Crown book, pp. 172-178, 651-652). Approximately 29 covers bearing the Lenoir adhesive stamp are known. The same woodcut device was applied directly to envelopes, as evidenced by an entire and cut square. We know of two notarized documents from James Harper, the postmaster, with stamps affixed, in addition to this document from his son, the actual creator of the stamp.

The Limestone Springs provisionals were reported by A. Earl Weatherly in 1954. The five known covers come from the Dean correspondence, although this cover is addressed to Lucy E. Simpson (in the handwriting of Lizzie Dean), rather than Corporal Edward J. Dean. Two of the covers bear single circular die-cut stamps. Two covers bear two rectangular-cut singles each, paying the 10c rate. The fifth cover is the single rectangular-cut franking offered here. No other examples of this stamp, on or off cover, have been reported.

MADISON COURT HOUSE, FLORIDA, PROVISIONALS

Between the time that each state seceded from the Union and the June 1st commencement date of the Confederate postal system, postmasters in the South were still obligated to report to the United States Post Office Department. Instructions from Postmaster General John H. Reagan specifically ordered Southern postmasters to "continue the performance of their duties as such, and render all accounts and pay all moneys to the order of the Government of the U.S. as they have heretofore done, until the Government of the Confederate States shall be prepared to assume control of its postal affairs."

Reagan also recognized the difficulties postmasters would experience in securing postage stamps during this interim period and decided "to leave it to postmasters and persons paying postage to arrange between themselves the manner in which these notes may be used." In effect, Reagan authorized postmasters to issue provisional postage until Confederate stamps were supplied, although provisional postage was specifically banned by the Federal government. Nonetheless, postmasters who knew they would soon be reporting to the Confederate government could be expected to improvise as they deemed necessary, especially when U.S. postal officials were unwilling to send supplies of stamps or stationery.

Prior to June 1, 1861, postmasters' provisionals would necessarily be rated 3c, the basic United States letter postage. The Scott Catalogue lists 3c 1861 Postmasters' Provisional adhesive stamps for Hillsboro N.C., Madison Court House Fla. and Nashville Tenn. (the Nashville 3c stamp was never issued). Scott also lists handstamped envelopes for Jackson Miss., Selma Ala. and Tuscumbia Ala. (the Tuscumbia was formerly listed as 12XU1 in the U.S. provisionals section of the catalogue).

The Madison 3c provisionals were issued by Postmaster Samuel J. Perry only days after the Confederate States were formed at Montgomery, Alabama, on February 4, 1861. The earliest recorded use of the Madison provisional is dated February 13, 1861, by an enclosure (see lot 439). One of the off-cover stamps is cancelled by a February 21 (1861) Madison circular datestamp. These are the earliest postmasters' provisionals issued in the Confederacy. Postmaster Perry issued the printed 5c entire sometime later (see lot 442).

Through testimony and contemporary source material, the Madison provisionals have been thoroughly documented and authenticated. The 3c was first reported by John W. Scott, who discovered the "CNETS" error in 1872. Scott described the Madison stamp as "the first issued, best authenticated and scarcest Confederate provisional." The Madison 5c entire was found by C. H. Mekel in 1895. In recent years, extensive research by Patricia A. Kaufmann has consolidated an enormous volume of information about the stamps, the postmaster and the unusual nature of these rarities. A brief excerpt of information provided in her two definitive articles follows (reference: "U.S. 3-Cent 1861 Postmaster Provisionals Used in the Confederacy", The American Philatelist, November 1984, and "The Madison, Florida, Postmaster Provisionals; Anatomy of a Postal History Research Project", The American Philatelist, February 2000).

Postmaster Perry had his stamps printed at the offices of The Southern Messenger, the newspaper published by his eldest son, William. Soon after the stamps appeared, they were reported in The New York Herald under the headline "The Postmaster at Madison Fla has offered P Office Stamps contrary to Law", which prompted an investigation by the United States postal inspectors. Perry was cleared of any wrongdoing, and he ended his tenure as a Federal appointee by filing all returns and remitting all money owed to the U.S. government.

To date there are four off-cover and one on-cover examples of the 3c stamp, Scott 3AX1: 1) town circular datestamp dated Feb. 21 (1861), ex Philbrick, Avery, Ferrary, Lapham and Moody, offered as lot 440 in this sale; 2) town circular datestamp, formerly owned by the Wells; 3) ms. "(Paid in (Money) cancel, ex Ferrary, Moody; 4) pen stroke cancel, Piller inventory (stamp stolen and recovered); and 5) used on cover, cancelled by "Paid" in oval, ex Avery, Ferrary, Duveen, Hind, Casparry. There is one recorded example of the 5c "CNETS" error (Scott 3AX1a), with a town datestamp, ex Philbrick, Ferrary, Duveen, Lapham, Moody and offered as lot 441 in this sale. There is one 5c Confederate-rate entire, ex Ferrary, Lapham and Moody, offered as lot 442 in this sale.

Without question this is the most significant offering of the Madison postmasters' provisional made at auction since the Ferrary sale. We are grateful to Patricia A. Kaufmann for her permission to quote from her research in this catalogue.

Marion Va., 10c Black, Horizontal Lines Printed Across Stamp (55X2 variety). Three huge margins, clear margin at bottom, black ruled lines printed on front and back, tied by “Marion Va. Jan. 21” (1863) circular datestamp on address portion of a folded letter to “Mr. W. R. Hunter; (Children’s friend), Franklinton N.C.”, the panel has been cut out and pasted on the back of the letter, which is dated “Marion Va. Jan. 20th 1863”, the writer is enclosing $10 as a contribution to the Methodist Sunday School, it reads (in part) “Pray for the Children, while you labour for the Soldiers”.

VERY FINE STAMP AND ATTRACTIVE PIECE. ONE OF TEN OR ELEVEN EXAMPLES OF THE MARION POSTMASTER’S 10-CENT PROVISIONAL STAMP. THIS IS THE FIRST 10-CENT STAMP SEEN WITH RULED LINES.

The Marion Va. 5c and 10c provisional stamps, with their distinctive “Check” label at top, were issued by Postmaster J. H. Francis, beginning in 1861 and continuing through 1863. The stamps were printed in two steps: first, the typeset form containing the border and words “P. Office, Marion, Va., Check. Paid” was impressed; then the value, “5” or “10” was handstamped on the blank center. Postmaster Francis described his stamps in a January 1880 letter to August Dietz, and he offered to make more from the “die” which he still possessed. Various “reprints” made from the typeset form were made by John W. Scott, including 2c, 15c and 20c values that have never been seen genuinely used.

This piece was recently discovered in a scrap book kept during the 1850-70 period by W. R. Hunter, “The Children’s Friend”. With the discovery of this essentially complete cover front, our records now contain seven covers with the Marion 10c provisional, plus a repaired stamp affixed to the back of a cover noted in the Crown book as part of the Worthington collection. There are two unused stamps and perhaps one or two off-cover stamps extant. Of the seven known covers, one is part of the Tapling collection at the British Library (a sound example dated Oct. 15, 1861), two have stamps with a significant portion of the design cut away (dated Oct. 25 and Nov. 16, 1861), and one has the bottom right corner of the stamp repaired (dated Sep. 24, 1861, ex Caspary). Therefore, there remain only three covers available to collectors in essentially sound condition: the ex-Hessel cover (dated Nov. 18, 1861, with repairs to the cover), the Mar. 2 cover (1862 or 1863) in our Sale 810, which realized $62,500 hammer, and this new discovery.

The stamp on this letter has two black lines printed horizontally across the front and back. The numeral “10”, which was handstamped separately, is aligned with the rules, which leads to speculation that the postmaster used the ruled paper deliberately. The late date of this usage also suggests that the Marion postmaster was not adequately supplied with stamps; another possibility is that the sender was thrifty and used an old provisional stamp still on hand. The Marion 10c cover in our Sale 810, dated March 2, was assumed to be a March 2, 1862, usage during the 5c/10c rate period. However, it is addressed to Kingston Tenn., which is within the 300-mile limit for the 5c rate. Therefore, it is either a double 5c rate for weight or a March 1863 usage after the rate increase to 10c for any distance. The 1863 usage becomes a possibility with the discovery of the January 1863 usage offered here.

R.M.S. Titanic. Tuck’s Post Card featuring multicolored illustration of the Titanic on one side, other side describes some particulars of the Titanic including displacement, etc., bearing two Great Britain ½p George V stamps tied by two strikes of "Transatlantic Post Office 7 AP 10" (Apr. 10, 1910) datestamps and addressed to "Miss Gwen, Patch Park, Lambourne, Nr. Romford, Essex, England", postcard reads “Dearest Pretty, I know you would like a pc of the boat. Have a nice chum in my cabin. Will write around the 10th. Sorry I forgot it. I did it leaving my one true. Love yours ever, Ugly”, some slight edge wear and card creases

VERY FINE. AN EXCEEDINGLY RARE POSTCARD MAILED FROM ABOARD THE R.M.S. TITANIC BEFORE THE ILL-FATED LAST LEG OF ITS VOYAGE.

The R.M.S. Titanic embarked on its maiden voyage from Southampton, England, on April 10, 1910 at 12:15 p.m. The vessel docked at Cherbourg, France, at 6:35 P.M. to take on passengers and mail. She departed at 8:10 P.M. the same day, for Queenstown, Ireland, arriving at around noon on April 11. Additional passengers and 194 mail sacks were taken aboard. The Titanic departed Queenstown at 1:30 P.M. on April 11. At approximately 11:40 P.M. on the night of April 14, the Titanic struck an iceberg, with the loss of most of her passengers and crew.

The post card offered here was mailed by a passenger aboard the Titanic and sent ashore to the mails, probably at Queenstown.

EXTREMELY FINE GEM. A SUPERB EXAMPLE OF THE CANADA 12-PENCE BLACK ON LAID PAPER. ONE OF THE WORLD'S MOST DESIRABLE CLASSIC STAMPS AND ONE OF THE FINEST KNOWN.

The first Pence Issues of Canada were printed by the New York firm of Rawdon, Wright, Hatch & Edson, the same firm that printed the New York Postmaster's Provisional and United States 5c and 10c 1847 Issue. The Pence issues, and particularly the 12-pence, show the same fine quality of engraving that distinguishes the U.S. 1847 Issue. The stamps were printed early in 1851 (12p issued June 14), at the same time that RWH&E's contract for providing United States stamps was coming to an end. The 12-pence plate proved difficult for RWH&E. Faulty impressions were laid out twice before the third and final entries, resulting in many positions showing re-entries.

The 1851 12-pence stamp was issued for prepayment of the basic letter rate to Newfoundland, Bermuda and the West Indies, but its value — stated in pence rather than "one shilling" to avoid confusion — also corresponded to the double 6p rate to the United States and certain other countries. However, its use was very limited and, according to Boggis, only 1,450 were sold. The balance of the 51,000 printed was destroyed.

This stamp has not appeared at auction since World War II. ........................... 80,000.00

Jy 22 1858” and Toronto receiving datestamps, docking partly over strip, small area of address at bottom scraped away with a short tear resulting 

AN OUTSTANDING AND VERY RARE FRANKING FOR THE 3-PENCE RATE.

Some postal historians have argued persuasively that this cover originated in Detroit, Michigan, and was carried by ferry boat to its docking point at Sandwich. On July 12, 1858, the Windsor postmaster was authorized by the Post Office Department to supply the local Canadian packet agent at Detroit with 7½ and ½ pence stamps.

1860 5-CENT CONNELL ISSUE

The 5-cent Connell stamp has always evoked interest, as it represents a provocative philatelic event. The collection offered here easily ranks as one of the finest specialized collections ever formed around this fascinating issue. The best introduction to the topic is found in *The Postage Stamps of New Brunswick and Nova Scotia* by Nicholas Argenti.

During the 1850's trade continued to grow between the United States and its neighbors to the North. To facilitate trade with the United States, the Decimal Currency Acts of 1859 provided for a change from the old pounds and pence to the new currency of cents and dollars. Canada had already made the gradual change, between 1853 and 1858. This change necessitated a new set of New Brunswick postage stamps with the correct currency.

Stamps in 1c, 5c, 10c and 12½c denominations were ordered from the American Bank Note Company in December 1859, for anticipated distribution and use after May 1, 1860. The 1c featured a locomotive, the 5c a portrait of Postmaster General Charles Connell, the 10c a portrait of Queen Victoria, and the 12½c an illustration of a steamship. 500,000 of the 5c Connell stamps were printed and delivered, though none was distributed to post offices.

Official government records indicate that, prior to distribution, the stamps printed for all four denominations were held as early as April 11, 1860, at Fredericton. Authorization for distribution of the other three denominations was granted by the Lieutenant Governor's office on May 12, 1860. In the same communication, a new 5c stamp was authorized, to bear the likeness of Queen Victoria. In reply to these instructions, Postmaster General Connell stated that he had prepared a 5c stamp, which was ready for distribution as well. When the Lieutenant Governor's office delayed release of the 5c stamp, Charles Connell was offended and resigned his post. He battled charges of excessive vanity for the rest of his life.

The fate of the 500,000 Connell stamps has been the subject of some debate. One interviewer of Mr. Connell states that he burned the majority of stamps after reimbursing the Post Office Department for the cost, and that a few were given away as souvenirs. Another account is that the Lieutenant Governor dispatched an agent, Frederick Herbert Jenkins Dibblee, to collect and destroy the 5c stamps. All were burned with the exception of one sheet purchased by Charles Connell and a single copy retained by Dibblee against orders. This latter account was given by Mr. Dibblee and is more consistent with the number of recorded examples.

The history of the 5c Connell is a fascinating one, covered in an introduction to this section of the catalogue. The pair offered here, the only recorded multiple, was found in 1933 in a house full of books which once belonged to the husband of one of Charles Connell’s daughters. It is reported that the pair was found on the floor and “lay upon several inches of dust and other debris”. It was purchased by Dr. Reford directly from Dr. G.F. Clarke, the discoverer.

EXTREMELY FINE. AN EXCEEDINGLY RARE GUMMED IMPERFORATE EXAMPLE OF THE 5-CENT CONNELL STAMP.

Argenti describes the imperforate proofs or stamps on thick paper at great length in his book The Postage Stamps of New Brunswick (pp.149-150). His conclusion is that it is likely that a single sheet was printed, as there is no color variation and no two have yet to be found from the same plate position. The paper is slightly thicker than the issued stamp, and Argenti was unable to conclude whether these are proofs, or whether the sheet was printed for issue but not perforated either "because the sheet escaped the perforating machine by mistake or because it was discovered that this sheet was not of uniform paper and therefore set on one side, or discarded for some other reason." An imperforate example of this stamp is also known on an official Post Office Department page (originally a pair with one example removed) inscribed "With the compliments of the Subscriber. Wm. Paisley" (Paisley was accountant of the New Brunswick P.O. Department in 1860). There also exists an imperforate example with a grid cancellation, though none of the leading experts (including Argenti, who owned the item) was thoroughly convinced of its authenticity, even though the cancel appears to be contemporary.

Argenti also notes that this imperforate is "rare, if not rarer, than the actual perforated Connell stamps." Unlisted in either Scott or Gibbons

SWITZERLAND

ZURICH, 1843, 4r Black, Vertical Red Lines (II; Zumstein 1S). Type II, ample to huge margins, deep shade with clear red background lines, well-centered red rosette cancel

VERY FINE AND CHOICE EXAMPLE OF THE ZURICH 4-RAPPEN WITH VERTICAL RED LINES. THIS EARLY OFFICIALLY-ISSUED POSTAGE STAMP.

In 1843, the Canton of Zurich decided to issue stamps to prepay postage. These were issued in two denominations: the 4-rappen for local letters, and a 6-rappen stamp for use on letters to other cantonal districts. The local printing firm of Orell, Fussli & Co. were contracted to print the stamps, which were issued on March 2, 1843.

EXTREMELY FINE EXAMPLE OF THE ZURICH 4-RAPPEN WITH RED VERTICAL LINES.

The previous description gives an explanation of the issuance of this stamp. With 1950 Fulpius and 1988 Weid certificates (the latter illustrated on certificate off-cover). Zumstein Sfr48,000 on cover, Sfr25,500 off-cover..................... E. 15,000-20,000
GENEVA, 1843, 5c + 5c Black on Yellow Green, “Double Geneva” (2L1; Zumstein 3).

EXTREMELY FINE GEM. A SUPERB EXAMPLE OF THE RARE SWITZERLAND DOUBLE-GENEVA IN THE FINEST CONDITION AND COMBINING THE ELEMENTS OF OUTSTANDING COLOR, CANCELLATION, IMPRESSION AND MARGINS.

The Double Geneva was the first stamp issued by the Canton of Geneva, on October 1, 1843. The stamps were lithographed on green paper by M. Schmidt, a local printer, in sheets consisting of fifty double-stamps to a sheet. The total printing was 600 sheets. As quoted in Stamps of Fame by L.N. & M. Williams, a contemporary observation before the issue of the Double Geneva reads “Such labels are sold at post offices at 10 centimes each; and when required to do so stationers fasten them beforehand on envelopes, which they sell plus the cost of the ticket. People keep them ready to hand, just as they do their pens and wafers. Many are lost, but this is so much profit to the Post Office. Moreover one uses them more readily than money...it would be a savings to allow two labels to serve for a double letter, or one for every ounce.”

With 1976 Nussbaum certificate. Zumstein Sfr53,000.......................... 35,000.00

Shipping and Transit Insurance

We will be pleased to arrange for shipping and transit insurance for purchases in this sale (except those described as "floor sale only"). To expedite billing and delivery of lots to hundreds of buyers per sale, we use standard charges for postage and insurance, based on the invoiced total and mailing requirements (see schedule). The standard charges are sometimes slightly more or less than the actual postage, but we do not include any fees for our labor or packing costs. Therefore, we ask all buyers to remit the prescribed amount for shipping charges.

Transit insurance is provided in all cases, except when the buyer has furnished us with proof that insurance coverage is effective under another policy. Proof, in such cases, will be accepted in the form of a written certificate from the insurance carrier.

You are responsible for insurance charges, which will be added to your invoice. This coverage is provided for our mutual protection against theft or loss in transit.

Bidding Increments

The auctioneer may regulate the bidding at his discretion. However, to assist absentee bidders in establishing their maximum bid for each lot, the increments shown at right will be used in most cases. We recommend that written bids conform to these increments (those which do not will be reduced to the next level).
