The collection of Old German States offered in this catalogue was assembled by an American philatelist whose interest in worldwide classic stamps encompasses many different areas.

The stamps of the Old German States have attracted the attention of such renowned American collectors as Alfred H. Caspary, Alfred F. Lichtenstein and John R. Boker Jr. It is no coincidence that the appeal of German States to Americans has historically been reciprocated by German collectors’ fascination with United States and Confederate States postmasters’ provisionals and other classic issues.

Although small in scale, the collection offered here is of uniformly superb quality, and there are several important philatelic and postal history rarities…enough to capture the colorful character of these wonderful classic stamps.
