Dr. Robert LeBow

Dr. Robert LeBow, known to his many friends simply as “Bob”, devoted his life to providing affordable health care to people in America and developing countries. Bob passed away on November 29, 2003, as a result of injuries sustained in July 2002 in an accident while bicycling to work at a community health center in Idaho, where he had been the medical director for more than 25 years. Bob was paralyzed as a result of the accident, and though he was not able to actively participate in philately, he still kept up by reading *Linn’s* and all of the stamp auction catalogues that came his way.

Bob LeBow was a great philatelist, collector and postal historian. Not only did he form the collection presented in this two-part catalogue, “5,000 Years of Postal History”, but he had also formed an award-winning collection of the 1869 Pictorial Issue, a panoramic exhibit collection of U.S. philately, collections of Peru, Bolivia, Disinfected Mails, Bicycle Mail and a medical thematic collection.

Bob was justifiably proud of his “5,000 Years” collection, because it approached postal history from a broad perspective. Bob’s collection was about people and history, two subjects about which he cared deeply. He tried to tell the long history of written communication by mail with examples of cuneiform tablets, papyrus documents, examples of mail carried by courier and early postal systems, Royal mail signed by Kings and Queens, the earliest postal markings, classic stamps and remarkable examples of mail, such as the unique “Bottle Letter” thrown overboard by an impressed American sailor on a British sloop in 1805. When his collection was displayed in the Court of Honor at Ameripex in 1986, it was one of the most popular exhibits in the entire show.

I first met Bob at the Aripex stamp show in Phoenix, Arizona, in January 1979. Bob and his two sons were visiting, and we naturally hit it off while discussing our mutual interest in United States philately, the exhibits displayed and, of course, the 1869 Pictorial Issue, for which we both had a great love. Our chance meeting was the beginning of a 25-year friendship, and it never diminished. Over the years we would regularly chat by phone, discussing stamps and our activities outside of philately.

Bob had extensive experience working on the development of health care systems and preventive programs in over 20 developing countries, including a two-year stint as a Peace Corps physician in Bolivia. He was also an artist, a bicyclist and a guest columnist for the *Idaho Press Tribune*, writing a weekly column for eight years.

Bob’s passion for bicycling was well known to everyone who knew him. It was not uncommon for him to bicycle from Idaho to my house in Northern California. He bicycled across the Himalayas, from India to Tibet, across the Andes and the Alps, and from Idaho to the East Coast, solo again, in 19 days. Bob and his wife, Gail, bicycled from Vienna to Istanbul and in Mali, Bali, Mexico and India. But Bob always returned home, and he always made time to discuss current events, especially the alarming state of the health care system in the United States, about which he published a book entitled *The Health Care Meltdown*.

Philately will miss this kind, gentle and soft-spoken man, who possessed a passion for stamps and a love of people. The collection offered by the Siegel firm reflects Bob’s philatelic achievement, and the countless people around the world alive and healthy today because of his efforts reflect his kindness, compassion and skill as a humanitarian.

Ample to huge margins incl. right sheet margin, deep rich color and fine impression, tied by ms. “X” cancel (ink a bit smeared) on folded letter datelined “Port of Spain, 18th May 1847” to Taylor & Co. in San Fernando, file fold, slight toning and wear, stamp has minor crease and erosion spot at lower left where ink is smeared.

VERY FINE APPEARANCE. AN EXTREMELY RARE EXAMPLE OF THE FAMOUS LADY MCLEOD STAMP ON COVER.

This private-issue stamp appeared six months before the “Post Office” Mauritius and is the earliest stamp used in any British Colony. The stamp was issued in April 1847 to prepay the private conveyance of mails on the Lady McLeod between Port of Spain and San Fernando. Details regarding the printing of this stamp have never been found, but it has been surmised that they were likely printed at the offices of the local newspaper, as were several other early British Colonial stamps and the Hawaiian Missionaries. The full story of this stamp is told on pp. 196-199 of Stamps of Fame by L.N. & M. Williams.
