Information for Bidders

Bidding

The following means are available for placing bids:

1) **Attending the Live Auction in Person:** All bidders must register for a paddle, and new bidders must provide references at least three business days in advance of the sale.

2) **Live Internet Bidding:** Instructions for participating as a Live Internet Bidder are provided on the page opposite.

3) **Phone Bidding:** Bidders can be connected to the sale by phone and bid through a member of staff. Requests for phone bidding are subject to approval (please contact our office at least 24 hours before the sale). A signed Bid Form is required.

4) **Absentee Bids.** All bids received in advance of the sale, either by mail, fax, phone, e-mail or internet, are Absentee Bids, which instruct the auctioneer to bid up to a specific amount on one or more lots in the sale. Absentee Bids sent by phone, fax or e-mail should arrive at least one hour prior to the start of the sale session. Bids entered through Live Internet Bidding will be visible to the auctioneer during the sale. Written bids should be entered legibly on the Bid Form in the sale catalogue. E-mail and internet bids should be carefully typed and double-checked. All new bidders must provide references. We recommend calling or e-mailing to confirm that Absentee Bids sent by mail, fax or e-mail have been received and entered.

Pre-Sale Viewing

Subject to availability, certain lots (except group lots) can be sent to known clients for examination. Requests must be made no later than 7 days prior to the sale. Lots must be returned on the day received. Postage/insurance costs will be invoiced.

In addition to regular viewing, clients may view lots by appointment. Our staff will be pleased to answer questions or provide additional information about lots.

Expert Certification

Individual items offered without a current certificate (PF dated within the past five years of sale; PSE dated January 2004 or later) may be purchased subject to independent certification of genuineness and our description. Please refer to the Conditions of Sale and Grading Terms for policies governing certification.

Shipping and Delivery

Procedures and charges for shipping lots are printed on the back of the Bid Form. Bidders are responsible for all prescribed shipping charges and any applicable sales tax or customs duties.

Price Realized

Prices realized are sent with each invoice. Bidders with e-mail will receive a Bid Results report after the sale. Session results are posted immediately to siegelauctions.com
Bidding from your computer lets you be part of the live auction from anywhere in the world!

There’s no substitute for following the auction in real time. Live Internet Bidding lets you bid and buy as though you were right there in the saleroom.

And it’s easy. Just start by following the simple steps to become a registered Live Internet Bidder. Once you’ve been approved for bidding, you can listen to the auction and place bids with the click of a mouse.

This step-by-step guide will instruct you how to register, set your browser and use the bidding interface.

1 Registering with Stamp Auction Network and Siegel Auction Galleries

Live Internet Bidding is managed by Stamp Auction Network (SAN). To bid, you must be registered and approved by both SAN and Siegel. To decide what you need to do, choose the description below that best fits you.

I’ve already registered with SAN and have been approved by Siegel for internet bidding. You’re ready for Step 2.

I’ve never registered with SAN, but I’m a Siegel client. Go to stampauctionnetwork.com/siegel and click on “Register” at the top. Check the box for Robert A. Siegel Auction Galleries (under “R”) and submit the form, indicating you are a Siegel client. Once registered at SAN, you’re ready for Step 2.

I’ve never registered with SAN, and this is the first time I’ve bid with Siegel. Go to stampauctionnetwork.com/siegel and click on “Register” at the top. Check the box for Robert A. Siegel Auction Galleries (under “R”) and submit the form with your trade references (please, no family members or credit card companies as references). Once registered at SAN and approved by Siegel for bidding, you’re ready for Step 2.

I’ve bid through SAN before, but this is the first time I’ve bid in a Siegel sale. Then you just need to be approved by Siegel. Go to stampauctionnetwork.com/siegel and click on “Update Registration” at the top. Your SAN account information will be sent to us for approval (you might be asked for other trade references). Once approved by Siegel for bidding, you can move to Step 2.

2 Using your browser for Live Internet Bidding and understanding the way it works.

Live Internet Bidding works by providing an audio feed of the auction (for anyone using Internet Explorer) and by allowing registered bidders to observe and place bids. The bidding interface shows a photo and description of the lot, the current bid (and your bidding status), and options for placing competitive bids. To join the auction, go to stampauctionnetwork.com/siegel. You can also log on at siegelauctions.com.

The visual interface will work with any browser on both PC and Mac operating systems. However, the audio feed only works with Internet Explorer on a PC with ActiveX software installed. If ActiveX is not on your computer, you will have the option to install it.

Before bidding by internet for the first time, we recommend finding a sale in progress and listening to the public broadcast or logging in as a registered bidder. This will help you develop a feel for the sale tempo and bidding interface.

“System down” or “lost connection” events do occasionally happen. If you have any problems with Live Internet Bidding, please call 212-753-6421 for immediate assistance.

3 Using Live Internet Bidding to bid, track results and communicate with the auctioneer.

When you’re logged on as a Live Internet Bidder, the screen will display buttons with bid increments. After you click on a bid amount, the auctioneer is immediately notified of your bid. Retracting a bid is usually not acceptable, so please bid carefully.

If you bid, then decide to stop, please use the “Pass” button, which appears once you’ve started bidding. This tells the auctioneer not to wait for another bid from you.

You can send messages to the auctioneer (for example, a request for extension). You can also track prior realizations from the bidding screen.
The property described in this catalogue will be offered at public auction by Robert A. Siegel Auction Galleries, Inc. ("Galleries") on behalf of various consignors and itself or affiliated companies. By bidding on any lot, whether directly or by or through an agent, in person, or by telephone, facsimile or any other means, the bidder acknowledges and agrees to all of the following Conditions of Sale.

1. The highest bidder acknowledged by the auctioneer shall be the buyer. The term "final bid" means the last bid acknowledged by the auctioneer, which is normally the highest bid offered. The purchase price payable by the buyer will be the sum of the final bid and a commission of 15% of the final bid ("buyer's premium"), together with any sales tax, use tax or customs duties due on the sale.

2. The auctioneer has the right to reject any bid, to advance the bidding at his discretion and, in the event of a dispute between bidders, to determine the successful bidder, to continue the bidding or to reoffer and resell the lot in dispute. The Galleries' record of the final sale shall be conclusive.

3. All bids are per numbered lot in the catalogue unless otherwise announced by the auctioneer at the time of sale. The right is reserved to group two or more lots, to withdraw any lot or lots from the sale, or to act on behalf of the seller. The Galleries will execute bidding instructions on behalf of clients, but will not be responsible for the failure to execute such bids or for any errors in the execution of such bids.

4. Lots with numbers followed by the symbol "*" are offered subject to a confidential minimum bid ("reserve"), below which the lot will not be sold. The absence of the symbol "*" means that the lot is offered without a reserve. If there is no reserve, the auctioneer has sole discretion to establish a minimum opening bid and may refuse an offer of less than half of the published estimate. Any lot that does not reach its reserve or opening bid requested by the auctioneer will be announced as "passed" and excluded from the prices realized lists after the sale. The Galleries may have a direct or indirect ownership interest in any or all lots in the sale resulting from an advance of monies or goods-in-trade or a guarantee of minimum net proceeds made by the Galleries to the seller.

5. Subject to the exclusions listed in 5(A), the Galleries will accept the return of lots which have been misidentified or which have obvious faults that were present when the lot was in the Galleries' custody, but not so noted in the lot description. All disputed lots must be received by the Galleries intact with the original packing material within 5 days of delivery to the buyer but no later than 30 days from the date of sale. 5(A) EXCLUSIONS: The following lots may not be returned for any reason: lots containing 10 or more items; lots from buyers who registered for the pre-sale exhibition or received lots by postal viewing, thereby having had the opportunity to inspect them before the sale; any lot described with "faults," "defects" or a specific fault may not be returned because of any secondary fault. Photographed lots may not be returned because of centering, margins, short/nibbed perforations or other factors shown in the illustrations. Lots may not be returned for any of the following reasons: the color of the item does not match the color reproduction in the sale catalogue or website listing; the description contains inaccurate information about the quantity known or reported; or a certification service grades a stamp lower than the grade stated in the description.

6. Successful bidders, unless they have established credit with the Galleries prior to the sale, must make payment in full before the lots will be delivered. Buyers not known to the Galleries must make payment in full within 3 days from the date of sale. The Galleries retains the right to demand a cash deposit from anyone prior to bidder registration and/or to demand payment at the time the lot is knocked down to the highest bidder, for any reason whatsoever. In the event that any buyer refuses or fails to make payment in cash for any lot at the time it is knocked down to him, the auctioneer reserves the right to reoffer the lot immediately for sale to the highest bidder. Credit cards are not accepted as payment.

7. If the purchase price has not been paid within the time limit specified above, nor lots taken up within 7 days from the date of sale, the lots will be resold by whatever means deemed appropriate by the Galleries, and any loss incurred from resale will be charged to the defaulting buyer. Any account more than 30 days in arrears will be subject to a late payment charge of 1% per month as long as the account remains in arrears. Any expenses incurred in securing payment from delinquent accounts will be charged to the account holder. A fee of $250.00 per check will be charged for each check returned for insufficient funds.

8. All lots are sold as genuine. Any lot accompanied by a certificate issued by The Philatelic Foundation within 5 years of the sale date or by Professional Stamp Experts since January 2004 is sold "as is" and in accordance with the description on the certificate. Such lots may not be returned for any reason, including but not limited to a contrary certificate of opinion. Buyers who wish to obtain a certificate for any item that does not have a P.F. or P.S.E. certificate (dated as above) may do so, provided that the following conditions are met: (1) the purchase price must be paid in full, (2) the item must be submitted to an acceptable expertizing committee with a properly executed application form within 21 days of the sale, (3) a copy of the application form must be given to the Galleries, (4) in the event that an adverse opinion is received, the Galleries retain the right to resubmit the item on the buyer's behalf for reconsideration, without time limit or other restrictions, (5) unless written notification to the contrary is received, items submitted for certification will be considered cleared 90 days from the date of sale, and (6) in the event any item is determined to be "not as described", the buyer will be refunded the purchase price and the certification fee up to $600.00 unless otherwise agreed.

9. Until paid for in full, all lots remain the property of the Galleries on behalf of the seller.

10. Agents executing bids on behalf of clients will be held responsible for all purchases made on behalf of clients unless otherwise arranged prior to the sale.

11. The buyer assumes all risk for delivery of purchased lots and agrees to pay for prescribed shipping costs. Buyers outside the U.S. are responsible for all customs duties.

12. The bidder consents that any action or proceeding against it may be commenced and maintained in any court within the State of New York or in the United States District Court for the Southern District of New York, that the courts of the State of New York and United States District Court for the Southern District of New York shall have jurisdiction with respect to the subject matter hereof and the person of the bidder. The bidder agrees not to assert any defense to any action or proceeding initiated by Galleries based upon improper venue or inconvenient forum. The bidder agrees that any action brought by the bidder shall be commenced and maintained only in a Federal Court in the United States District Court for the Southern District of New York or the State Court in the county in which Galleries has its principal place of business in New York. These Terms and Conditions shall be governed by and construed in accordance with the substantive laws of the State of New York.

Grades, Abbreviations and Values Used in Descriptions

Grades and Centering

Our descriptions contain detailed information and observations about each item’s condition. We have also assigned grades to stamps and covers, which reflect our subjective assessment. For stamps, the margin width, centering and gum are described and graded according to generally-accepted standards (an approximate correlation to numeric grades is provided at right). Although we believe our grades are accurate, they are not always exactly aligned with third-party grading terms or standards for all issues. A lot may not be returned because a certification service grades a stamp lower than the grade stated in the description. Information from the P.S.E. Stamp Market Quarterly and P.S.E. Population Report is the most current available, but lots may not be returned due to errors or changes in statistics or data.

Extremely Fine Gem (90-100): The term “Gem” describes condition that is the finest possible for the issue. This term is equivalent to “Superb” used by grading services.
Extremely Fine (80-90): Exceptionally large/ wide margins or near perfect centering.
Very Fine (70-85): Normal-size margins for the issue well-centered with the design a bit closer to one side. “Very Fine and choice” applies to stamps that have desirable traits such as rich color, sharp impression, freshness or clarity of cancel.
Fine (60-70): Smaller than usual margins or noticeably off center. Pre-1890 issues may have the design touched in places.
Very Good (below 60): Attractive appearance, but margins or perforations cut into the design.

Scott “Never Hinged” Values for Nos. 219-771
Scott Value for “O.G.”
Disturbed Original Gum: Gum showing noticeable effects of humidity, climate or hinging over more than half of the gum. The significance of gum disturbance in valuing a stamp in any of the Original Gum categories depends on the degree of disturbance, the rarity and normal gum condition of the issue and other variables affecting quality. For example, stamps issued in tropical climates are expected to have some gum disturbance due to humidity, and such condition is not considered a negative factor in pricing.

Covers

Minor nicks, short edge tears, flap tears and slight reduction at one side are normal conditions for 19th century envelopes. Folded letters should be expected to have at least one file fold. Light cleaning of covers and small mends along the edges are accepted forms of conservation. Unusual covers may have a common stamp with a slight crease or tiny tear. These flaws exist in virtually all 19th century covers and are not always described. They are not grounds for return.

Catalogue Values and Estimates

Unless otherwise noted, the currently available Scott Catalogue values are quoted in dollars with a decimal point. Other catalogues are often used for foreign countries or specialized areas and are referred to by their common name: Stanley Gibbons (SG), Detics, American Air Mail Catalogue (AAMC), Michel, Zumstein, Facit, etc. Estimates are indicated with an “E.” and reflect our conservative valuation in dollars. Reserves will never exceed the low end of the estimate range; they will sometimes exceed Scott Catalogue value for stamps in Extremely Fine condition.

Because of certain pricing inconsistencies in the Scott Catalogue—for example, blocks that have no gum, the absence of premiums for Mint N.H. items, etc.—we cannot guarantee the accuracy of values quoted for multiples, specialized items and collection lots. We generally try to be conservative, but buyers may not return a lot because of a discrepancy in catalogue value due to Scott pricing inconsistencies.

Revised 1/2008
Brazil

Brazil holds the distinction of being the second country to issue stamps for nationwide use after Great Britain. Although the 1842 City Despatch Post stamps issued in New York City and the 1843 Zurich Cantonal stamps preceded Brazil’s 1843 Bull’s Eye issue, those stamps were never distributed through national post offices for general use. Therefore, Brazil holds a valid claim of being the first country in the Americas and the second country in the world to issue stamps for use by all of its citizens.

From the philatelist’s perspective, Brazil offers a relatively large quantity of material, including single stamps, multiples and covers. In this respect, Brazil differs from its neighboring countries. There are today two major collections of Bull’s Eye issues competing in international exhibitions, a circumstance which would be quite impossible in many other areas of South American philately.

The highlight of the Islander collection is, of course, the famous “Pack Strip,” which is described in detail in this sale catalogue (pages 13-19). This remarkable item is ranked among the Top Ten items in worldwide philately, and within Brazil it is number one among the three most important items. The three most valuable Aristocrats of Brazil are the Pack Strip, the Complete Bull’s Eye Set Cover, and the complete sheet of sixty of the 60-reis Bull’s Eye from the large plate.

In October 2007 the Geneva-based auction firm of David Feldman S.A. sold the Complete Set cover, the highlight of the Meyer collection, for the record price of €824,000 (US $1,162,000). The 60-reis sheet is now a significant cornerstone of Luis Alemany’s Grand Prix exhibit collection. And, of course, the Pack Strip will be offered on June 5 as the highlight of the Islander collection.

It is a peculiar circumstance that no collector at any time in history has owned more than one of these three top items of Brazil. However, the sale of the Complete Set cover and offering of the Pack Strip make that an achievable goal.

9° (**)  1843, 30r Black, Late Impression (1). Vertical pair, unused (no gum), large margins to just touched at left, small fault at lower left.

FINE APPEARANCE AND EXCEEDINGLY RARE. THE 30-REIS VALUE IS FAR RARER IN UNUSED MULTIPLES THAN ITS 60 AND 90-REIS BULL’S EYE COUNTERPARTS.

Illustrated as Positions 10/16 in Napier’s “Suggested 3rd Plate Top Pane” (plate 9). Meyer €12,000............ E. 4,000-5,000

10°  1843, 30r Black, Intermediate Impression (1). 2nd Composite Plate, State D, Positions 7/13, vertical pair with huge margins showing outer framelines at left and bottom and interpanneau dividing line at bottom, tied by two strikes of “Correio Geral da Corte 22/11/1843” circular datestamp on piece, light bend in bottom stamp, small corner crease in bottom margin.

EXTREMELY FINE APPEARANCE, A RARE EXAMPLE OF THE 30-REIS SEMI-XIPHAPOGOS, WHICH SHOWS THE INTERPANNEAU DIVIDING LINE AT BOTTOM.

Bull’s Eye stamps from the composite plates that show the diving line between panes are called Semi-Xiphopagus. Such stamps are especially desirable because they can be immediately recognized as examples from the composite plates without the need for plating (the two known Xiphopagus multiples are, of course, the se-tenant pair and strip of three). The 60r Semi-Xiphopagus stamps come from the top or bottom of the middle pane (twelve positions). The 30r and 90r are rarer, because they can only come from one row (30r bottom, 90r top, six stamps positions each). As a measure of rarity, the Meyer collection sold through Feldman in October 2007, which was said to contain a “record holding” of Semi-Xiphopagus stamps, had just one single 30r unused and a 30r pair with a trace of the interpanneau line.

Ex Santos. Signed A. Diena. Meyer €6,500..... E. 1,500-2,000
11° 1843, 30r Black, Late Impression (1). Horizontal pair, large margins, lightly struck “Correio Geral da Corte 7/2/1845” circular datestamp, faint wrinkles show only when drying, still Very Fine, ex Lima, Meyer €1,900 .......... E. 750-1,000

12° 1843, 30r Black, Intermediate Impression (1). 1st Composite Plate, State D, Positions 5-6, horizontal pair, huge margins all around with complete outer lines at top and right, small double-circle datestamp, small thins and faint ink spots, Extremely Fine appearance, ex Lima, Meyer €1,900... E. 500-750

13° 1843, 30r Black, Intermediate Impression (1). Large Plate, State B, Positions 17-18, horizontal pair with ample to large margins and outer frameline at right, lightly struck “Correio Geral da Corte 21/2/1845” circular datestamp, vertical crease between stamps, otherwise Fine-Very Fine, ex Lima, Meyer €1,900...... E. 400-500

14° 1843, 30r Black, Intermediate Impression (1). Horizontal pair, ample to large margins, “Correio Geral da Corte 13/6/1844” circular datestamp, vertical crease between stamps and thinned at right, otherwise Fine-Very Fine, Meyer €1,900 ...................... E. 400-500
15°  **1843, 30r, 60r Bull’s Eyes (1, 2).** Vertical pair of 30r, Positions 37/43, Large Plate, State B, ample to large margins, used with 60r, large margins, tied by three strikes of faint purplish brown “MARIANNA” straightline town handstamp on piece of brown cover, minor toning on piece only, stamps are Very Fine, scarce combination, ex Santos, Meyer €1,900 for 30r pair................... The “Pack Strip”
The 30r and 60r se-tenant strip of three presented here is known to all of philately as the “Pack Strip,” in deference to one of its earliest owners, Charles Lathrop Pack. The Pack Strip is also known to specialists in Latin American stamps as the “Xiphopagus Triplet” (*xiphopagus* is a medical term for symmetrical conjoined twins).

Since its discovery in 1897, the Pack Strip has withstood the test of time, and today it is still ranked as one of the world’s Top Ten most desirable philatelic rarities. It has been featured in award-winning collector exhibits and in the Aristocrats of Philately displays at major international philatelic events. The strip was one of the most highly-valued rarities in the 1954 *Life* magazine feature spread, “The World’s Rarest Stamps.”

It seems appropriate, on this rare occasion when the Pack Strip will be offered to the philatelic market, to examine the Pack Strip’s significance and to trace the path of ownership from its discovery in 1897 up to the present time. To appreciate the importance of the Pack Strip, one should start with a basic understanding of Brazil’s 1843 Bull’s Eye issue and the printing methods used to create the stamps.

**PRODUCTION OF THE BULL’S EYE ISSUE**

The first stamps of Brazil were authorized by government decree on November 29, 1842, under the reign of Emperor Dom Pedro II, who was then just a teenager. Postage rates were established for land and sea routes: 60 reis for a letter carried by land weighing up to 4 *oitavas* (an old measure of weight, roughly equal to one half-ounce), and double the land rate for mail carried by ship. The land rate increased at 30-reis increments for each additional 2 *oitavas* (quarter-ounce), and the sea rate increased at 60-reis increments. Reduced rates for Court of Law mail and printed matter were also authorized.

Therefore, the three stamp denominations required by the 1842 postal reform were 30, 60 and 90 reis. Government officials ordered production of the stamp plates on February 23, 1843, and, just two months later, on April 29, the first plate was finished and presented along with proof impressions to the President of the Treasury by the Comptroller of the Mint.

The remarkable Bull’s Eye stamps, named for their large oval shape, were designed without the country’s name or a portrait of the Monarch. The Comptroller, in a letter to the President of the Treasury, expressed his rationale for deciding against imitating Great Britain’s use of a royal portrait. He claimed that it was disrespectful to place the Monarch’s portrait on “things, which by their character, invariably become waste,” and he expressed concern that forgery would be easier with stamps bearing a well-known portrait. In place of a portrait, each of the Bull’s Eye stamps presents a large numeral surrounded by spiraling lathe work, an anti-counterfeiting measure patented by Perkins, Bacon & Company of England. The engraving was executed in Brazil by the Mint on a machine seized by Brazilian Customs in 1841; however, for many years the designs incorporating the Perkins method had fooled philatelists into thinking the issue had been printed in England.

The stamps’ issue date was officially declared to be August 1, 1843, and surviving off-cover stamps with postmarks of that date are evidence that they were released on time. The only stamps issued earlier by a nation’s post office for use throughout the country were Great Britain’s May 1840 Penny Black and Two-Pence Blue. The 1842 United States City Despatch Post stamps and the 1843 Swiss Cantonal stamps pre-date Brazil’s first issue, but those stamps were neither distributed nor used throughout the entire country, as were Brazil’s.
THE BULL’S EYE PLATES

The nameless and faceless Bull’s Eye stamps immediately gained popularity with nineteenth-century philatelists. Some clues about the unusual configuration of the Bull’s Eye plates were provided by multiples that reached collectors. The Xiphopagus Pair was first reported in October 1890, when it was owned by Isidro Moscoso of Bahia, and the first report of the Pack Strip (Xiphopagus Triplet) followed in October 1897, while it was in the possession of a collector in Rio de Janeiro named Carl Johan Lindgren. These se-tenant multiples proved that at least one of the Bull’s Eye plates comprised more than one denomination. However, an accurate understanding of the number and composition of Bull’s Eye plates was not achieved until the 1920’s, when Lieutenant-Colonel G. S. F. Napier published his exhaustive study of the Bull’s Eyes (The Stamps of the First Issue of Brazil). The Napier plate reconstructions were subsequently shown to contain errors, but they still stand as the basis for continuing studies.

Napier demonstrated that the Bull’s Eye stamps were printed from several plates in a variety of configurations and states, as follows:

1st Composite Plate (30/60/90r); 54 subjects arranged in three panes of 18 (6 x 3); top pane 30r, middle pane 60r and bottom pane 90r; each pane surrounded by one continuous outer frameline; the panes separated by a horizontal gutter and interpanneau dividing line; four different states (A, B, C, D), distinguished from each other by retouching and recutting.

2nd Composite Plate (30/60/90r); as above, also in four states (A, B, C, D).

30r Large Plate; 60 subjects arranged in one pane (6 x 10); the pane surrounded by one continuous outer frameline; two different states (A, B), distinguished from each other by retouching.

60r 1st Large Plate; 60 subjects arranged in one pane (6 x 10); the pane surrounded by one continuous outer frameline; two different states (A, B), distinguished from each other by retouching.

60r 2nd Large Plate; 60 subjects arranged in one pane (6 x 10); the pane surrounded by one continuous outer frameline; two different states (A, B), distinguished from each other by retouching.

30r Small Plate; 54 subjects arranged in three panes of 18 (6 x 3); each pane surrounded by one continuous outer frameline; the panes separated by a horizontal gutter; this configuration is confirmed by a rejoined block of four 30r with horizontal gutter.

Digital reconstruction of the 2nd composite plate, which produced the Pack Strip. The plate of 54 subjects comprised separate panes of the 30r, 60r and 90r denominations.
SIGNIFICANCE OF THE PACK STRIP

In the context of the Bull’s Eye stamps’ issue and production, it is obvious why the Pack Strip rose to such prominence in the field of philatelic artifacts. It represents what is arguably the earliest postage stamp issue in the world after Great Britain’s Penny Black and Two-Pence Blue. It combines two different denominations in one multiple from one sheet (this unusual se-tenant plate format would be used in the United States two years later, when the St. Louis and Providence postmasters printed their provisional stamps). Finally, because the sheets were usually divided into panes for sale at Brazil’s post offices, se-tenant multiples are exceedingly rare. In fact, only the Pack Strip and the Xiphopagus Pair have survived, and the strip is distinguished by its larger size and far superior condition (as reported, the pair has been “restored” at the upper right).

The ownership history of the Pack Strip was meticulously compiled in an article by Paulo Comelli, a well-respected authority on the stamps and postal history of South America (“The History of the Xiphopagus Triplet (The Pack Strip)”, London Philatelic, November 2002, 111:331-337). The summary that follows is based on Mr. Comelli’s article.

October 1897—Reported for the first time in the Jornal Philatelico (“An Unknown Error from Brazil” by Thadeu Rangel Pestana). Described as the property of Carl Johan Lindgren (1846-1916), “a Brazilian of Swedish origin, who lived in Bahia but now is living in Rio de Janeiro.”

July-September 1900—The Philatelist Paulistano magazine reported “Mr. Felizardo Teixeira de Figueiredo told us he accomplished the sale of an interesting and rare triplet of stamps of 1843. There are two 30rs and one 60rs, printed together on the same sheet and cancelled by the post office. Such a beautiful rarity was sold at the price of 2,000,000 reis.” According to Mr. Comelli, this amount was equivalent to US $300 at the then-current exchange rate, and the buyer was José de Mesquita Martins (1874-1916), the son of the Baron of Itacurussa.

circa 1906-1907—According to Mr. Comelli, the facts indicate that José de Mesquita Martins donated his valuable stamp collection to the friars of Castelo, who in turn sold it for a fraction of its true value. The likely buyer was Theo Lemaire, a prominent French dealer who exhibited the triplet in Paris, France, in 1907 and again at the Buenos Aires Stamp Exhibition held in 1911.

1916—Theo Lemaire sold the triplet to Charles Lathrop Pack, with whom it remained for 28 years. During Pack’s ownership, it was widely exhibited and became famous as the “Pack Strip.”

December 1944—After Pack’s death, his stamp collection was dispersed in a series of auctions held by Harmer, Rooke & Co. On December 8, 1944, the Pack Strip was sold as lot 824 for $6,250 to the New York stamp dealer, Y. Souren.

May 1954—Life magazine presented “The World’s Rarest Stamps” (cover story) and featured the Pack Strip with a value of $15,000.

March 1955—A news article reported the sale of the Pack Strip for $15,000 by Robert Lyman, a New York dealer. Mr. Lyman later confirmed that he bought the Pack Strip from Souren and sold it to Manolo Galvez, a dealer in Madrid, Spain, who in turn sold it to an Italian collector named Contini.

circa 1956-1958—The Pack Strip was sold to Dr. J. A. Almeida Dias. It was exhibited as part of the Dias collection of Brazil at Sicilia 1959, Barcelona 1960 and London 1960.

March 1963—The Dias collection was offered at auction by Harmer, Rooke & Co., and the Pack Strip was knocked down for £8,250 to William Lea.

February 1969—Stanley Gibbons included the Pack Strip in one of the sales of the Lars Amundsen collection, but it was probably never owned by Amundsen. Robert Lyman bought the strip for £8,700 and sold it to Dr. Norman S. Hubbard.

May 1986—The Pack Strip was sold for $250,000 plus 10% premium in the Siegel sale of the “Gordon N. John” collection of Brazil. The buyer was an agent for Angelo Lima, whose exhibit of “Brazil Empire 1843-1866” won the International Grand Prix at Philexfrance 1989 and the Grand Prix d’Honneur at Philanippon 1991.

November 1993—The Lima collection was dispersed through private transactions and at an auction held by David Feldman S.A. in Geneva, Switzerland. The Pack Strip was knocked down for 1,000,000 Swiss francs. It was subsequently acquired by Islander.

THE WORLD’S TOP TEN PHILATELIC RARITIES

The Pack Strip has always been described as one of the Top Ten philatelic rarities. In an effort to substantiate this claim, we assembled a list of the ten from a survey of various exhibitions and sources. The choices are based on the significance of the stamps, with preference given to major countries’ classics. A country may only be represented once. Large multiples of relatively common stamps and postal history rarities, although of great importance to specialists, have not been considered in this selection.

On the following page, the Top Ten items are listed alphabetically. The last public auction realization or private sale, if known, is reported. Most of this information has been quoted from *Encyclopedia of Rare and Famous Stamps*, by L. N. Williams (published by David Feldman S.A. and used with permission) and the Bolaffi *International* catalogue. Auction prices include the buyer’s premium if applicable to the sale.

18**<sup>43</sup>, 30r Black, Late Impression (3), Large Plate, State A, Positions 23-24/29-30/35-36, block of six, large to huge margins including sheet margin and outer frameline at right, tied by one of four strikes of "Correio Geral da Corte 1/4/1845" circular datestamp on folded cover to Rio Pardo, the block is affixed over the backflap and has been carefully opened so as to preserve the block in perfect condition.

EXTREMELY FINE. THIS IS THE ONLY BLOCK OF ANY BULL'S EYE ISSUE KNOWN ON COVER. THIS SPECTACULAR ITEM, DISCOVERED ONLY IN THE PAST 30 YEARS, IS REGARDED AS ONE OF THE TOP FIVE PHILATELIC ITEMS OF BRAZIL AND ONE OF THE WORLD'S GREATEST CLASSIC IMPERFORATE COVERS.

This extraordinary cover was discovered sometime in the 1970's and sold to Reinaldo Bruno Pracchia, who featured it in his award-winning exhibit, which garnered the Grand Prix d'Honneur at London 1980. It was acquired by Angelo Lima and again became one of the cornerstones of his Grand Prix exhibit (International Grand Prix at Philexfrance 1989 and Grand Prix d'Honneur at Philanippon 1991). Islander acquired the cover at the November 1993 sale of the Lima collection, held by David Feldman S.A.

AN IMPORTANT BULL’S EYE MULTIPLE CONTAINING TWO SEMI-XIPHOPAGUS EXAMPLES OF THE 60-REIS FROM THE COMPOSITE PLATE.

Bull’s Eye stamps from the composite plates that show the diving line between panes are called Semi-Xiphopagus. Such stamps are especially desirable because they can be immediately recognized as examples from the composite plates without the need for plating (the two known Xiphopagus multiples are, of course, the se-tenant pair and strip of three). The 60r Semi-Xiphopagus stamps come from the top or bottom of the middle pane (twelve positions). As a measure of this block’s rarity, the Meyer collection sold through Feldman in October 2007, which was said to contain a “record holding” of Semi-Xiphopagus stamps, had three small multiples and five singles of the 60r Semi-Xiphopagus.

Ex de Souza and Lima. Meyer prices a used block of four at €7,700 and a single used 60r Semi-Xiphopagus at €3,500 .......................................................... E. 2,000-3,000

EXTREMELY FINE. A MAGNIFICENT EXAMPLE OF THE 60-REIS BULL’S EYE TIED BY A STRAIGHTLINE TOWN MARKING ON THE ADDRESS SIDE OF THE COVER.

Pernambucana”, docketed with same Dec. 15, 1844 origin date (effectively tying the pair and cover together), file folds clear of stamps, repaired at top right, otherwise Fine, scarce use of the 60r Bull’s Eye on a ship letter from Grampara ............................................................ **VERY FINE. AN EXTREMELY RARE BULL’S EYE FRANKING FOR 240-REIS SHIP POSTAGE.**

The postage on letters travelling by ship was rated at 120-reis up to one-half ounce plus an additional 60-reis for each quarter-ounce increment. This letter must have weighed between 3/4 and 1 ounce. Although contrary to regulations, stamps on ship letters are sometimes found uncancelled. .................................................. 32° (w) 1843, 90r Black, Intermediate Impression (3). Complete unused pane of 18, 1st Composite Plate, State A, sharp impression (early Intermediate), large margins all around with full outer framelines, faint ms. “206” in bottom margin, tears in corners and other interior faults have been expertly improved. VERY FINE APPEARANCE. THIS INTACT PANE OF EIGHTEEN IS THE LARGEST UNUSED MULTIPLE OF THE 90-REIS BULL’S EYE ISSUE. NO OTHER UNUSED 90-REIS PANE IS RECORDED. ONE OF THE GREAT RARITIES OF BRAZIL AND OF WORLDWIDE CLASSIC PHILATELY.

The largest recorded unused blocks of the three Bull’s Eye values are as follows: 30r, three blocks of four (one heavily creased and rebacked), none larger; 60r, a complete sheet of 60 from the Large Plate, followed by a block of 20 (Large Plate) and smaller blocks from the Composite Plates (there is no known complete unused pane of 18 of the 60r from the Composite Plate); and 90r, the unused pane of 18 offered here, followed by a block of 12 (these are the only recorded unused blocks of the 90r).

Photos of this pane in its original condition may be found in American Philatelic Society’s 1943 Centenary Handbook (page 45) and the 1966 Harmer, Rooke & Co. catalogue of the de Souza collection (lot 591). They show the tears in the corners and interior scrapes, which have been sealed and touched up in places to great effect, but there are no paper additions.

Ex Dr. Hermes (according to A.P.S. 1943 Centenary Handbook, page 45), Mario de Souza (a key element of his Efimayo 1960 Grand Prix award-winning exhibit) and Angelo Lima (a key element of his exhibit, which won the International Grand Prix at Philexfrance 1989 and Grand Prix d’Honneur at Philanippon 1991). The pane was acquired by Islander in a private transaction when the Lima collection was dispersed through David Feldman S.A. in November 1993.

No catalogue can possibly measure the value of this unique item, but for the record the Meyer Brazilian Empire Stamp Catalogue prices an unused 90r block of four at €46,000 and an unused pair at €9,800, for a total of €167,400. ......................... E. 100,000-150,000

EXTREMELY FINE APPEARANCE. A RARE AND DESIRABLE EXAMPLE OF THE 90-REIS **SEMI-XIPHOPAGUS**.

Bull’s Eye stamps from the composite plates that show the dividing line between panes are called **Semi-Xiphopagus**. Such stamps are especially desirable because they can be immediately recognized as examples from the composite plates without the need for plating (the two known Xiphopagus multiples are, of course, the se-tenant pair and strip of three). The 60r **Semi-Xiphopagus** stamps come from the top or bottom of the middle pane (twelve positions). The 30r and 90r are rarer, because they can only come from one row (30r bottom, 90r top, six stamps positions each).

As a measure of rarity, the Meyer collection sold through Feldman in October 2007, which was said to contain a “record holding” of **Semi-Xiphopagus** stamps, had just one used single of the 90r.

**These are extremely rare examples of the 60-reis and 90-reis Semi-Xiphopagus stamps with parts of the adjoining panes in addition to the dividing lines. This is the closest philatelists can come to a 60r/90r se-tenant multiple, of which no example is known.**

1843, 90r Black, Late Impression (3). 2nd Composite Plate, State C, Positions 2-3/8-9/14-15, block of six with huge margins all around including bottom sheet margin and inter-panneau dividing line at top, multiple strikes of "Correio Geral da Corte 27/10/1844" circular datestamp, minor wrinkles and a few small thin spots.

EXTREMELY FINE APPEARANCE. AN EXTREMELY RARE 90-REIS BULL’S EYE USED MULTIPLE CONTAINING TWO SEMI-XIPHOPAGUS STAMPS AT TOP.

Bull’s Eye stamps from the composite plates that show the diving line between panes are called Semi-Xiphopagus. Such stamps are especially desirable because they can be immediately recognized as examples from the composite plates without the need for plating (the two known Xiphopagus multiples are, of course, the se-tenant pair and strip of three). The 60r Semi-Xiphopagus stamps come from the top or bottom of the middle pane (twelve positions). The 30r and 90r are rarer, because they can only come from one row (30r bottom, 90r top, six stamps positions each). As a measure of rarity, the Meyer collection sold through Feldman in October 2007, which was said to contain a “record holding” of Semi-Xiphopagus stamps, had just one single 90r.

Ex Pack and Lima (as part of a reconstructed block of twelve). Meyer €22,000 as a used block of four and two Semi-Xiphopagus singles. ......................... E. 7,500-10,000
1843, 90r Deep Black, Intermediate Impression (3). 2nd Composite Plate, Stated C, Positions 4-6/10-12, block of six from the upper right corner of the pane, mostly large margins including outer framelines at top and right, just barely into upper left stamp’s frameline, multiple strikes of scarce framed “CIDADE DE NICHEROY” handstamp, lovely deep shade and sharp impression (very early Intermediate), bottom right stamp has minute pinhole which is probably a natural paper flaw

VERY FINE. A BEAUTIFUL USED BLOCK OF THE 90-REIS BULL’S EYE IN A STRIKING DEEP SHADE.

Meyer €18,200 as a used block of four and pair .............................................. E. 7,500-10,000
1843, 90r Black, Late Impression (3). 2nd Composite Plate, State C, Positions 9-12/15-18, block of eight from the bottom right corner of the pane with huge margins including sheet margins and outer framelines at lower right, four strikes of “Correio Geral da Corte 27/10/1844” circular datestamp, part of manuscript in sheet margin, some wrinkles and slight internal creasing pressed out, a few soiled spots visible after light cleaning.

VERY FINE. AN OUTSTANDING LARGE USED BLOCK OF THE 90-REIS BULL’S EYE ISSUE. USED MULTIPLES ARE RARELY FOUND IN THIS CHOICE CONDITION.

Although a number of used blocks of the 90r Bull’s Eye have survived, including a cancelled pane of 18, the condition of the large multiples is frequently unsatisfactory. This block, with only minor flaws, is certainly one of the most desirable in terms of quality.

Ex Lima. Meyer €28,000 as two used blocks of four ......................... E. 15,000-20,000
1843, 90r Black, Late Impression (3). Horizontal pair, full to large margins, well-tied by two bold strikes of “Correio de Alcântara” dateless circle in brown ink on greenish folded cover, reinforced along vertical file fold (clear of stamps), minor edge wear, the pair has been lifted and hinged in place, a few tiny imperfections only visible on back of pair

VERY FINE. AN EXTREMELY RARE USE OF THE 90-REIS BULL’S EYE TO PAY THE 180-REIS SHIP RATE FROM MARANHAO PROVINCE. ONE OF TWO REPORTED BULL’S EYE COVERS WITH THE ALCÂNTARA DATESTAMP.

Ex Koester and Lima .................................................................................. E. 10,000-15,000

Information for Bidders

Bidding
The following means are available for placing bids:

1) Attending the Live Auction in Person: All bidders must register for a paddle, and new bidders must provide references at least three business days in advance of the sale.

2) Live Internet Bidding: Instructions for participating as a Live Internet Bidder are provided on the page opposite.

3) Phone Bidding: Bidders can be connected to the sale by phone and bid through a member of staff. Requests for phone bidding are subject to approval (please contact our office at least 24 hours before the sale). A signed Bid Form is required.

4) Absentee Bids. All bids received in advance of the sale, either by mail, fax, phone, e-mail or internet, are Absentee Bids, which instruct the auctioneer to bid up to a specific amount on one or more lots in the sale. Absentee Bids sent by phone, fax or e-mail should arrive at least one hour prior to the start of the sale session. Bids entered through Live Internet Bidding will be visible to the auctioneer during the sale. Written bids should be entered legibly on the Bid Form in the sale catalogue. E-mail and internet bids should be carefully typed and double-checked. All new bidders must provide references. We recommend calling or e-mailing to confirm that Absentee Bids sent by mail, fax or e-mail have been received and entered.

Pre-Sale Viewing
Subject to availability, certain lots (except group lots) can be sent to known clients for examination. Requests must be made no later than 7 days prior to the sale. Lots must be returned on the day received. Postage/insurance costs will be invoiced.

In addition to regular viewing, clients may view lots by appointment. Our staff will be pleased to answer questions or provide additional information about lots.

Expert Certification
Individual items offered without a current certificate (PF dated within the past five years of sale; PSE dated January 2004 or later) may be purchased subject to independent certification of genuineness and our description. Please refer to the Conditions of Sale and Grading Terms for policies governing certification.

Shipping and Delivery
Procedures and charges for shipping lots are printed on the back of the Bid Form. Bidders are responsible for all prescribed shipping charges and any applicable sales tax or customs duties.

Price Realized
Prices realized are sent with each invoice. Bidders with e-mail will receive a Bid Results report after the sale. Session results are posted immediately to siegelauctions.com
Live Internet Bidding at Siegel Auctions

Bidding from your computer lets you be part of the live auction from anywhere in the world!

There’s no substitute for following the auction in real time. Live Internet Bidding lets you bid and buy as though you were right there in the saleroom.

And it’s easy. Just start by following the simple steps to become a registered Live Internet Bidder. Once you’ve been approved for bidding, you can listen to the auction and place bids with the click of a mouse.

This step-by-step guide will instruct you how to register, set your browser and use the bidding interface.

1 Registering with Stamp Auction Network and Siegel Auction Galleries

Live Internet Bidding is managed by Stamp Auction Network (SAN). To bid, you must be registered and approved by both SAN and Siegel. To decide what you need to do, choose the description below that best fits you.

I’ve already registered with SAN and have been approved by Siegel for internet bidding. You’re ready for Step 2.

I’ve never registered with SAN, but I’m a Siegel client. Go to stampauctionnetwork.com/siegel and click on “Register” at the top. Check the box for Robert A. Siegel Auction Galleries (under “R”) and submit the form, indicating you are a Siegel client. Once registered at SAN, you’re ready for Step 2.

I’ve never registered with SAN, and this is the first time I’ve bid with Siegel. Go to stampauctionnetwork.com/siegel and click on “Register” at the top. Check the box for Robert A. Siegel Auction Galleries (under “R”) and submit the form with your trade references (please, no family members or credit card companies as references). Once registered at SAN and approved by Siegel for bidding, you’re ready for Step 2.

I’ve bid through SAN before, but this is the first time I’ve bid in a Siegel sale. Then you just need to be approved by Siegel. Go to stampauctionnetwork.com/siegel and click on “Update Registration” at the top. Your SAN account information will be sent to us for approval (you might be asked for other trade references). Once approved by Siegel for bidding, you can move to Step 2.

2 Using your browser for Live Internet Bidding and understanding the way it works.

Live Internet Bidding works by providing an audio feed of the auction (for anyone using Internet Explorer) and by allowing registered bidders to observe and place bids. The bidding interface shows a photo and description of the lot, the current bid (and your bidding status), and options for placing competitive bids. To join the auction, go to stampauctionnetwork.com/siegel. You can also log on at siegelauctions.com.

The visual interface will work with any browser on both PC and Mac operating systems. However, the audio feed only works with Internet Explorer on a PC with ActiveX software installed. If ActiveX is not on your computer, you will have the option to install it.

Before bidding by internet for the first time, we recommend finding a sale in progress and listening to the public broadcast or logging in as a registered bidder. This will help you develop a feel for the sale tempo and bidding interface.

“System down” or “lost connection” events do occasionally happen. If you have any problems with Live Internet Bidding, please call 212-753-6421 for immediate assistance.

3 Using Live Internet Bidding to bid, track results and communicate with the auctioneer.

When you’re logged on as a Live Internet Bidder, the screen will display buttons with bid increments. After you click on a bid amount, the auctioneer is immediately notified of your bid. Retracting a bid is usually not acceptable, so please bid carefully.

If you bid, then decide to stop, please use the “Pass” button, which appears once you’ve started bidding. This tells the auctioneer not to wait for another bid from you.

You can send messages to the auctioneer (for example, a request for extension). You can also track prior realizations from the bidding screen.
The property described in this catalogue will be offered at public auction by Robert A. Siegel Auction Galleries, Inc. ("Galleries") on behalf of various consignors and itself or affiliated companies. By bidding on any lot, whether directly or by or through an agent, in person, or by telephone, facsimile or any other means, the bidder acknowledges and agrees to all of the following Conditions of Sale.

1. The highest bidder acknowledged by the auctioneer shall be the buyer. The term "final bid" means the last bid acknowledged by the auctioneer, which is normally the highest bid offered. The purchase price payable by the buyer will be the sum of the final bid and a commission of 15% of the final bid ("buyer’s premium"), together with any sales tax, use tax or customs duties due on the sale.

2. The auctioneer has the right to reject any bid, to advance the bidding at his discretion and, in the event of a dispute between bidders, to determine the successful bidder, to continue the bidding or to reoffer and resell the lot in dispute. The Galleries’ record of the final sale shall be conclusive.

3. All bids are per numbered lot in the catalogue unless otherwise announced by the auctioneer at the time of sale. The right is reserved to group two or more lots, to withdraw any lot or lots from the sale, or to act on behalf of the seller. The Galleries will execute bidding instructions on behalf of clients, but will not be responsible for the failure to execute such bids or for any errors in the execution of such bids.

4. Lots with numbers followed by the symbol ° are offered subject to a confidential minimum bid ("reserve"); below which the lot will not be sold. The absence of the symbol ° means that the lot is offered without a reserve. If there is no reserve, the auctioneer has sole discretion to establish a minimum opening bid and may refuse an offer of less than half of the published estimate. Any lot that does not reach its reserve or opening bid requested by the auctioneer will be announced as “passed” and excluded from the prices realized lists after the sale. The Galleries may have a direct or indirect ownership interest in any or all lots in the sale resulting from an advance of monies or goods-in-trade or a guarantee of minimum net proceeds made by the Galleries to the seller.

5. Subject to the exclusions listed in 5(A), the Galleries will accept the return of lots which have been misidentified or which have obvious faults that were present when the lot was in the Galleries’ custody, but not so noted in the lot description. All disputed lots must be received by the Galleries intact with the original packing material within 5 days of delivery to the buyer but no later than 30 days from the date of sale. (5A) EXCLUSIONS: The following lots may not be returned for any reason: lots containing 10 or more items; lots from buyers who registered for the pre-sale exhibition or received lots by postal viewing, thereby having had the opportunity to inspect them before the sale; any lot described with “faux,” “defects” or a specific fault may not be returned because of any secondary fault. Photographed lots may not be returned because of centering, margins, short/nibbed perforations or other factors shown in the illustrations. Lots may not be returned for any of the following reasons: the color of the item does not match the color reproduction in the sale catalogue or website listing; the description contains inaccurate information about the quantity known or reported; or a certification service grades a stamp lower than the grade stated in the description.

6. Successful bidders, unless they have established credit with the Galleries prior to the sale, must make payment in full before the lots will be delivered. Buyers not known to the Galleries must make payment in full within 5 days from the date of sale. The Galleries reserves the right to demand a cash deposit from anyone prior to bidder registration and/or to demand payment at the time the lot is knocked down to the highest bidder, for any reason whatsoever. In the event that any buyer refuses or fails to make payment in cash for any lot at the time it is knocked down to him, the auctioneer reserves the right to reoffer the lot immediately for sale to the highest bidder. Credit cards are not accepted as payment.

7. If the purchase price has not been paid within the time limit specified above, nor lots taken up within 7 days from the date of sale, the lots will be resold by whatever means deemed appropriate by the Galleries, and any loss incurred from resale will be charged to the defaulting buyer. Any account more than 30 days in arrears will be subject to a late payment charge of 1½% per month as long as the account remains in arrears. Any expenses incurred in securing payment from delinquent accounts will be charged to the defaulting buyer. A fee of $250.00 per check will be charged for each check returned for insufficient funds.

8. All lots are sold as genuine. Any lot accompanied by a certificate issued by The Philatelic Foundation within 5 years of the sale date or by Professional Stamp Experts since January 2004 is sold “as is” and in accordance with the description on the certificate. Such lots may not be returned for any reason, including but not limited to a contrary certificate of opinion. Buyers who wish to obtain a certificate for any item that does not have a P.F. or P.S.E. certificate (dated as above) may do so, provided that the following conditions are met: (1) the purchase price must be paid in full, (2) the item must be submitted to an acceptable expertizing committee with a properly executed application form within 21 days of the sale, (3) a copy of the application form must be given to the Galleries, (4) in the event that an adverse opinion is received, the Galleries retain the right to resubmit the item on the buyer’s behalf for reconsideration, without time limit or other restrictions, (5) unless written notification to the contrary is received, items submitted for certification will be considered cleared 90 days from the date of sale, and (6) in the event any item is determined to be “not as described”, the buyer will be refunded the purchase price and the certification fee up to $600.00 unless otherwise agreed.

9. Until paid for in full, all lots remain the property of the Galleries on behalf of the seller.

10. Agents executing bids on behalf of clients will be held responsible for all purchases made on behalf of clients unless otherwise arranged prior to the sale.

11. The buyer assumes all risk for delivery of purchased lots and agrees to pay for prescribed shipping costs. Buyers outside the U.S. are responsible for all customs duties.

12. The bidder consents that any action or proceeding against it may be commenced and maintained in any court within the State of New York or in the United States District Court for the Southern District of New York, that the courts of the State of New York and United States District Court for the Southern District of New York shall have jurisdiction with respect to the subject matter hereof and the person of the bidder. The bidder agrees not to assert any defense to any action or proceeding initiated by Galleries based upon improper venue or inconvenient forum. The bidder agrees that any action brought by the bidder shall be commenced and maintained only in a Federal Court in the United States District Court for the Southern District of New York or the State Court in the county in which Galleries has its principal place of business in New York. These Terms and Conditions shall be governed by and construed in accordance with the substantive laws of the State of New York.

Grades, Abbreviations and Values Used in Descriptions

Grades and Centering

Our descriptions contain detailed information and observations about each item’s condition. We have also assigned grades to stamps and covers, which reflect our subjective assessment. For stamps, the margin width, centering and gum are described and graded according to generally-accepted standards (an approximate correlation to numeric grades is provided at right). Although we believe our grades are accurate, they are not always exactly aligned with third-party grading terms or standards for all issues. A lot may not be returned because a certification service grades a stamp lower than the grade stated in the description. Information from the P.S.E. Stamp Market Quarterly and P.S.E. Population Report™ is the most current available, but lots may not be returned due to errors or changes in statistics or data.

Extremely Fine Gem (90-100): The term “Gem” describes condition that is the finest possible for the issue. This term is equivalent to “Superb” used by grading services.

Extremely Fine (80-90): Exceptionally large/width margins or near perfect centering.

Very Fine (70-85): Normal-size margins for the issue and well-centered with the design a bit closer to one side. “Very Fine and choice” applies to stamps that have desirable traits such as rich color, sharp impression, freshness or clarity of cancel.

Fine (60-70): Smaller than usual margins or noticeably off center. Pre-1890 issues may have the design touched in places.

Very Good (below 60): Attractive appearance, but margins or perforations cut into the design.

Symbols and Abbreviations (see chart above for gum symbols)
The postage stamps of Buenos Aires are listed erroneously in the stamp catalogues as provincial issues, like Corrientes, which they are not. Corrientes was one province in the Argentine Confederation, which used its own stamps in its local postal system and the confederation stamps in the completely separate national postal system.

On the other hand, Buenos Aires was an independent country in 1858, not part of Argentina. If there had been a United Nations in 1858, Buenos Aires would have been a separate member which issued its own stamps. The early stamp catalogues recognized this distinction and listed the stamps under Buenos Aires in the B’s, not under Argentina. After winning the persistent civil war, Buenos Aires joined the provinces of the Argentine Confederation in the Republic of Argentina and issued the Escuditos stamps.

The Barquitos stamps of Buenos Aires, named after the image of a steamship (“Little Ship”), are one of the rarest regularly-issued series in classic imperforate philately, immediately after the “Post Office” Mauritius, Hawaiian Missionaries and British Guiana Cotton Reels. In fact, in the first Scott postage stamp catalogue, the Barquitos have the highest listed prices.

Multiples and covers of the Barquitos are so rare that it is barely possible to form one major collection of Buenos Aires. Single stamps are the overwhelming majority of the existing Barquitos. These stamps were collected primarily by the great general classic imperforate collectors, particularly Alfred H. Caspary and Alfred F. Lichtenstein. When these collections were sold at auction in the 1958 Caspary and 1970 Dale-Lichtenstein sales, the Barquitos were acquired by Joseph Schatzkes, who was forming the major collection of Argentina at the time, and by John R. Boker Jr., who recognized the extreme philatelic importance of the Barquitos. When Stanley Gibbons broke up the Schatzkes collection, Boker added the primary items to his collection, which was sold at auction in 1979 by the German firm of Mohrmann. The most important material passed either directly or indirectly into the Islander collection, where it has resided up to this moment.

43° 1858, 2p ("Dos Ps") Blue (2). Horizontal pair, unused (no gum), margins clear on three sides and barely in at right, rich color, sealed tear in left stamp and reinforced crease in right, neither affecting beautiful appearance

VERY FINE APPEARANCE. ONE OF TWO RECORDED UNUSED PAIRS OF THE 2-PESO BLUE, WHICH ARE THE ONLY UNUSED MULTIPLES KNOWN.

Ex Sanchez. Signed A. Diena.......................................................... E. 2,000-3,000

44° 1858, 2p ("Dos Ps") Blue (2). Horizontal pair, unused (no gum), margins clear to in at bottom, small faults, still Fine appearance and exhibit-worthy, this is the other of the two recorded unused pairs, which are the only unused multiples of the 2p Blue, ex Sanchez

.......................................................... E. 750-1,000
1858, 2p ("Dos Ps") Blue (2). Full to large margins all around, bright shade, unc cancelled on folded cover to street address in Buenos Aires, back flap has a perfect bold strike of "Nuevas Mensagerias Nacionales de Jose Merlino" (Jose Merlino's New National Messenger Service) ornately framed oval handstamp with detailed illustration of four-horse stagecoach and passengers, opens up for display, receipt docketing dated April 16, 1859, file folds, slight wear and toning 

VERY FINE. A MAGNIFICENT BARQUITOS COVER WITH THE JOSE MERLINO STAGECOACH MARKING.

46

1858, 2p ("Dos Ps") **Indigo (2a).** Margins clear except just barely touched at top left, intense shade and impression, tied by **ponchito** cancel on folded cover to Cordoba, scattered toned spots and slight wear along folds, Very Fine, scarce shade on cover. E. 1,000-1,500

47

1858, 2p ("Dos Ps") **Blue (2).** Large margins at top and right, frameline complete at bottom and slightly in at left, tied by blue **ponchito** cancel, matching "Correos de Buenos Aires 2 Jun 58" circular datestamp on folded cover to Paysandu, Uruguay, red "Admon. de Correos * Montevideo * 30 Junio 58" red oval transit datestamp, sender’s routing "Por Vapor Corza", file folds clear of stamp, some stained spots and splits along folds, still Fine, colorful and scarce use of the **Barquitos** issue to Uruguay, ex Sanchez. E. 1,500-2,000
1858, 2p (“Dos Ps”) Blue, Diagonal Half Used as 1p (2b). Upper left diagonal half tied all around by “Correos de Buenos Aires 26 Abr 59” circular datetamp on folded cover to Gualeguaych, the bisect pays the reduced one-peso domestic rate in effect in 1859

VERY FINE. THIS IS BY FAR THE FINER OF THE TWO KNOWN EXAMPLES OF THE 2-PESO BLUE BISECT ON COVER.

Ex Gargantini, Kneitschel and Boker................................................................. E. 15,000-20,000
3-PESO ("TRES PS")

1858, 3p ("Tres Ps") Green (3). Cancelled by perfect bold blue ponchito cancel, matching "Correos de Buenos Aires 11 May 58" circular datestamp on blue folded cover to Rosario, sender's routing "pr Vapor '1er Argentina" and red "Fragueiro e Hijo, Buenos-Ayres" double-oval handstamp, neat receipt docketing on flap

EXTREMELY FINE IN ALL RESPECTS. A SUPERB FOUR-MARGIN EXAMPLE OF THE 3-PESO BARQUITOS ISSUE ON AN IMMACULATE AND COLORFUL COVER WITH RED AND BLUE MARKINGS.

After surveying numerous auction catalogues, in which fewer than a fifteen 3p covers could be found, we are confident that this is the finest of all. The Caspary collection had two choice 3p stamps on covers, but with black cancels. One similar cover with a four-margin stamp and blue cancels was located in the Gargantini collection (Corinphila Sale 46, Nov. 16-21, 1959), but that cover does not have the red oval handstamp, which adds significantly to the visual appeal of the cover offered here.

Ex Consul Weinberger ................................................................. E. 5,000-7,500
1858, 3p ("Tres Ps") Green (3). Large margins to clear of frameline at left, bright shade, tied by blurry blue ponchito cancel, matching “Renta de Correos San-Nicolas” double-oval handstamp on folded cover to Dr. Nicolas, minor splits and wear along folds

VERY FINE. AN EXTREMELY RARE USE OF THE 3-PESO BARQUITOS ISSUE FROM SAN NICOLAS.

Signed Bloch and Calves. Pencil notation indicates this was acquired from Theo del Pont in June 1914.................................................................

E. 3,000-4,000
4-PESO (“CUATO PS”)

51° 1858, 4p (“Cuato Ps”) Vermilion (4). Unused with small part gum which may be original, intense shade and impression, clear to ample margins with framelines on three sides, slightly in at top, scissors-cut at bottom right just touches frameline but could be trimmed off to leave a sound stamp
FINE. AN EXCEEDINGLY RARE UNUSED 4-PESO VERMILION. ONLY A HANDFUL OF THE UNUSED EXAMPLES OF THIS BARQUITOS ISSUE ARE SOUND.
As a measure of rarity, the Caspary collection included seven unused examples of the 4p Vermilion, all but one of which had faults.

Signed Kneitschel. Ex Sanchez. ............................................................... E. 2,000-3,000

52° 1858, 4p (“Cuato Ps”) Vermilion (4). Position 14, framelines surrounded by white margin on all sides, three large margins and ample at bottom, neat ponchito cancel, gorgeous intense shade and impression, tiny scissors-cut at lower left just into frameline only, of no significance in this superb used stamp
EXREMELY FINE. ONE OF THE FEW FOUR-MARGIN AND SOUND USED EXAMPLES OF THE 4-PESO BARQUITOS ISSUE. A GEM FOR THE CONNOISSEUR.
Signed Kneitschel. Ex Sanchez. ............................................................... E. 2,000-3,000
1858, 3p ("Tres Ps") Green, 4p ("Cuato Ps") Vermillion (3, 4). 3p with huge margins all around showing portions of surrounding stamps, rich color, 4p usual small margins to slightly in, deep shade, both well-tied by three strikes of ponchito cancel, bold "Correos de Buenos Aires 31 Ago 58" circular datestamp on folded letter to Rosaria, light file folds well clear of stamps.

VERY FINE. THIS IS THE ONLY RECORDED COVER BEARING A COMBINATION OF THE 3-PESO AND 4-PESO HIGH VALUES. THE ONLY OTHER COVER BEARING MORE THAN ONE DENOMINATION OF THE FIRST ISSUE IS THE EX-CASPARY 2-PESO AND 4-PESO COVER. THIS IS UNDOUBTEDLY THE MOST OUTSTANDING COVER OF BUENOS AIRES, AND, IN A RANKING OF ALL ITEMS, IT IS SECOND ONLY TO THE "IN PESO" TÊTE-BÊCHE PAIR.

On this cover the 3p and 4p Barquitos stamps prepay 7 pesos postage. The 5-peso "heavy" rate was required on a letter weighing between 12 and 16 adarmes (16 adarmes is the equivalent of one ounce). One peso was required for each additional 4 adarmes. Therefore, this folded letter weighed between 20 and 24 adarmes (1 1/4 to 1 1/2 ounce), requiring 7 pesos prepayment.

This is without question the most important of only four covers we record with a Barquitos combination, which are: 1) 2p and 4p to Corrientes, ex Caspary; 2) 3p and 4p to Rosario, the cover offered here; 3) 1p Brown and 4r Brown to Uruguay, offered in this sale as lot 73; and 4) 1p Blue and 4r Brown to Buenos Aires, offered in this sale (lot 74). These Barquitos combination frankings are among the highlights of the entire Islander collection.

Illustrated in the Kneitschel book (page 118). Ex Gargantini, Kneitschel, Amundsen and Boker................................................................. E. 75,000-100,000
1858, 4p ("Cuato Ps") Vermilion (4). Three large margins, slightly in along half of right frameline, gorgeous deep shade, tied by perfectly struck ponchito cancel on folded letter to Rosario, datelined Buenos Aires, Oct. 18, 1858, small stain spot at right

VERY FINE. ONE OF THE FINEST OF THE VERY FEW COVERS KNOWN WITH THE 4-PESO VERMILION BARQUITOS ISSUE.

The 4-peso rate was required on a letter weighing between 8 and 12 adarmes (1/2 to 3/4 ounce). Examples of the 4p Vermilion Barquitos on cover are exceedingly rare. Only a half-dozen 4p covers are known. As a measure of rarity, only cut-down portions of covers were offered in the sales of the Dale-Lichtenstein and Alemany collections.

Ex Consul Weinberger ................................................................. E. 15,000-20,000
1858, 4p ("Cuato Ps") Vermilion, Diagonal Half Used as 2p (4a). Upper left diagonal half with huge left sheet margin and full margin at top showing patterned frameline, uncancelled, originating on blue folded letter to Buenos Aires, datelined Dolores, Nov. 5, 1858, sender’s endorsement "Franco" indicating prepaid, some skillfully lightened stains and minor cosmetic reinforcement around edges

EXTREMELY FINE. THIS IS THE ONLY RECORDED EXAMPLE OF THE 4-PESO BISECT ON COVER. ONE OF THE MOST OUTSTANDING BARQUITOS ISSUE COVERS KNOWN.

Ex Jewell and "Mercedes" (Neuberger). With 1966 Kneitschel photo certificate .................. 
.............................................................................................................................................................................. E. 15,000-20,000
56* (**) 1858, 4p ("Cuato Ps") Chestnut Brown, Error of Color (4 unlisted variety). Position 15, unused with traces of gum which may be original, ample to large margins except touched at bottom left, rich unadulterated color in the distinct Chestnut Brown shade.

Very Fine. One of three recorded examples of the 4-peso Chestnut Brown color error. A major rarity of South American philately.

There are two unused and one used examples of the "Cuato Ps" (4-pesos) Barquitos in Chestnut Brown, a color that clearly differs from any of the normal Red/Vermilion shades of the April 1858 Issue. The color is also totally dissimilar to the Brown shades of the later printings of the "In Ps" (One-peso) and "Cuato rs" (4-reales) stamps from the modified plates. Furthermore, the plate positions of the three recorded 4p Chestnut Brown errors do not correspond with the "Ps" positions on the "Cuato rs" plate (5, 28, 33, 41), so we can be certain that the distinctive Chestnut Brown ink was used in conjunction with the 4-peso plate before it was modified. It probably resulted from an error in mixing inks between printing different denominations (the color is closer to some of the 5p shades than any others). Until the discovery of the used 4p Chestnut Brown, usage of the color error could not be verified. The used stamp offered in the following lot is evidence that the errors reached the post office. Due to its extreme rarity, the 4p Chestnut Brown color error has remained in relative obscurity, compared with color errors of other countries. We are confident that this sale will draw deserved attention to these important classic error stamps.

57* 1858, 4p ("Cuato Ps") Chestnut Brown, Error of Color (4 unlisted variety). Position 18, sharply-struck ponchito cancel, margins mostly clear of or just touching framelines, rich unadulterated color in the distinct Chestnut Brown shade, couple creases across corners at left.

Very Fine Appearance. The only used stamp among the three recorded examples of the 4-peso Chestnut Brown color error, providing evidence that this major rarity of South American philately was issued through the post office.

Until the discovery of this used 4p Chestnut Brown color error, status of the two unused examples was unclear. The used stamp offered here is evidence that the errors reached the post office. Due to its extreme rarity, the 4p Chestnut Brown color error has remained in relative obscurity, compared with color errors of other countries. We are confident that this sale will draw deserved attention to these important classic error stamps.

Positions 41 and 42, originally a horizontal pair (rejoined with hinge), left stamp unused (no gum), right stamp with large part original gum, huge sheet margins at left and bottom, others sides mostly clear of framelines, beautiful bright rich color, exceptionally fresh and entirely sound

EXTREMELY FINE. THIS REJOINED PAIR OF RARE UNUSED 5-PESO STAMPS IS THE CLOSEST PHILATELISTS CAN COME TO A MULTIPLE OF THE THREE HIGH VALUES OF THE FIRST BARQUITOS ISSUE. THE TWO STAMPS ARE ALSO AMONG THE FINEST UNUSED EXAMPLES OF THE 5-PESO EXTANT.

There are no intact multiples of the 3, 4 or 5-peso Barquitos stamps. Therefore, this rejoined pair of the 5-peso is the nearest example of a multiple.

The Peplow book (page 30) quotes the October 2, 1858, postal decree with the rate for a letter delivered within the city at 2 reales up to one ounce and 2 reales for each additional half-ounce. We question whether this 2-reales rate was really intended, because a) no 2-reales stamp was issued, b) not one example of the 4-reales stamp bisected for a 2-reales local rate exists, c) the customary rate for a local letter was half the regular rate, which would be 4 reales, and d) the October 15, 1859, decree set the local rate at 4 reales per 4 adarmes (quarter-ounce) plus 2 reales for each additional 4 adarmes. We suspect that the correct rate for a local letter was 4 reales, as exemplified by this cover.

EXTREMELY FINE. THE ONE-PESO "IN PS" BROWN IS MUCH Rarer ON COVER THAN GENERALLY APPRECIATED. THIS SUPERB FOUR-MARGIN STAMP ON A NEAT FOLDED COVER IS CERTAINLY ONE OF THE FINEST.

The Alemany collection contained two 1p “In Ps” Brown covers (both to foreign countries), but a survey of other important Buenos Aires collections revealed the great rarity of covers with this stamp. Peplow also observed its rarity, stating “Whatever may be the reason there is no doubt that the 1 peso brown ranks in rarity next after the 3 pesos” (page 33).

The “In Peso” Tête-Bêche Pair

Lot 82
History of The “In Peso” Tête-Bêche Pair

The “In Peso” tête-bêche pair is one of the most elusive and fascinating of all classic philatelic rarities. Indeed, it has been chosen as an Aristocrat of Philately on two occasions (Ameripex in 1986 and Amphilex in 1996), and it was a major highlight of the collections formed by Alfred H. Caspary, Lars Amundsen, Joseph Schatzkes, John R. Boker Jr. and Gabriel Sanchez.

The pair offered in this sale was once one of two extant, but is now generally accepted to be the sole surviving example. Its counterpart, the Ferrary-Lichtenstein horizontal tête-bêche pair, disappeared after its last appearance in 1940 and is presumed lost to philately.

To begin presenting the famous “In Peso” tête-bêche pair, we wish to reiterate a point made in the introduction to this sale catalogue. The Barquitos stamps were the first issues of the sovereign state of Buenos Aires. These stamps should not be considered a provincial issue of Argentina, because they were authorized and released in 1858 and 1859 when Buenos Aires was completely independent from the other provinces of Argentina. In this regard, the Scott Catalogue distorts the true nature of the Barquitos stamps by placing them in the Provincial Issues section that follows Argentina, along with the stamps of Cordoba and Corrientes.

Production of the First Barquitos Stamps

The Barquitos stamps were printed from metal plates created from stereotypes. The plates consisted of a thick piece of wood, on which 48 separate stereotyped clichés were mounted by hammering four small brass nails into the corners of each cliché. The small white holes in the printed design are the places where the nails were driven below the surface of the metal. To create the different denominations, the engraver produced one master die in metal with solid value tablets. Four separate matrices were made from the master die, and each was modified by cutting into the surface the 2, 3, 4 and 5-peso denominations: “Dos Ps”, “Tres Ps”, “Cuato Ps” [sic] and “Cinco Ps.” From these matrices, the 48 clichés for each denominated plate were stereotyped in the usual method. The process of making the clichés and hammering nails into each one introduced unique flaws that philatelists have used to identify the different subjects on the plate.

The first Barquitos stamps were issued in April 1858, comprising the 2, 3, 4 and 5-peso values in blue, green, red and orange, respectively. The lowest denomination corresponds to the basic single-letter rate of two pesos, which was authorized by the decree of April 9, 1858, and the other values were issued to prepay incrementally higher rates due to weight or special services, such as registration. In October 1858, the basic letter rate was lowered to one peso up to one ounce and four reales (one-half peso) for each additional half-ounce (weights were also expressed in adarmes; four adarmes being equal to approximately a quarter ounce).

The October 1858 and January 1859 Issues

Two new stamps were required for the October 1858 rates. Rather than produce new stereotypes and plates, which would require more time than was available, the Mint decided to modify two of the existing plates. The 4-peso “Cuato Ps” design was altered by cutting away the bottom of the oval of “P” to make it appear as “r” for “real.” This was done to each of the 48 clichés on the plate (actually, two escaped alteration completely, and two others were not fully altered, so that these stamps read “Ps”). The new One-peso denomination was created by taking the 5-peso “Cinco Ps” plate and cutting away the “C” and “co” to create the “In Ps” value. Again, all 48 clichés were altered in this manner.

The new “Cuato rs” (4-reales) and “In Ps” (One-peso) stamps were both issued in brown. Although the shades of the two stamps differed slightly, they were similar.
The 4-peso (“Cuato Ps”, left) was first changed in October 1858 to a 4-reales value by cutting away the lower part of the oval of “P” of “Ps” to make it read “rs” (“Cuato rs”, center). In January 1859 it was altered again by removing “Cua” and “o” of “Cuato rs” to make it read “T rs” or “To rs”, a rough approximation of “1 ps” (“T rs”, right). Each of the 48 clichés was altered in the manner.

The 5-peso (“Cinco Ps”, left) was changed in October 1858 to a One-peso value by cutting away “C” and “co” of “Cinco Ps” to make it read “In Ps” (right). Each of the 48 clichés was altered in the manner. The “In Ps” stamps were first printed in brown, then changed to blue to avoid confusion with the 4-reales stamps.

enough to cause confusion. The color of the “In Ps” was changed to blue on January 1, 1859. Around the same time, the “Cuato rs” plate was modified again for the purpose of printing more One-peso stamps. The new value was created by cutting away the “Cua” and “o” to leave “T rs.” The old adage, “good enough for government work,” seems to have applied to the product, a very rough approximation of “1 ps,” but officials probably felt that the color of the blue stamp would prevent any confusion.

THE INVERTED CLICHÉ AND TÊTE-BÊCHE MULTIPLES

The “In Ps” plate started to show signs of wear, and clichés were removed and reaffixed to the wood base. During this process, one of the clichés was reaffixed upside-down relative to the others on the plate. This inverted cliché is the cause of the One-peso Barquitos tête-bêche error, which differs entirely from tête-bêche printing varieties caused by a work-and-turn printing method, in which two impressions are made on the same sheet of paper, one upside down relative to the other. Cliché errors are true mistakes, while tête-bêche printing varieties are the products of method.

The cliché in Position 33 on the plate of 48 was inverted during at least one printing. The positions of the tête-bêche pair offered in this sale are shown.
According to the Peplow book on the Barquitos issues, the first clue that an inverted cliché existed on the “In Ps” plate was the report of a single stamp with part of the adjoining stamp rotated 180 degrees. The horizontal tête-bêche pair appeared in the Ferrary sale held on June 13, 1923. It was lot 146 and realized FFr 37,600 (including the 17.5% surcharge), an extraordinary sum for the time. On the day of sale, the exchange rate was 6.34 cents per franc, so the pair realized approximately US $2,400.

A comparison of the horizontal tête-bêche pair’s realization in the Ferrary sale with the prices for well-known United States rarities in the same sale shows how highly-regarded the “In Peso” tête-bêche pair was at the time. An extremely fine used 1c Type I (Scott 5), which would bring $300,000 today, sold for FFr 3,290 (US $208), and a 15c 1869 Invert (Scott 119b), the same unused copy that realized $757,100 in a recent auction, fetched FFr 21,737 ($1,378).

Around the time Ferrary’s pair reached the market and was acquired by Alfred F. Lichtenstein, another example of the “In Pesos” tête-bêche was discovered in Germany and sold to another great American collector, Alfred H. Caspary. The Caspary pair proved that Position 33 in the plate of 48 was upside down relative to all of the others. Position 33 is the first stamp in the fifth horizontal row. The stamp below is the bottom left corner position on the printed sheet (Position 41). There were two states of the “In Peso” plate, and both tête-bêche pairs came from the second state.

Lichtenstein exhibited his pair at the 1940 exhibition held at The Collectors Club of New York to commemorate 100 years of postage stamps. When Lichtenstein died and his daughter, Louise Boyd Dale, continued his philatelic legacy, it was assumed that she had possession of the pair. However, as the years and decades passed, the pair was never seen again, nor was it offered in the series of Dale-Lichtenstein public auctions held by the H. R. Harmer firm. After the last of the Dale-Lichtenstein collection was sold, any hope for the pair’s survival was lost.

After Caspary’s death, H. R. Harmer sold his South American collection in June 1958. Following Caspary the “In Peso” vertical tête-bêche pair was owned in succession by Lars Amundsen, Joseph Schatzkes, John R. Boker Jr., and Gabriel Sanchez. It entered the Islander collection at the October 28, 1982, Corinphila auction of the Sanchez collection (lot 8148), realizing CHF 181,500 (approximately US $89,000).

With the Ferrary-Lichtenstein pair lost to philately, the ex-Caspary pair survives as the unique example of this extraordinary error.

Information for Bidders

Bidding
The following means are available for placing bids:

1) Attending the Live Auction in Person: All bidders must register for a paddle, and new bidders must provide references at least three business days in advance of the sale.

2) Live Internet Bidding: Instructions for participating as a Live Internet Bidder are provided on the page opposite.

3) Phone Bidding: Bidders can be connected to the sale by phone and bid through a member of staff. Requests for phone bidding are subject to approval (please contact our office at least 24 hours before the sale). A signed Bid Form is required.

4) Absentee Bids. All bids received in advance of the sale, either by mail, fax, phone, e-mail or internet, are Absentee Bids, which instruct the auctioneer to bid up to a specific amount on one or more lots in the sale. Absentee Bids sent by phone, fax or e-mail should arrive at least one hour prior to the start of the sale session. Bids entered through Live Internet Bidding will be visible to the auctioneer during the sale. Written bids should be entered legibly on the Bid Form in the sale catalogue. E-mail and internet bids should be carefully typed and double-checked. All new bidders must provide references. We recommend calling or e-mailing to confirm that Absentee Bids sent by mail, fax or e-mail have been received and entered.

Pre-Sale Viewing
Subject to availability, certain lots (except group lots) can be sent to known clients for examination. Requests must be made no later than 7 days prior to the sale. Lots must be returned on the day received. Postage/insurance costs will be invoiced. In addition to regular viewing, clients may view lots by appointment. Our staff will be pleased to answer questions or provide additional information about lots.

Expert Certification
Individual items offered without a current certificate (PF dated within the past five years of sale; PSE dated January 2004 or later) may be purchased subject to independent certification of genuineness and our description. Please refer to the Conditions of Sale and Grading Terms for policies governing certification.

Shipping and Delivery
Procedures and charges for shipping lots are printed on the back of the Bid Form. Bidders are responsible for all prescribed shipping charges and any applicable sales tax or customs duties.

Price Realized
Prices realized are sent with each invoice. Bidders with e-mail will receive a Bid Results report after the sale. Session results are posted immediately to siegelauctions.com.
Live Internet Bidding at Siegel Auctions

Bidding from your computer lets you be part of the live auction from anywhere in the world!

There’s no substitute for following the auction in real time. Live Internet Bidding lets you bid and buy as though you were right there in the saleroom.

And it’s easy. Just start by following the simple steps to become a registered Live Internet Bidder. Once you’ve been approved for bidding, you can listen to the auction and place bids with the click of a mouse.

This step-by-step guide will instruct you how to register, set your browser and use the bidding interface.

1 Registering with Stamp Auction Network and Siegel Auction Galleries

Live Internet Bidding is managed by Stamp Auction Network (SAN). To bid, you must be registered and approved by both SAN and Siegel. To decide what you need to do, choose the description below that best fits you.

I’ve already registered with SAN and have been approved by Siegel for internet bidding. You’re ready for Step 2.

I’ve never registered with SAN, but I’m a Siegel client. Go to stampauctionnetwork.com/siegel and click on “Register” at the top. Check the box for Robert A. Siegel Auction Galleries (under “R”) and submit the form, indicating you are a Siegel client. Once registered at SAN, you’re ready for Step 2.

I’ve never registered with SAN, and this is the first time I’ve bid with Siegel. Go to stampauctionnetwork.com/siegel and click on “Register” at the top. Check the box for Robert A. Siegel Auction Galleries (under “R”) and submit the form with your trade references (please, no family members or credit card companies as references). Once registered at SAN and approved by Siegel for bidding, you’re ready for Step 2.

I’ve bid through SAN before, but this is the first time I’ve bid in a Siegel sale. Then you just need to be approved by Siegel. Go to stampauctionnetwork.com/siegel and click on “Update Registration” at the top. Your SAN account information will be sent to us for approval (you might be asked for other trade references). Once approved by Siegel for bidding, you can move to Step 2.

2 Using your browser for Live Internet Bidding and understanding the way it works.

Live Internet Bidding works by providing an audio feed of the auction (for anyone using Internet Explorer) and by allowing registered bidders to observe and place bids. The bidding interface shows a photo and description of the lot, the current bid (and your bidding status), and options for placing competitive bids. To join the auction, go to stampauctionnetwork.com/siegel. You can also log on at siegelauctions.com

The visual interface will work with any browser on both PC and Mac operating systems. However, the audio feed only works with Internet Explorer on a PC with ActiveX software installed. If ActiveX is not on your computer, you will have the option to install it.

Before bidding by internet for the first time, we recommend finding a sale in progress and listening to the public broadcast or logging in as a registered bidder. This will help you develop a feel for the sale tempo and bidding interface.

“System down” or “lost connection” events do occasionally happen. If you have any problems with Live Internet Bidding, please call 212-733-6421 for immediate assistance.

3 Using Live Internet Bidding to bid, track results and communicate with the auctioneer.

When you’re logged on as a Live Internet Bidder, the screen will display buttons with bid increments. After you click on a bid amount, the auctioneer is immediately notified of your bid. retracting a bid is usually not acceptable, so please bid carefully.

If you bid, then decide to stop, please use the “Pass” button, which appears once you’ve started bidding. This tells the auctioneer not to wait for another bid from you.

You can send messages to the auctioneer (for example, a request for extension). You can also track prior realizations from the bidding screen.
The property described in this catalogue will be offered at public auction by Robert A. Siegel Auction Galleries, Inc. (the “Galleries”) on behalf of various consignors and itself or affiliated companies. By bidding on any lot, whether directly or by or through an agent, in person, or by telephone, facsimile or any other means, the bidder acknowledges and agrees to all of the following Conditions of Sale.

1. The highest bidder acknowledged by the auctioneer shall be the buyer. The term “final bid” means the last bid acknowledged by the auctioneer, which is normally the highest bid offered. The purchase price payable by the buyer will be the sum of the final bid and a commission of 15% of the final bid (“buyer’s premium”), together with any sales tax, use tax or customs duties due on the sale.

2. The auctioneer has the right to reject any bid, to advance the bidding at his discretion and, in the event of a dispute between bidders, to determine the successful bidder, to continue the bidding or to reoffer and resell the lot in dispute. The Galleries’ record of the final sale shall be conclusive.

3. All bids are per numbered lot in the catalogue unless otherwise announced by the auctioneer at the time of sale. The right is reserved to group two or more lots, to withdraw any lot or lots from the sale, or to act on behalf of the seller. The Galleries will execute bidding instructions on behalf of clients, but will not be responsible for the failure to execute such bids or for any errors in the execution of such bids.

4. Lots with numbers followed by the symbol ° are offered subject to a confidential minimum bid ("reserve"), below which the lot will not be sold. The absence of the symbol ° means that the lot is offered without a reserve. If there is no reserve, the auctioneer has sole discretion to establish a minimum opening bid and may refuse an offer of less than half of the published estimate. Any lot that does not reach its reserve opening bid requested by the auctioneer will be announced as “passed” and excluded from the prices realized lists after the sale. The Galleries may have a direct or indirect ownership interest in any or all lots in the sale resulting from an advance of monies or goods-in-trade or a guarantee of minimum net proceeds made by the Galleries to the seller.

5. Subject to the exclusions listed in 5(A), the Galleries will accept the return of lots which have been misidentified or which have obvious faults that were present when the lot was in the Galleries’ custody, but not so noted in the lot description. All disputed lots must be received by the Galleries intact with the original packaging material within 5 days of delivery to the buyer but no later than 30 days from the sale date. (5A) EXCLUSIONS: The following lots may not be returned for any reason: lots containing 10 or more items; lots from buyers who registered for the pre-sale exhibition or received lots by postal viewing, thereby having had the opportunity to inspect them before the sale; any lot described with “faults,” “defects” or a specific fault may not be returned because of any secondary fault. Photographed lots may not be returned because of centering, margins, short/nibbed perforations or other factors shown in the illustrations. Lots may not be returned for any of the following reasons: the color of the item does not match the color reproduction in the catalogue or website listing; the description contains inaccurate information about the quantity known or reported; or a certification service grades a stamp lower than the grade stated in the description.

6. Successful bidders, unless they have established credit with the Galleries prior to the sale, must make payment in full before the lots will be delivered. Buyers not known to the Galleries must make payment in full within 3 days from the date of sale. The Galleries retains the right to demand a cash deposit from anyone prior to bidder registration and/or to demand payment at the time the lot is knocked down to the highest bidder, for any reason whatsoever. In the event that any buyer refuses or fails to make payment in cash for any lot at the time it is knocked down to him, the auctioneer reserves the right to reoffer the lot immediately for sale to the highest bidder. Credit cards are not accepted as payment.

7. If the purchase price has not been paid within the time limit specified above, nor lots taken up within 7 days from the date of sale, the lots will be resold by whatever means deemed appropriate by the Galleries, and any loss incurred from resale will be charged to the defaulting buyer. Any account more than 30 days in arrears will be subject to a late payment charge of 1½% per month as long as the account remains in arrears. Any expenses incurred in securing payment from delinquent accounts will be charged to the default. A fee of $25.00 per check will be charged for each check returned for insufficient funds.

8. All lots are sold as genuine. Any lot accompanied by a certificate issued by The Philatelic Foundation within 5 years of the sale date or by Professional Stamp Experts since January 2004 is sold “as is” and in accordance with the description on the certificate. Such lots may not be returned for any reason, including but not limited to a contrary certificate of opinion. Buyers who wish to obtain a certificate for any item that does not have a P.F. or P.S.E. certificate (dated as above) may do so, provided that the following conditions are met: (1) the purchase price must be paid in full, (2) the item must be submitted to an acceptable expertizing committee with a properly executed application form within 21 days of the sale, (3) a copy of the application form must be given to the Galleries, (4) in the event that an adverse opinion is received, the Galleries retain the right to resubmit the item on the buyer’s behalf for reconsideration, without time limit or other restrictions, (5) unless written notification to the contrary is received, items submitted for certification will be considered cleared 90 days from the date of sale, and (6) in the event any item is determined to be “not as described”, the buyer will be refunded the purchase price and the certification fee up to $600.00 unless otherwise agreed.

9. Until paid for in full, all lots remain the property of the Galleries on behalf of the seller.

10. Agents executing bids on behalf of clients will be held responsible for all purchases made on behalf of clients unless otherwise arranged prior to the sale.

11. The buyer assumes all risk for delivery of purchased lots and agrees to pay for prescribed shipping costs. Buyers outside the U.S. are responsible for all customs duties.

12. The bidder consents that any action or proceeding against it may be commenced and maintained in any court within the State of New York or in the United States District Court for the Southern District of New York, that the courts of the State of New York and United States District Court for the Southern District of New York shall have jurisdiction with respect to the subject matter hereof and the person of the bidder. The bidder agrees not to assert any defense to any action or proceeding initiated by the Galleries based upon improper venue or inconvenient forum. The bidder agrees that any action brought by the bidder shall be commenced and maintained in a Federal Court in the United States District Court for the Southern District of New York or the State Court in the county in which Galleries has its principal place of business in New York. These Terms and Conditions shall be governed by and construed in accordance with the substantive laws of the State of New York.

Grades, Abbreviations and Values Used in Descriptions

Grades and Centering

Our descriptions contain detailed information and observations about each item’s condition. We have also assigned grades to stamps and covers, which reflect our subjective assessment. For stamps, the margin width, centering and gum are described and graded according to generally-accepted standards (an approximate correlation to numeric grades is provided at right). Although we believe our grades are accurate, they are not always exactly aligned with third-party grading terms or standards for all issues. A lot may not be returned because a certification service grades a stamp lower than the grade stated in the description. Information from the P.S.E. Stamp Market Quarterly and P.S.E. Population ReportTM is the most current available, but lots may not be returned due to errors or changes in statistics or data.

Grades: Mint N.H., Original Gum (O.G.), No Gum

Extremely Fine Gem (90-100): The term “Gem” describes condition that is the finest possible for the issue. This term is equivalent to “Superb” used by grading services.

Extremely Fine (80-90): Exceptionally large/wide margins or near perfect centering.

Very Fine (70-85): Normal-size margins for the issue and well-centered with the design a bit closer to one side. “Very Fine and choice” applies to stamps that have desirable traits such as rich color, sharp impression, freshness or clarity of cancel.

Fine (60-70): Smaller than usual margins or noticeably off center. Pre-1890 issues may have the design touched in places.

Very Good (below 60): Attractive appearance, but margins or perforations cut into the design.

1890-1935 ISSUES

- Scott “Never Hinged” Values for Nos. 219-771

1935 TO DATE

- Scott Value for “Unused”
- Disturbed Original Gum: Gum showing noticeable effects of humidity, climate or hinging over more than half of the gum. The significance of gum disturbance in valuing a stamp in any of the Original Gum categories depends on the degree of disturbance, the rarity and normal gum condition of the issue and other variables affecting quality. For example, stamps issued in tropical climates are expected to have some gum disturbance due to humidity, and such condition is not considered a negative factor in pricing.

Covers

Minor nicks, short edge tears, flap tears and slight reduction at one side are normal conditions for 19th century envelopes. Folded letters should be expected to have at least one file fold. Light cleaning of covers and small mends along the edges are accepted forms of conservation. Unusual covers may have a common stamp with a slight crease or tiny tear. These flaws exist in virtually all 19th century covers and are not always described. They are not grounds for return.

Catalogue Values and Estimates

Unless otherwise noted, the currently available Scott Catalogue values are quoted in dollars with a decimal point. Other catalogues are often used for foreign countries or specialized areas and are referred to by their common name: Stanley Gibbons (SG), Dietz, American Air Mail Catalogue (AAMC), Michel, Zumstein, Facit, etc. Estimates are indicated with an “E.” and reflect our conservative valuation in dollars. Reserves will never exceed the low end of the estimate range; they will sometimes exceed Scott Catalogue value for stamps in Extremely Fine condition.

Because of certain pricing inconsistencies in the Scott Catalogue—for example, blocks that have no gum, the absence of premiums for Mint N.H. items, etc.—we cannot guarantee the accuracy of values quoted for multiples, specialized items and collection lots. We generally try to be conservative, but buyers may not return a lot because of a discrepancy in catalogue value due to Scott pricing inconsistencies.

Revised 1/2008
Chile

Chile has the distinction of being the major Perkins Bacon country in South America. Its first issue of postage stamps in 1853, its second London issue in 1855, and its third London issue in 1862 were all engraved and printed by the renowned British firm. Interspersed among these were the local Desmadryl and Gillet printings in 1854 and the Santiago Post Office printings after 1856.

The locally-produced stamps of 1854, particularly the Burnt Sienna stamps and the Lithograph stamps printed by Gillet, have always been considered the most important stamps of Chile. The Lithograph stamps are one of the great classic imperforate issues in the world, because of the wonderful transfer varieties which form the most remarkable group of lithographic varieties known to philately. These varieties resulted from folds in the transfer papers used to produce the lithographic stones. They have been studied for over a century since the astonishing discovery, almost fifty years after their production, that some Chilean imperforates had been produced by lithography. From the incredible “big squeezes,” where almost the entire denomination is missing from the bottom of the stamp, to squeezed corners and letters, there is a range of the lithographic varieties unrivaled in classic philately.

As early as 1923, a listing of the known lithographic varieties was published by Fred D. Walters of England. The great Chile collector, Joaquin Galvez, formed the largest collection of Chile up to the time of its dispersal by Corinphila in 1979. Galvez specialized in the Lithographs to the degree that he boasted having more than 400 copies, including the two recorded blocks of six.

The second major collection of Chile after World War II, aside from the general classic imperforate collections which contained substantial holdings of mostly single copies of the imperforates, was the Jean Dupont collection formed by the important Belgium collector, who was best known for his major collection of Spain. His Chile collection was auctioned by Willy Balasse in London in 1981.

The major items from the Galvez and Dupont collections were acquired by Gerhard Blank and Islander. The Blank collection was sold at auction by Christie’s Robson Lowe in 1991.

The third important collection of Chile after World War II was the Helen Novy collection formed by her with the assistance of her father, B. D. Forster, a prominent collector in the United States. This collection included the greatest piece in Chile, the famous cover bearing a block of fourteen of the Lithograph. The Novy collection was purchased intact by Islander in 1967 and became the foundation of his collection of Chile classics.

In 1994 Islander decided to concentrate exclusively on the Lithographs, and the rest of his Chile collection was auctioned by Corinphila. This became the basis of the Joseph Hackmey Large Gold collection of Chile. However, the Lithographs never became available. Indeed, the Lithograph block of fourteen on cover, considered one of the greatest covers of classic imperforate philately, had been found in a Paris flea market after World War II, was acquired by Helen Novy shortly after its discovery, and has been in the Islander collection for forty years since his purchase of the Novy collection. It has never been on the open market.
107° 1854, 5c Red Brown, Lithograph (7a). Part original gum, three large margins and full at bottom, rich color and exceptionally fresh

Very fine. The 5-Centavos Lithograph is exceedingly rare in original-gum condition.

This is certainly one of the finest examples of the 1854 5c Lithograph with original gum........

E. 1,500-2,000

108° 1854, 5c Deep Red Brown, Lithograph (7b). Unused (no gum), large margins, intense shade and impression on bright fresh paper

Extremely fine gem. One of the finest unused examples of the 5-Centavos Lithograph we have ever encountered, possessing an extraordinary depth of color and impression for a lithographed issue.

Looking at this stamp, it is easy to understand how Gillet was able to use lithography without anyone noticing. The government objected to the use of lithography and never authorized it, but the stamps were so expertly printed, apparently no one noticed until nearly fifty years later when stamp collectors identified the lithographed stamps............... The 1854 Lithograph Block on Cover

Lot 119
History of The 1854 Lithograph Block on Cover

The most famous item in Chilean philately is the cover bearing the block of fourteen 5-centavos Lithograph stamps. Indeed, this item is so remarkable and rare that it has been shown in the Aristocrats of Philately displays on three separate occasions (Anphilex 1971, Interphil 1976 and Ameripex 1986) and has been described by Gerhard Blank, the preeminent expert on Chile, as “the most outstanding ‘Colon’ cover of them all.”

Unlike other famous and valuable stamps, the Lithograph cover has not earned its acclaim by trading in the marketplace at record prices. In fact, it has never been offered at public auction, nor has it changed owners during the past forty years. The Lithograph cover’s prominence on the stage of worldwide philately has been earned exclusively on its philatelic merits, which are extraordinary. To appreciate the cover’s special qualities, it is best to begin with the remarkable story of the Lithograph issue.

THE LITHOGRAPHS PRINTED BY GILLET

Chile’s postal reform law authorizing the first postage stamps went into effect on July 1, 1853, and the first issue was engraved and printed by the British firm of Perkins, Bacon & Company. Stamps were not actually distributed through post offices, but were sold by estancos, local agents who were in charge of government monopolies on products such as salt, tobacco and playing cards (Blank, p. 10).

The demand for stamps was greater than expected, and supplies from Perkins Bacon were running low by the end of 1853. The government, unable to arrange its own printing operation in time, turned to two local printers, N. Desmadryl and H. Gillet of Santiago. Desmadryl was a renowned engraver and printer, and his prints from the steel plates furnished by Perkins Bacon were so skillfully executed, the impressions are arguably superior to the London prints. However, because Desmadryl was too busy with his regular business to meet the government’s demands for more stamps, the next order was given to Gillet, whose skills and experience were in lithography, not recess-printing.

Gillet tried to print from the engraved plates, but his inks and technique were ill-suited for the task. Consequently, Gillet’s recess-printed stamps were of poor quality, but the watermarked paper provided by the government was so carefully controlled, Gillet eventually had to turn over the unsatisfactory recess-printed stamps. Faced with his own failure to produce quality impressions from engraved plates, Gillet decided to switch to lithography, a printing method that was generally not favored by the government, and certainly was never authorized.

Using transfer paper, Gillet made a lithographic stone plate of 240 subjects, the number required to fill up the sheet of tightly-controlled watermarked security paper. Based on research by Gerhard Blank, we know that at least two stones were made; one from a single transfer of 240 subjects, which resulted in numerous transfer flaws, and another built up from multiple transfers, which allowed for greater control in transferring the designs. The rarity of examples of the transfer flaws indicates that the stone made from the single 240-subject transfer was not used to print many sheets.

Gillet’s Lithographs were so finely printed that they were considered to be engraved for almost fifty years. In 1898 the first report of the Lithographs was published by John N. Luff. The “squeeze” varieties were brought to Perkins Bacon in England for analysis, and it was confirmed that such flaws could only occur in stamps printed by lithography. Thus, Gillet’s “switch” finally came to light, and a major new classic imperforate issue was born.

Experts have determined that only 500 sheets of Lithograph stamps were printed. Multiples in strip form are rare, and only three blocks are known. All three are presented in this sale, including the block of fourteen on cover.
THE 1854 LITHOGRAPH BLOCK ON COVER

1854, 5c Red Brown, Lithograph (7a). Horizontal block of fourteen, large even margins on three sides, touched to slightly in at left, beautiful rich color and proof-like impression, tied by multiple strikes of four-ring cancel, red "Santiago 10 Agto 54" circular datestamp on blue folded cover to Valparaiso, from the Jagerschmidt & Julian correspondence, slight toning along horizontal fold well clear of block, which is perfect.

EXTREMELY FINE. THE LARGEST AND FINEST OF THE THREE RECORDED 5-CENTAVOS LITHOGRAPH BLOCKS AND THE ONLY ONE KNOWN ON COVER. THIS ASTOUNDING COVER IS APTLY DESCRIBED BY GERHARD BLANK AS "THE MOST OUTSTANDING 'COLON' COVER OF THEM ALL" IN HIS DEFINITIVE BOOK ON THE 1853-1867 ISSUES OF CHILE. OFFERED AT PUBLIC AUCTION FOR THE FIRST TIME SINCE ITS DISCOVERY IN A PARIS FLEA MARKET SHORTLY AFTER WORLD WAR II.

The 1854 Lithograph stamps are extremely rare in multiples. Only one unused pair is recorded, and strips of three or larger are rare on or off cover. As for blocks, there are just three: 1) the block of fourteen on the cover to Valparaiso offered here; 2) block of six, ex Caspar and Galvez, offered in this sale as lot 120; and 3) block of six, ex Walters and Galvez, offered in this sale as lot 121.

This remarkable cover, bearing a block of fourteen in perfect condition and well-tied by the four-ring cancellation, was completely unknown to philatelists until shortly after World War II when it was discovered in a flea market in Paris. It was acquired by John F. Rider and then sold to Helen Novy, a collector and the daughter of another famous collector, B. D. Forster, whose pencil signature is on the back of this cover. Islander acquired it in 1967 as part of the entire Novy collection of Chile.

Exhibited in the Aristocrats of Philately displays at Anphilex 1971, Interphil 1976 and Ameripex 1986. Illustrated in Gerhard Blank’s Chile: First Issues of Postage Stamps 1853-1867, where described as “The most outstanding 'Colon' cover of them all.”... E. 400,000-500,000

LITHOGRAPHIC TRANSFER FLAWS

The 1854 Lithographs were printed from two stones; one made from a single 240-subject transfer, and the other from multiple transfers. The large 240-subject transfer, using ultra-thin lithographic transfer paper, must have been difficult to execute, and the result was a large number of folds which produced a range of “squeezes” in the printed impressions. The presence of the transfer flaws is what led to the proper identification of the Lithographs almost fifty years after they were issued. These are among the most striking printing varieties in classic philately, and all of them are rare.

Information for Bidders

Bidding
The following means are available for placing bids:

1) Attending the Live Auction in Person: All bidders must register for a paddle, and new bidders must provide references at least three business days in advance of the sale.

2) Live Internet Bidding: Instructions for participating as a Live Internet Bidder are provided on the page opposite.

3) Phone Bidding: Bidders can be connected to the sale by phone and bid through a member of staff. Requests for phone bidding are subject to approval (please contact our office at least 24 hours before the sale). A signed Bid Form is required.

4) Absentee Bids. All bids received in advance of the sale, either by mail, fax, phone, e-mail or internet, are Absentee Bids, which instruct the auctioneer to bid up to a specific amount on one or more lots in the sale. Absentee Bids sent by phone, fax or e-mail should arrive at least one hour prior to the start of the sale session. Bids entered through Live Internet Bidding will be visible to the auctioneer during the sale. Written bids should be entered legibly on the Bid Form in the sale catalogue. E-mail and internet bids should be carefully typed and double-checked. All new bidders must provide references. We recommend calling or e-mailing to confirm that Absentee Bids sent by mail, fax or e-mail have been received and entered.

Pre-Sale Viewing
Subject to availability, certain lots (except group lots) can be sent to known clients for examination. Requests must be made no later than 7 days prior to the sale. Lots must be returned on the day received. Postage/insurance costs will be invoiced. In addition to regular viewing, clients may view lots by appointment. Our staff will be pleased to answer questions or provide additional information about lots.

Expert Certification
Individual items offered without a current certificate (PF dated within the past five years of sale; PSE dated January 2004 or later) may be purchased subject to independent certification of genuineness and our description. Please refer to the Conditions of Sale and Grading Terms for policies governing certification.

Shipping and Delivery
Procedures and charges for shipping lots are printed on the back of the Bid Form. Bidders are responsible for all prescribed shipping charges and any applicable sales tax or customs duties.

Price Realized
Prices realized are sent with each invoice. Bidders with e-mail will receive a Bid Results report after the sale. Session results are posted immediately to siegelauctions.com
Bidding from your computer lets you be part of the live auction from anywhere in the world!

There’s no substitute for following the auction in real time. Live Internet Bidding lets you bid and buy as though you were right there in the saleroom.

And it’s easy. Just start by following the simple steps to become a registered Live Internet Bidder. Once you’ve been approved for bidding, you can listen to the auction and place bids with the click of a mouse.

This step-by-step guide will instruct you how to register, set your browser and use the bidding interface.

1 Registering with Stamp Auction Network and Siegel Auction Galleries

Live Internet Bidding is managed by Stamp Auction Network (SAN). To bid, you must be registered and approved by both SAN and Siegel. To decide what you need to do, choose the description below that best fits you.

I’ve already registered with SAN and have been approved by Siegel for internet bidding. You’re ready for Step 2.

I’ve never registered with SAN, but I’m a Siegel client. Go to stampauctionnetwork.com/siegel and click on “Register” at the top. Check the box for Robert A. Siegel Auction Galleries (under “R”) and submit the form, indicating you are a Siegel client. Once registered at SAN, you’re ready for Step 2.

I’ve never registered with SAN, and this is the first time I’ve bid with Siegel. Go to stampauctionnetwork.com/siegel and click on “Register” at the top. Check the box for Robert A. Siegel Auction Galleries (under “R”) and submit the form with your trade references (please, no family members or credit card companies as references). Once registered at SAN and approved by Siegel for bidding, you’re ready for Step 2.

I’ve bid through SAN before, but this is the first time I’ve bid in a Siegel sale. Then you just need to be approved by Siegel. Go to stampauctionnetwork.com/siegel and click on “Update Registration” at the top. Your SAN account information will be sent to us for approval (you might be asked for other trade references). Once approved by Siegel for bidding, you can move to Step 2.

2 Using your browser for Live Internet Bidding and understanding the way it works.

Live Internet Bidding works by providing an audio feed of the auction (for anyone using Internet Explorer) and by allowing registered bidders to observe and place bids. The bidding interface shows a photo and description of the lot, the current bid (and your bidding status), and options for placing competitive bids. To join the auction, go to stampauctionnetwork.com/siegel. You can also log on at siegelauctions.com.

The visual interface will work with any browser on both PC and Mac operating systems. However, the audio feed only works with Internet Explorer on a PC with ActiveX software installed. If ActiveX is not on your computer, you will have the option to install it.

Before bidding by internet for the first time, we recommend finding a sale in progress and listening to the public broadcast or logging in as a registered bidder. This will help you develop a feel for the sale tempo and bidding interface.

“System down” or “lost connection” events do occasionally happen. If you have any problems with Live Internet Bidding, please call 212-753-6421 for immediate assistance.

3 Using Live Internet Bidding to bid, track results and communicate with the auctioneer.

When you’re logged on as a Live Internet Bidder, the screen will display buttons with bid increments. After you click on a bid amount, the auctioneer is immediately notified of your bid. Retracting a bid is usually not acceptable, so please bid carefully.

If you bid, then decide to stop, please use the “Pass” button, which appears once you’ve started bidding. This tells the auctioneer not to wait for another bid from you.

You can send messages to the auctioneer (for example, a request for extension). You can also track prior realizations from the bidding screen.
Conditions of Sale (please read carefully before bidding)

The property described in this catalogue will be offered at public auction by Robert A. Siegel Auction Galleries, Inc. (“Galleries”) on behalf of various consignors and itself or affiliated companies. By bidding on any lot, whether directly or by or through an agent, in person, or by telephone, facsimile or any other means, the bidder acknowledges and agrees to all of the following Conditions of Sale.

1. The highest bidder acknowledged by the auctioneer shall be the buyer. The term “final bid” means the last bid acknowledged by the auctioneer, which is normally the highest bid offered. The purchase price payable by the buyer will be the sum of the final bid and a commission of 15% of the final bid (“buyer’s premium”), together with any sales tax, use tax or customs duties due on the sale.

2. The auctioneer has the right to reject any bid, to advance the bidding at its discretion and, in the event of a dispute between bidders, to determine the successful bidder, to continue the bidding or to reoffer and resell the lot in dispute. The Galleries’ record of the final sale shall be conclusive.

3. All bids are per numbered lot in the catalogue unless otherwise announced by the auctioneer at the time of sale. The right is reserved to group two or more lots, to withdraw any lot or lots from the sale, or to act on behalf of the seller. The Galleries will execute bidding instructions on behalf of clients, but will not be responsible for the failure to execute such bids or for any errors in the execution of such bids.

4. Lots with numbers followed by the symbol “*” are offered subject to a confidential minimum bid (“reserve”), below which the lot will not be sold. The absence of the symbol “*” means that the lot is offered without a reserve. If there is no reserve, the auctioneer has sole discretion to establish a minimum opening bid and may refuse an offer of less than half of the published estimate. Any lot that does not reach its reserve or opening bid requested by the auctioneer will be announced as “passed” and excluded from the prices realized lists after the sale. The Galleries may have a direct or indirect ownership interest in any or all lots in the sale resulting from an advance of monies or goods-in-trade or a guarantee of minimum net proceeds made by the Galleries to the seller.

5. Subject to the exclusions listed in 5(A), the Galleries will accept the return of lots which have been misidentified or which have obvious faults that were present when the lot was in the Galleries’ custody, but not so noted in the lot description. All disputed lots must be received by the Galleries intact with the original packing material within 5 days of delivery to the buyer but no later than 30 days from the date sale. (5A) EXCLUSIONS: The following lots may not be returned for any reason: lots containing 10 or more items; lots from buyers who registered for the pre-sale exhibition or received lots by postal viewing, thereby having had the opportunity to inspect them before the sale; any lot described with “faults,” “defects” or a specific fault may not be returned because of any secondary fault. Photographed lots may not be returned because of centering, margins, short/nibbed perforations or other factors shown in the illustrations. Lots may not be returned for any of the following reasons: the color of the item does not match the color reproduction in the sale catalogue or website listing; the description contains inaccurate information about the quantity known or reported; or a certification service grades a stamp lower than the grade stated in the description.

6. Successful bidders, unless they have established credit with the Galleries prior to the sale, must make payment in full before the lots will be delivered. Buyers not known to the Galleries must make payment in full within 3 days from the date of sale. The Galleries retains the right to demand a cash deposit from anyone prior to bidder registration and/or to demand payment at the time the lot is knocked down to the highest bidder, for any reason whatsoever. In the event that any buyer refuses or fails to make payment in cash for any lot at the time it is knocked down to him, the auctioneer reserves the right to reoffer the lot immediately for sale to the highest bidder. Credit cards are not accepted as payment.

7. If the purchase price has not been paid within the time limit specified above, nor lots taken up within 7 days from the date of sale, the lots will be resold by whatever means deemed appropriate by the Galleries, and any loss incurred from resale will be charged to the defaulting buyer. Any account more than 30 days in arrears will be subject to a late payment charge of 1% per month as long as the account remains in arrears. Any expenses incurred in securing payment from delinquent accounts will be charged to the defaulting buyer. A fee of $250.00 per check will be charged for each check returned for insufficient funds.

8. All lots are sold as genuine. Any lot accompanied by a certificate issued by The Philatelic Foundation within 5 years of the sale date or by Professional Stamp Experts since January 2004 is sold “as is” and in accordance with the description on the certificate. Such lots may not be returned for any reason, including but not limited to a contrary certificate of opinion. Buyers who wish to obtain a certificate for any item that does not have a P.F. or P.S.E. certificate (dated as above) may do so, provided that the following conditions are met: (1) the purchase price must be paid in full, (2) the item must be submitted to an acceptable expertizing committee with a properly executed application form within 21 days of the sale, (3) a copy of the application form must be given to the Galleries, (4) in the event that an adverse opinion is received, the Galleries retain the right to resubmit the item on the buyer’s behalf for reconsideration, without time limit or other restrictions, (5) unless written notification to the contrary is received, items submitted for certification will be considered cleared 90 days from the date of sale, and (6) in the event any item is determined to be “not as described”, the buyer will be refunded the purchase price and the certification fee up to $600.00 unless otherwise agreed.

9. Until paid for in full, all lots remain the property of the Galleries on behalf of the seller.

10. Agents executing bids on behalf of clients will be held responsible for all purchases made on behalf of clients unless otherwise arranged prior to the sale.

11. The buyer assumes all risk for delivery of purchased lots and agrees to pay for prescribed shipping costs. Buyers outside the U.S. are responsible for all customs duties.

12. The bidder consents that any action or proceeding against it may be commenced and maintained in any court within the State of New York or in the United States District Court for the Southern District of New York, that the courts of the State of New York and United States District Court for the Southern District of New York shall have jurisdiction with respect to the subject matter hereof and the person of the bidder. The bidder agrees not to assert any defense to any action or proceeding initiated by Galleries based upon improper venue or inconvenient forum. The bidder agrees that any action brought by the bidder shall be commenced and maintained only in a Federal Court in the United States District Court for the Southern District of New York or the State Court in the county in which Galleries has its principal place of business in New York. These Terms and Conditions shall be governed by and construed in accordance with the substantive laws of the State of New York.

**Grades, Abbreviations and Values Used in Descriptions**

### Grades and Centering

Our descriptions contain detailed information and observations about each item’s condition. We have also assigned grades to stamps and covers, which reflect our subjective assessment. For stamps, the margin width, centering and gum are described and graded according to generally-accepted standards (an approximate correlation to numeric grades is provided at right). Although we believe our grades are accurate, they are not always exactly aligned with third-party grading terms or standards for all issues. A lot may not be returned because a certification service grades a stamp lower than the grade stated in the description. Information from the P.S.E. Stamp Market Quarterly and P.S.E. Population Report™ is the most current available, but lots may not be returned due to errors or changes in statistics or data.

**Extremely Fine Gem (90-100):** The term “Gem” describes condition that is the finest possible for the issue. This term is equivalent to “Superb” used by grading services.

**Extremely Fine (80-90):** Exceptionally large/width margins or near perfect centering.

**Very Fine (70-85):** Normal-size margins for the issue and well-centered with the design a bit closer to one side. “Very Fine and choice” applies to stamps that have desirable traits such as rich color, sharp impression, freshness or clarity of cancel.

**Fine (60-70):** Smaller than usual margins or noticeably off center. Pre-1890 issues may have the design touched in places.

**Very Good (below 60):** Attractive appearance, but margins or perforations cut into the design.

- Disturbed Original Gum: Gum showing noticeable effects of humidity, climate or hinging over more than half of the gum. The significance of gum disturbance in valuing a stamp in any of the Original Gum categories depends on the degree of disturbance, the rarity and normal gum condition of the issue and other variables affecting quality. For example, stamps issued in tropical climates are expected to have some gum disturbance due to humidity, and such condition is not considered a negative factor in pricing.

### Covers

Minor nicks, short edge tears, flap tears and slight reduction at one side are normal conditions for 19th century envelopes. Folded letters should be expected to have at least one file fold. Light cleaning of covers and small mends along the edges are accepted forms of conservation. Unusual covers may have a common stamp with a slight crease or tiny tear. These flaws exist in virtually all 19th century covers and are not always described. They are not grounds for return.

### Catalogue Values and Estimates

Unless otherwise noted, the currently available Scott Catalogue values are quoted in dollars with a decimal point. Other catalogues are often used for foreign countries or specialized areas and are referred to by their common name: Stanley Gibbons (SG), Ditz, American Air Mail Catalogue (AAMC), Michel, Zumstein, Facit, etc. Estimates are indicated with an “E.” and reflect our conservative valuation in dollars. Reserves will never exceed the low end of the estimate range; they will sometimes exceed Scott Catalogue value for stamps in Extremely Fine condition.

Because of certain pricing inconsistencies in the Scott Catalogue—for example, blocks that have no gum, the absence of premiums for Mint N.H. items, etc.—we cannot guarantee the accuracy of values quoted for multiples, specialized items and collection lots. We generally try to be conservative, but buyers may not return a lot because of a discrepancy in catalogue value due to Scott pricing inconsistencies.

Revised 1/2008
Columbia is an excellent example of a classic imperforate country where there can be at most two major collections at any moment in time. Indeed, if postal history is considered important, there can barely be one major collection, because of the scarcity of early covers bearing Colombian stamps. Until well after World War II, the major Colombia collections had very few covers, but instead concentrated on multiples, the rare tête-bêche and se-tenant errors, and cancellations on individual stamps.

Prior to World War II, Thomas William Hall, although better known for his Peru collection, had a substantial holding of Colombia, which formed the basis of the Saul Newbury collection. The Newbury collection was by far the finest Colombia collection up to the time of its sale in 1955 to a South American stamp dealer named Rachitoff, who sold it to the Luder family of Corinphila. Corinphila offered most of the Newbury collection at auction in 1956. They also sold parts of the Newbury collection to Jacobo Neuberger, which formed the basis of his Colombia collection.

The other major holding of Colombia in the 1940’s and 1950’s was the Federico Larsen collection, which was formed in Colombia and sold at auction by Corinphila in 1960. The Newbury and Larsen collections became the basis of all subsequent collections, including the most important, the “Gordon N. John” collection and the Hugo Geoggel collection. Aside from covers, which were not prevalent in the Newbury and Larsen collections, remarkably little has surfaced in the past fifty years. Most of the major Islander pieces can be traced back to these two collections, while the covers were acquired one at a time over thirty years. No other collection of 1859 First Issue covers has ever come close to the Islander collection.

The most comprehensive and accurate reference to the stamps and covers of Colombia is Dieter Bortfeldt’s Colombia Philatelic Handbook and Catalogue, published by the Colombian Philatelic Research Society. We have referred to the Bortfeldt handbook throughout this sale catalogue. Page numbers refer to the hardbound edition.

FOURTH SESSION (LOTS 165-204)
FRIDAY, JUNE 6, 2008, AT 1:30 P.M.

THE ISLANDER COLLECTION OF COLOMBIA

1859 FIRST ISSUE

165°TC  1859, 2½c Brown, Trial Color Plate Proof (1TC). Large margins, rich color, Extremely Fine, scarce proof .................................................. E. 200-300

166°TC  1859, 10c Green, Trial Color Plate Proof (4TC). Large margins, small spot at bottom, couple tiny imperfections, otherwise Very Fine, scarce ........................................ E. 200-300

167°TC  1859, 10c Light Blue, Trial Color Plate Proof (4TC). Ample margins, faint stain, couple tiny imperfections, otherwise Very Fine, scarce................................. E. 150-200

168°  1859, 2½c-1p First Issue Study Collection (1-7). Small stockbook, some loose cards and auction lot sheets containing more than 400 stamps, some in multiples, every denomination and shade represented including some very scarce examples, approximately 100 mixed denominations are arranged by cancellation, including some beautiful strikes and colored markings, the other 300 or so stamps are arranged by denomination and shades, including the following approximate quantities (unused/used): 2½c (32/16), 5c Stone A Violet shades (16/22) and Stone B Blue shades (19/8), 10c (25/13, including scarce Chocolate shades), 20c (60/32) and 1p (52/8, including five on bluish paper), a few of the highlights are shown above, including scarce unused single and used strip of three of the 5c Reddish Violet Stone A, 5c & 10c early shades tied on piece, 10c Chocolate pair, 20c Stone A block, 1p single on bluish paper, and 1p blocks (one on unusual grayish paper), some degree of small faults to be expected, but overall this is far above the typical Colombia First Issue condition with many superb stamps throughout, a rare opportunity to acquire Islander’s working study collection, representing 40 years of selection from important sales.................................(Photo Ex)  E. 7,500-10,000
169★ 1859, 2½c Olive Green (1b). Positions 51-55, horizontal strip of five with full corner sheet margins, original gum, large margins all around, rich color, usual gum creasing, negligible small thin between two stamps at left

EXTREMELY FINE. A VERY RARE ORIGINAL-GUM MULTIPLE OF THE 1859 2½-CENTAVOS OLIVE GREEN.

Illustrated as part of plate reconstruction in Bortfeldt handbook (page 19). Ex Boker

E. 1,500-2,000
170°(*) 1859, 2½c Yellow Green (1a). Positions 7-11 thru 51-55, block of 25 from the right side of the sheet, large margins including sheet margins, unused (no gum), bright shade, faint creases, small tear in right sheet margin, couple thin spots

VERY FINE APPEARANCE. THIS IS THE LARGEST RECORDED MULTIPLE OF THE 1859 2½-CENTAVOS, OF WHICH VERY FEW UNUSED BLOCKS ARE KNOWN. A SPECTACULAR EXHIBITION ITEM AND IMPORTANT ARTIFACT OF CLASSIC COLOMBIAN PHILATELY.

The Bortfeldt handbook (page 18) mentions the existence of unused blocks “up to 25 stamps,” referring to this block, which is the only one known of its size.

Ex Newbury................................................................. E. 10,000-15,000
**171°**

**1859, 2½c Olive Green (1b).** Block of four, large margins, cancelled by “HONDA/FRANCA” oval, beautiful color and impression, corner crease and a few very slight thin spots, Extremely Fine appearance, the Bortfeldt handbook (page 18) mentions used blocks of six (one known) and four (two known), but this block cancelled by the Honda oval is not noted ............................................. E. 1,000-1,500

**172°**

**1859, 2½c Green (1).** Horizontal strip of six, large margins almost all around but touched at bottom where misaligned transfers are shifted downward, beautiful bright color, cancelled by two clear strikes of Medellin Nov. 10, 1859 framed receiving date-stamp in blue, corner crease and small sealed tear at top, still Very Fine, a rare multiple, the Bortfeldt handbook (page 18) shows a strip of six and block of six as the two largest used multiples, this strip of equal size is not mentioned, ex Burrus ....... E. 1,000-1,500
1859, 5c Blue Violet (3c). Vertical block of ten from Stone A (First Stone), original gum, sheet margins at top and bottom, large to clear at sides, distinctive shade — not a Reddish Violet but clearly the Blue Violet associated with the Stone A printings — slight lightning-shaped creasing attributable to gum, two bottom stamps have small thins

VERY FINE. THIS IS THE ONLY RECORDED UNUSED MULTIPLE FROM STONE A. WHICH IS SIGNIFICANT BECAUSE THIS WAS THE FIRST STONE USED TO PRINT THE 5-CENTAVOS FIRST ISSUE AND UNUSED EXAMPLES FROM STONE A ARE RARE IN ANY FORM. THIS REMARKABLE BLOCK WAS VIRTUALLY UNKNOWN TO SPECIALISTS UNTIL IT EMERGED IN EUROPE IN 1980. ONE OF THE GREAT ITEMS OF COLOMBIA AND OF SOUTH AMERICAN PHILATELY IN GENERAL.

The Bortfeldt handbook (page 27) illustrates the Stone A used block of ten offered in the following lot (same positions) and alludes to the block offered here: “It is said, but not confirmed, that a similar strip [block] exists in mint condition.” ......... E. 20,000-30,000
174°

**1859, 5c Violet (3).** Vertical block of ten from **Stone A (First Stone),** top sheet margin and large margins all around, distinctive Reddish Violet shade associated exclusively with Stone A printings, neat “Choconta” manuscript cancel, a couple tiny imperfections...

**VERY FINE. THIS USED BLOCK OF TEN AND THE ORIGINAL-GUM BLOCK OF TEN OFFERED IN THE PREVIOUS LOT ARE THE TWO LARGEST RECORDED MULTIPLES FROM STONE A, THE FIRST STONE USED TO PRINT THE 5-CENTAVOS 1859 ISSUE. ONE OF THE RAREST AND MOST OUTSTANDING MULTIPLES OF CLASSIC COLOMBIAN PHILATELY.

The Bortfeldt handbook (page 27) illustrates this used block of ten from Stone A and alludes to the original-gum block offered in the previous lot (same positions). Regarding this block, Bortfeldt states: “From the first stone, the largest multiple known is this vertical strip [block] of 2x5 = 10 stamps, in used condition (cancelled CHOCONTA).” The only other recorded used blocks from Stone A are two blocks of four with the same “Choconta” cancellation.

Ex Caspary and Wickersham................................................................. E. 10,000-15,000
1859, 5c Blue (2). Positions 3-4/14-15/23-26/34-37/45-48, block of 16 from the left side of Stone B, original gum, sheet margins on three sides, slightly in at right, usual gum creasing, thin spot breaks paper in one stamp at right, a few other tiny imperfections.

VERY FINE. THIS IS THE LARGEST RECORDED BLOCK OF THE 5-CENTAVOS FIRST ISSUE IN THE BLUE SHADE. ONE LARGER BLOCK FROM STONE B IS KNOWN IN THE VIOLET BLUE SHADE.

When this block was part of the Larsen collection, the block of four at upper left, containing the inverted transfer Position 13, was still attached. It was cut out to be sold separately. The remaining block of sixteen is still the largest multiple in Blue, and, relative to all 5c multiples, it is second only to the block of 40 with the hole-punched Position 38 “50” error, which is the Blue Violet shade.

Ex Larsen (as a block of 20) and Londoño (in its present form).................. $3,000-4,000
176* ★★★ 1859, 5c Blue (2). Stone B. Positions 18-22/29-33, horizontal block of ten, original gum, large margins including part of right sheet margin, beautiful fresh color and paper, couple small faint thin specks, usual gum creasing
EXTREMELY FINE. A HANDSOME AND SCARCE ORIGINAL-GUM BLOCK OF THE 5-CENTAVOS 1859 FIRST ISSUE FROM STONE B.
Ex Londoño .......................................................................................................................... E. 2,000-3,000
5-CENTAVOS TÊTE-BÊCHE ERROR

177★ 1859, 5c Blue Violet, Tête-Bêche Pair (3a). Stone B, Positions 42-43, horizontal pair, original gum, large margins to clear, couple vertical gum creases and two tiny thin specks in margin

VERY FINE APPEARANCE. A CHOICE EXAMPLE OF THE 5-CENTAVOS TÊTE-BÊCHE ERROR.

The shade of this tête-bêche pair is distinctly more violet than the typical Blue. There is no tête-bêche multiple in the Reddish Violet shade, which only comes from Stone A (the inverted transfers were on Stone B).

Ex Caspary .................................................................................................................. E. 5,000-7,500

1859, 5c Blue, “50” centavos instead of “5” Transfer Error (2b). Stone B, Position 38, ample to large margins all around, lightly struck “(BU)GA/(FRANCA)” oval cancel leaving “50” error denominations completely visible, excellent color and entirely sound

EXTREMELY FINE. THIS IS THE FINEST OF THE FIVERecorded EXAMPLES OF THE “50” CENTAVOS TRANSFER ERROR. ONE OF THE GREAT RARITIES OF SOUTH AMERICAN PHILATELY.

On Stone B of the 5-centavos a transfer of the 20-centavos was erroneously placed in Position 38. The “2” of the “20” was corrected to a “5,” but the “0” was not removed, producing a “50” centavos denomination. After postal officials became aware of the error, they defaced the “50” centavos stamp by punching out the center of Position 38 in the remaining printed sheets. This explains the rarity of this error.

The Bortfeldt handbook illustrates all five known examples of the rare “50” centavos transfer error. The stamp offered here is believed to be the only sound four-margin example known.

The First Issue First Day Cover

Lot 181
History of The First Issue First Day Cover

The cover offered here is certainly an Aristocrat of South American Philately, but its significance was not widely appreciated for over a century. This is not surprising, in view of the fact that the issue of 1860 was believed to be the first issue of 1859 and was listed in the stamp catalogues as the issue of 1859.

In an important article in the *Collectors Club Philatelist* in November 1951, Federico Larsen pointed out the blunder, but it was not until around 1960 that the sequence was corrected in the catalogues and the true first issue was established. Additional research by Leo Temprano, based on documents in the government archives, confirmed the issue of 1859 and the first day of issue as September 1, 1859. The folded letter offered here is clearly dated September 1, 1859. The 5-centavos and 10-centavos stamps are tied by the “Bogota Franca” oval in blue.

Production of the First Issue

The Colombian postal reform law was passed by Congress on April 27, 1859, and it authorized a “system of stamps” for postage. On July 23 the Secretary of the Treasury issued a decree that specifically defined the first issue of postage stamps. On the next day, July 24, the printing order was given to the Martinez Brothers, and just three days later, on July 27, the new stamps were printed and ready for distribution, to be placed on sale on September 1, 1859, as evidenced by the form shown below (reproduced from the Bortfeldt handbook, page 1).

The First Issue, comprising five denominations—2½, 5, 10, 20-centavos and One-peso—was printed by lithography from stones of 55 or 100 subjects. Multiple orders were filled by the Martinez Brothers, and more than one stone was made for all values except the 2½-centavos and One-peso. Differentiating between the stones has been and continues to be one of the fascinating challenges for students of Colombia’s First Issue.

The First Issue First Day Cover bears the 5-centavos, printed from Stone A in a beautiful Reddish Violet, and a 10-centavos in an equally rich shade of Red Brown, also printed from Stone A. These stamps were part of the first sheets supplied by the Martinez Brothers.

Classic First Issue First Day Covers of the World

Covers bearing a classic imperforate First Issue postage stamp used on the first day of issue are limited to only a few countries. In Europe there is Great Britain and several other countries. In the Americas, including Canada and the Maritime Provinces, the United States and all of Latin America, there is only one country represented by a cover, and that is Colombia. A few examples of Brazil’s Bull’s Eye stamps are known postmarked on August 1, 1843, the first day of issue, but no country in the Americas other than Colombia has a First Issue First Day Cover to show. This fact is all the more remarkable when one considers the rarity of Colombian First Issue covers, compared with the ubiquitous First Issue covers of many other countries; for example, the United States 1847 Issue.

Manuel Maria Ballejo, Convto. de Nra. Me. Sta. Clara Septiembre 1 de 1859" on September 1, 1859, the official first day of issue

Extremely fine. This is the only recorded cover with classic Colombian stamps used on the first day of issue. More importantly, it is the only first day cover of any American first issue, including the United States and Canada.

This cover is illustrated in Dieter Bortfeldt's Colombia Philatelic Handbook and Catalogue 1859-1860 (page 4), where it is described as "Cover dated 1 September 1859 - The ONLY known cover from the FIRST DAY." The handstamped postmarks on early Colombia covers usually did not have a date (except for the Medellin receiving mark).

Pre-Sale Viewing—Monday-Wednesday 10-4 and by appointment
Bidding

The following means are available for placing bids:

1) **Attending the Live Auction in Person:** All bidders must register for a paddle, and new bidders must provide references at least three business days in advance of the sale.

2) **Live Internet Bidding:** Instructions for participating as a Live Internet Bidder are provided on the page opposite.

3) **Phone Bidding:** Bidders can be connected to the sale by phone and bid through a member of staff. Requests for phone bidding are subject to approval (please contact our office at least 24 hours before the sale). A signed Bid Form is required.

4) **Absentee Bids.** All bids received in advance of the sale, either by mail, fax, phone, e-mail or internet, are Absentee Bids, which instruct the auctioneer to bid up to a specific amount on one or more lots in the sale. Absentee Bids sent by phone, fax or e-mail should arrive at least one hour prior to the start of the sale session. Bids entered through Live Internet Bidding will be visible to the auctioneer during the sale. Written bids should be entered legibly on the Bid Form in the sale catalogue. E-mail and internet bids should be carefully typed and double-checked. All new bidders must provide references. We recommend calling or e-mailing to confirm that Absentee Bids sent by mail, fax or e-mail have been received and entered.

Pre-Sale Viewing

Subject to availability, certain lots (except group lots) can be sent to known clients for examination. Requests must be made no later than 7 days prior to the sale. Lots must be returned on the day received. Postage/insurance costs will be invoiced. In addition to regular viewing, clients may view lots by appointment. Our staff will be pleased to answer questions or provide additional information about lots.

Expert Certification

Individual items offered without a current certificate (PF dated within the past five years of sale; PSE dated January 2004 or later) may be purchased subject to independent certification of genuineness and our description. Please refer to the Conditions of Sale and Grading Terms for policies governing certification.

Shipping and Delivery

Procedures and charges for shipping lots are printed on the back of the Bid Form. Bidders are responsible for all prescribed shipping charges and any applicable sales tax or customs duties.

Price Realized

Prices realized are sent with each invoice. Bidders with e-mail will receive a Bid Results report after the sale. Session results are posted immediately to siegelauctions.com.
Bidding from your computer lets you be part of the live auction from anywhere in the world!

There’s no substitute for following the auction in real time. Live Internet Bidding lets you bid and buy as though you were right there in the saleroom.

And it’s easy. Just start by following the simple steps to become a registered Live Internet Bidder. Once you’ve been approved for bidding, you can listen to the auction and place bids with the click of a mouse.

This step-by-step guide will instruct you how to register, set your browser and use the bidding interface.

1. Registering with Stamp Auction Network and Siegel Auction Galleries

Live Internet Bidding is managed by Stamp Auction Network (SAN). To bid, you must be registered and approved by both SAN and Siegel. To decide what you need to do, choose the description below that best fits you.

I’ve already registered with SAN and have been approved by Siegel for internet bidding. You’re ready for Step 2.

I’ve never registered with SAN but I’m a Siegel client. Go to stampauctionnetwork.com/siegel and click on “Register” at the top. Check the box for Robert A. Siegel Auction Galleries (under “R”) and submit the form, indicating you are a Siegel client. Once registered at SAN, you’re ready for Step 2.

I’ve never registered with SAN, and this is the first time I’ve bid with Siegel. Go to stampauctionnetwork.com/siegel and click on “Register” at the top. Check the box for Robert A. Siegel Auction Galleries (under “R”) and submit the form with your trade references (please, no family members or credit card companies as references). Once registered at SAN and approved by Siegel for bidding, you’re ready for Step 2.

I’ve bid through SAN before, but this is the first time I’ve bid in a Siegel sale. Then you just need to be approved by Siegel. Go to stampauctionnetwork.com/siegel and click on “Update Registration” at the top. Your SAN account information will be sent to us for approval (you might be asked for other trade references). Once approved by Siegel for bidding, you can move to Step 2.

2. Using your browser for Live Internet Bidding and understanding the way it works.

Live Internet Bidding works by providing an audio feed of the auction (for anyone using Internet Explorer) and by allowing registered bidders to observe and place bids. The bidding interface shows a photo and description of the lot, the current bid (and your bidding status), and options for placing competitive bids. To join the auction, go to stampauctionnetwork.com/siegel. You can also log on at siegelauctions.com.

The visual interface will work with any browser on both PC and Mac operating systems. However, the audio feed only works with Internet Explorer on a PC with ActiveX software installed. If ActiveX is not on your computer, you will have the option to install it.

Before bidding by internet for the first time, we recommend finding a sale in progress and listening to the public broadcast or logging in as a registered bidder. This will help you develop a feel for the sale tempo and bidding interface.

“System down” or “lost connection” events do occasionally happen. If you have any problems with Live Internet Bidding, please call 212-753-6421 for immediate assistance.

3. Using Live Internet Bidding to bid, track results and communicate with the auctioneer.

When you’re logged on as a Live Internet Bidder, the screen will display buttons with bid increments. After you click on a bid amount, the auctioneer is immediately notified of your bid. Retracting a bid is usually not acceptable, so please bid carefully.

If you bid, then decide to stop, please use the “Pass” button, which appears once you’ve started bidding. This tells the auctioneer not to wait for another bid from you.

You can send messages to the auctioneer (for example, a request for extension). You can also track prior realizations from the bidding screen.
Conditions of Sale (please read carefully before bidding)

The property described in this catalogue will be offered at public auction by Robert A. Siegel Auction Galleries, Inc. (“Galleries”) on behalf of various consignors and itself or affiliated companies. By bidding on any lot, whether directly or by or through an agent, in person, or by telephone, facsimile or any other means, the bidder acknowledges and agrees to all of the following Conditions of Sale.

1. The highest bidder acknowledged by the auctioneer shall be the buyer. The term “final bid” means the last bid acknowledged by the auctioneer, which is normally the highest bid offered. The purchase price payable by the buyer will be the sum of the final bid and a commission of 15% of the final bid (“buyer’s premium”), together with any sales tax, use tax or customs duties due on the sale.

2. The auctioneer has the right to reject any bid, to advance the bidding at his discretion and, in the event of a dispute between bidders, to determine the successful bidder, to continue the bidding or to reoffer and resell the lot in dispute. The Galleries’ record of the final sale shall be conclusive.

3. All bids are per numbered lot in the catalogue unless otherwise announced by the auctioneer at the time of sale. The right is reserved to group two or more lots, to withdraw any lot or lots from the sale, or to act on behalf of the seller. The Galleries will execute bidding instructions on behalf of clients, but will not be responsible for the failure to execute such bids or for any errors in the execution of such bids.

4. Lots with numbers followed by the symbol ° are offered subject to a confidential minimum bid (“reserve”), below which the lot will not be sold. The absence of the symbol ° means that the lot is offered without a reserve. If there is no reserve, the auctioneer has sole discretion to establish a minimum opening bid and may refuse an offer of less than half of the published estimate. Any lot that does not reach its reserve or opening bid requested by the auctioneer will be announced as “passed” and excluded from the prices realized lists after the sale. The Galleries may have a direct or indirect ownership interest in any or all lots in the sale resulting from an advance of monies or goods-in-trade or a guarantee of minimum net proceeds made by the Galleries to the seller.

5. Subject to the exclusions listed in 5(A), the Galleries will accept the return of lots which have been misidentified or which have obvious faults that were present when the lot was in the Galleries’ custody, but not so noted in the lot description. All disputed lots must be received by the Galleries intact with the original packing material within 5 days of delivery to the buyer but no later than 30 days from the sale date. (5A) EXCLUSIONS: The following lots may not be returned for any reason: lots containing 10 or more items; lots from buyers who registered for the pre-sale exhibition or received lots by postal viewing, thereby having had the opportunity to inspect them before the sale; any lot described with “faults,” “defects” or a specific fault may not be returned because of any secondary fault. Photographed lots may not be returned because of centering, margins, short/nibbled perforations or other factors shown in the illustrations. Lots may not be returned for any of the following reasons: the color of the item does not match the color reproduction in the sale catalogue or website listing; the description contains inaccurate information about the quantity known or reported; or a certification service grades a stamp lower than the grade stated in the description.

6. Successful bidders, unless they have established credit with the Galleries prior to the sale, must make payment in full before the lots will be delivered. Buyers not known to the Galleries must make payment in full within 3 days from the date of sale. The Galleries retains the right to demand a cash deposit from anyone prior to bidder registration and/or to demand payment at the time the lot is knocked down to the highest bidder, for any reason whatsoever. In the event that any buyer refuses or fails to make payment in cash for any lot at the time it is knocked down to him, the auctioneer reserves the right to reoffer the lot immediately for sale to the highest bidder. Credit cards are not accepted as payment.

7. If the purchase price has not been paid within the time limit specified above, nor lots taken up within 7 days from the date of sale, the lots will be resold by whatever means deemed appropriate by the Galleries, and any loss incurred from resale will be charged to the defaulting buyer. Any account more than 30 days in arrears will be subject to a late payment charge of 1 1/2% per month as long as the account remains in arrears. Any expenses incurred in securing payment from delinquent accounts will be charged to the defaulting buyer. A fee of $250.00 per check will be charged for each check returned for insufficient funds.

8. All lots are sold as genuine. Any lot accompanied by a certificate issued by The Philatelic Foundation within 5 years of the sale date or by Professional Stamp Experts since January 2004 is sold “as is” and in accordance with the description on the certificate. Such lots may not be returned for any reason, including but not limited to a contrary certificate of opinion. Buyers who wish to obtain a certificate for any item that does not have a P.F. or P.S.E. certificate (dated as above) may do so, provided that the following conditions are met: (1) the purchase price must be paid in full, (2) the item must be submitted to an acceptable expertizing committee with a properly executed application form within 21 days of the sale, (3) a copy of the application form must be given to the Galleries, (4) in the event that an adverse opinion is received, the Galleries retain the right to resubmit the item on the buyer’s behalf for reconsideration, without time limit or other restrictions, (5) unless written notification to the contrary is received, items submitted for certification will be considered cleared 90 days from the date of sale, and (6) in the event any item is determined to be “not as described”, the buyer will be refunded the purchase price and the certification fee up to $600.00 unless otherwise agreed.

9. Until paid for in full, all lots remain the property of the Galleries on behalf of the seller.

10. Agents executing bids on behalf of clients will be held responsible for all purchases made on behalf of clients unless otherwise arranged prior to the sale.

11. The buyer assumes all risk for delivery of purchased lots and agrees to pay for prescribed shipping costs. Buyers outside the U.S. are responsible for all customs duties.

12. The bidder consents that any action or proceeding against it may be commenced and maintained in any court within the State of New York or in the United States District Court for the Southern District of New York, that the courts of the State of New York and United States District Court for the Southern District of New York shall have jurisdiction with respect to the subject matter hereof and the person of the bidder. The bidder agrees not to assert any defense to any action or proceeding initiated by the Galleries based upon improper venue or inconvenient forum. The bidder agrees that any action brought by the bidder shall be commenced and maintained only in a Federal Court in the United States District Court for the Southern District of New York or the State Court in the county in which Galleries has its principal place of business in New York. These Terms and Conditions shall be governed by and construed in accordance with the substantive laws of the State of New York.

Grades, Abbreviations and Values Used in Descriptions

Grades and Centering

Our descriptions contain detailed information and observations about each item’s condition. We have also assigned grades to stamps and covers, which reflect our subjective assessment. For stamps, the margin width, centering and gum are described and graded according to generally-accepted standards (an approximate correlation to numeric grades is provided at right). Although we believe our grades are accurate, they are not always exactly aligned with third-party grading terms or standards for all issues. A lot may not be returned because a certification service grades a stamp lower than the grade stated in the description. Information from the P.S.E. Stamp Market Quarterly and P.S.E. Population Report™ is the most current available, but lots may not be returned due to errors or changes in statistics or data.

Extremely Fine Gem (90-100): The term “Gem” describes condition that is the finest possible for the issue. This term is equivalent to “Superb” used by grading services.

Extremely Fine (80-90): Exceptionally large/width margins or near perfect centering.

Very Fine (70-85): Normal-size margins for the issue and well-centered with the design a bit closer to one side. "Very Fine and choice" applies to stamps that have desirable traits such as rich color, sharp impression, freshness or clarity of cancel.

Fine (60-70): Smaller than usual margins or noticeably off center. Pre-1890 issues may have the design touched in places.

Very Good (below 60): Attractive appearance, but margins or perforations cut into the design.

Covers

Minor nicks, short edge tears, flap tears and slight reduction at one side are normal conditions for 19th century envelopes. Folded letters should be expected to have at least one file fold. Light cleaning of covers and small mends along the edges are accepted forms of conservation. Unusual covers may have a common stamp with a slight crease or tiny tear. These flaws exist in virtually all 19th century covers and are not always described. They are not grounds for return.

Catalogue Values and Estimates

Unless otherwise noted, the currently available Scott Catalogue values are quoted in dollars with a decimal point. Other catalogues are often used for foreign countries or specialized areas and are referred to by their common name: Stanley Gibbons (SG), Dietz, American Air Mail Catalogue (AAMC), Michel, Zumstein, Facit, etc. Estimates are indicated with an “E.” and reflect our conservative valuation in dollars. Reserves will never exceed the low end of the estimate range; they will sometimes exceed Scott Catalogue value for stamps in Extremely Fine condition.

Because of certain pricing inconsistencies in the Scott Catalogue—for example, blocks that have no gum, the absence of premiums for Mint N.H. items, etc.—we cannot guarantee the accuracy of values quoted for multiples, specialized items and collection lots. We generally try to be conservative, but buyers may not return a lot because of a discrepancy in catalogue value due to Scott pricing inconsistencies.

Revised 1/2008
Prior to World War II, the preeminent collection of Peru was formed by Thomas William Hall, who was president of The Royal Philatelic Society of London from 1923 to 1929 and the recognized authority on a number of lithographed issues of South American countries.

After World War II, that distinction passed to Dr. A. J. E. Magonette of Belgium, whose collection was sold in 1957 by the Swiss firm of Corinphila. At that time Dr. Joseph Schatzkes seriously collected Peru, and Paul Morgoulis, a major European dealer, purchased most of the Magonette collection at the auction. These purchases became the foundation of the Schatzkes collection, which was the finest holding of Peru throughout the 1960’s and won international Gold medals in the days when judging standards were more rigorous.

In 1971 Paul Morgoulis and Robert Lyman broke up the Schatzkes collection into individual items and remainder lots for private sale. Islander had first pick from the entire Schatzkes Peru collection and purchased most of the major pieces of the early issues. This became the foundation of the Islander collection of Peru.

The rest of the Schatzkes collection was offered to a second party, then a third party, and this part of the Schatzkes collection became the basis of the Peru collections formed from 1971 up to the present. However, none of the collectors active during the past four decades has had an opportunity to acquire the major pieces of Peru, which have been in the Islander collection since 1971.

With the exception of occasional covers or pieces from the Consul Weinberger collection, which have been discovered in various safe deposit boxes, hidden away since before World War II, there has been very little fresh classic imperforate Peru material to work with. The majority of the Islander lots have not been on the open market since Schatzkes obtained them in 1957.
205* (★) 1858, 1d Blue, Reconstruction of the Bloc Report (3, shades). Sixteen singles and two pairs, all unused, three have original gum, others no gum, full to large margins, a few with usual minor thins, Very Fine-Extremely Fine or similar appearance, the One-dinero bloc report comprises 19 different transfer types (there was no separate transfer for Position 16), this reconstruction includes all but Position 10, unused One-dinero stamps are very scarce, this most remarkable unused reconstruction would be virtually impossible to duplicate and can be completed with the addition of one type (Position 10) ................................... E. 1,500-2,000

206* 1858, 1d Blue, Study Collection (3, shades). 65 stamps selected for lithographic transfer varieties (flaws, substituted transfers, etc.), includes one bloc report reconstruction from the Rider collection (all used, on his original page with diagrams, lot 58 in the 1978 Robson Lowe sale), includes many pairs and larger multiples (strips of four and six, blocks of five and six, including lot 63 from the 1978 Robson Lowe sale of the Rider collection), some on cover including a large judicial wrapper with fourteen stamps (faults, but Islander paid more than $2,000 for this large-franking item), usual minor faults, but overall Fine, many Very Fine or better, a valuable holding .............................................. ...) (Photo Ex) E. 3,000-4,000
207° 1858, 1d Light Blue (3). Types 2-3, horizontal pair, original gum, large margins all around, beautiful bright shade and very fresh, Extremely Fine, no unused multiples of the One-dinero larger than a pair are known, this is believed to be the finest with original gum ........................................................................................................ E. 1,000-1,500

208° 1858, 1d Blue (3). Types 20-15 (Type 15 in Position 16), horizontal pair, original gum, full to large margins all around, deep shade and very fresh, small thin, Very Fine appearance, no unused multiples of the One-dinero larger than a pair are known. E. 500-750

209°(*) 1858, 1d Blue (3). Three unused vertical pairs (no gum), Types 12/17, 14/19 and 15/20, one has large margins all around, others large to touched, small faults, Fine-Very Fine appearance, no unused multiples of the One-dinero larger than a pair are known ........... (Photo Ex) E. 1,000-1,500
1858, 1d Deep Blue (3). Block of 21, Types as follows: First Row 17-18-19-20-17-18, Second Row 2-3-4-5-1-2-3, Third Row 7-8-9-10-6-7-8 (Type 10 in Position 16), large margins, deep shade, cancelled by seven neat strikes of “TRUJILLO” straightline handstamp, small tears, three vertical creases mainly between stamps, usual thins and small hole in one stamp, these imperfections are typical of a large used block of this classic issue and none really affects its overall superb appearance.

Extremely Fine Appearance. This is the largest recorded multiple of the entire Peru 1858 issue. It was the frontispiece of the Colonel John F. Rider collection sold by Robson Lowe in 1978 and is considered to be one of the most important items of Peruvian philately.

The 1858 One-dinero lithographic stone was made from multiple transfers of the 20-unit bloc report. The bloc report contained 19 different transfers. Position 16 was either blank on the original bloc report or the transfers on the printing stone were erased and replaced with different types from the bloc report. In this block we have parts of four different transfers of the bloc report. Type 10 was used to fill in Position 16 (top row, fifth stamp from left).

Ex Magonette, Rider and Bustamante..................................................... E. 20,000-30,000
211° 1858, 1d Blue (3). Horizontal block of ten, Types 6-10/11-15, margins close but clear almost all around, tied by "TRUJ" dotted oval and additional "TRUJILLO" straightline on piece of judicial wrapper to Otusco, very faint toning

VERY FINE. AN EXTREMELY RARE USED BLOCK OF TEN OF THE ONE-DINERO 1858 ISSUE. THIS IS THE LARGEST RECORDED MULTIPLE OF THE ONE-DINERO ON JUDICIAL PIECE.

Ex Schatzkes .......................................................... E. 5,000-7,500

212° 1858, 1d Deep Blue (3). Block of nine, Types 11-12-13/16-17-18/1-2-3 (Type 6 in Position 16), large margins, deep shade, four strikes of "TRUJILLO" straightline, couple creases and small faults

VERY FINE APPEARANCE. ONE OF THE LARGER BLOCKS KNOWN OF THE ONE-DINERO 1858 ISSUE.

Ex Magonette, Rider and Bustamante .................................................. E. 4,000-5,000
213° 1858, 1d Blue (3). Block of four, Types 7-8/12-13, huge margins all around, two clear strikes of red “OTUSCO” straightline, shallow thins, Extremely Fine appearance, a beautiful and very scarce block ............................................................... E. 500-750

The greater rarity of horizontal strips suggests that the One-peseta was cut into vertical strips before sale.

History of The Medio Peso Rose Red Error

The best-known and most valuable of Peru's early issues is the Medio Peso Error. The seventeen lots of the Medio Peso Error in the Islander collection constitute the most significant offering of these rarities ever made at auction or by private sale. The important Medio Peso Error pieces which were part of the Joseph Schatzkes collection were acquired by Islander in 1971 when the Schatzkes collection was offered privately. However, even the great Schatzkes collection lacked a few of the important pieces offered in this sale, such as the “Small Weinberger Block” (lot 256), which was missing from the philatelic scene for decades, until portions of the Consul Weinberger collection emerged from safe deposit boxes and were sold at auction.

THE CAUSE OF THE MEDIO PESO ERROR

The Medio Peso Error is usually described as a “color error,” but actually resulted from the erroneous transfer of Medio Peso designs on the lithographic stone for the One-peseta. The printer consistently used yellow ink for the Medio Peso and red ink for the One-peseta. However, since the stone of the One-peseta included at least five Medio Peso transfers, the resulting Medio Peso stamps were printed in red, not yellow.

According to specialists, the first reports of the error appeared in June 1858, and post offices were instructed to treat the Medio Peso stamps printed in red as the normal One-peseta. The decree of June 18, 1858, declared the Medio Peso value unnecessary, and the government stopped distributing the sheets printed in yellow. This might have been part of an effort to control the situation involving the errors.

A similar error occurred in Colombia, but blue was used for both the 5-centavos and 20-centavos, so the 5-centavos stamps printed from the transfer error on the 20-centavos stone are only obvious from se-tenant multiples. Sixty years later in the United States, the same mistake was made by the platemaker entering engraved subjects on one of the 2-cent plates of the Washington-Franklin series, which resulted in the 5-cent error printed in red instead of blue.

THE ONE-PESETA LITHOGRAPHIC STONE

The exact composition of the One-peseta stone is not known, and it is possible more than one printing stone was used. However, by studying examples of the Medio Peso Error, specialists have deduced that at least one of the 10-subject bloc reports erroneously included a row of five of the Medio Peso denomination (see diagram on page 34). Some specialists believe that the bloc report containing the Medio Peso errors was transferred to either row 8, 10, 12 or 14 on a stone of 160 subjects. Without knowing the stamps' exact location in a printed sheet, examples of the Medio Peso Error are identified by the transfer types (Types A, B, C, D and E).

The normal One-peseta bloc report consisted of two horizontal rows of five, all of the same denomination, which philatelists have classified as ten different numbered types, based on tiny distinguishing marks in each transfer. The correct arrangement of the types in the bloc report became known after the type numbers were assigned, which accounts for the non-sequential order of the bloc report (top row 10-1-4-7-3, bottom row 5-2-8-6-9).

The se-tenant Medio Peso Error block offered in lot 256, known as the “Small Weinberger Block,” reveals something interesting about the bloc report that produced it. The two errors, identified as Types C and D, are the third and fourth positions in the bottom row of the 10-unit bloc report. Normally, the stamps above these two positions in the bloc report would be Types 4 and 7. However, the Types are 8 and 6, which indicates that Types 5-2-8-6-9 were in the top row of the error bloc report rather than their normal position at the bottom. This means that not only were the five Medio Peso denominations transferred to the stone, but the entire bloc report of ten was uniquely configured with the bottom row positioned at the top and the error transfers at the bottom.

The best reference to the Medio Peso error is the Percy Bargholtz handbook, PERU: The 1858 Medio Peso Error of Colour, An Inventory, published by Brian Moorhouse in March 2001. The ownership history and census numbers used in this sale catalogue come from the Bargholtz handbook.

EXTREMELY FINE. THIS SPECTACULAR COVER BEARS THE ONLY RECORDED TWO-COLOR FRANKING WITH THE MEDIO PESO ERROR. IT IS THE MOST IMPORTANT COVER OF PERUVIAN PHILATELY AND ONE OF THE ARISTOCRATS OF SOUTH AMERICAN PHILATELY.

According to the Percy Bargholtz booklet on the Medio Peso Error, the first report of the error occurred in June 1858, about three months after the March 10, 1858, issue date of the first official government postage stamps. Bargholtz cites the generally-accepted statement that postmasters were instructed to treat the Medio Peso error as a One-peseta stamp, but he also notes that a few covers appear to have required the half-peso denomination and were accepted as such.

The cover offered here was posted in September 1858, months after the errors were discovered. It is probably franked for the double rate of two pesetas with the Medio Peso Error counted as a One-peseta stamp. The Bargholtz census of Medio Peso Error covers lists all of the covers which were known to him in 2001. Only this cover bears the Medio Peso Error in combination with a stamp other than the One-peseta Rose Red.

1858, Medio Peso Rose Red Error (5). Vertical block of six containing two Medio Peso errors se-tenant with four of the normal One-peseta, the bottom four stamps come from the error bloc report with One-peseta Types 8-6 above the two Medio Peso Types C-D, the top pair comes from another bloc report with One-peseta Types 8-6 repeated—an unusual configuration, which is explained more thoroughly on page 32 and below—large margins to ample at bottom, two strikes of “TRUJILLO” straightline, pressed-out horizontal crease between stamps at bottom, three tiny pinholes, truly insignificant flaws and otherwise in excellent condition.

VERY FINE APPEARANCE. BY FAR THE FINER OF TWO RECORDED SURVIVING BLOCKS CONTAINING THE MEDIO PESO ERROR (THE OTHER IS OFFERED IN THE FOLLOWING LOT). THIS EXTRAORDINARY MULTIPLE IS WIDELY REGARDED AS THE MOST IMPORTANT OFF-COVER PIECE OF PERUVIAN PHILATELY, AND IT IS CERTAINLY ONE OF THE ARISTOCRATS OF SOUTH AMERICAN PHILATELY.

The make-up of the lithographic stone which produced the 1858 One-peseta is not known with certainty. However, by studying examples of the Medio Peso Error, specialists have deduced that at least one of the 10-subject bloc reports erroneously included a row of five of the Medio Peso denomination. The normal One-peseta bloc report consisted of two horizontal rows of five, all of the same denomination, which philatelists have classified as ten different numbered types, based on tiny distinguishing marks in each transfer. The correct arrangement of the types in the bloc report became known after the type numbers were assigned, which accounts for the non-sequential order of the bloc report (top row 10-1-4-7-3, bottom row 5-2-8-6-9).

Apart from the obvious philatelic importance of this se-tenant Medio Peso Error block, it also tells us something about the bloc report that produced it. The two errors, which are called Types C and D, are the third and fourth positions in the bottom row of the 10-unit bloc report. Normally, the stamps above these two positions in the bloc report would be Types 4 and 7. However, the Types are 8 and 6, which indicates that Types 5-2-8-6-9 were in the top row of the error bloc report rather than their normal position at the bottom. This means that not only were the five Medio Peso denominations transferred to the stone, but the entire bloc report of ten was uniquely configured with the bottom row positioned at the top and the error transfers at the bottom.

Lot 256 continued

For many years, no one knew the whereabouts of the remarkable block of six offered here, which is known as the “Small Weinberger Block.” We quote directly from the Bargholtz handbook on the Medio Peso error: “The earliest mention found of this block was in a 1930 publication *Etudes Philatéliques* by Didier Darteyre, who illustrated it together with the Ferrari block and stated that the new block had recently been offered for sale by the German auction firm H. Kohler. Subsequently, in 1931, Hall mentioned that the block belonged to one of Mr. Kohler’s customers, Mr. Alfred Weinberger from Czechoslovakia. An illustration of the block was also included in Hall’s article mentioned above. After this, the block disappeared and was not seen or heard of again until 1997, when it was offered as lot 245 in the Harmers of London auction on 24 July together with some other material from the Consul Weinberger estate.”

The “Large Weinberger Block,” which included two Medio Peso Errors se-tenant with sixteen One-Peseta in a tall vertical block, no longer exists. It was also mentioned in the 1931 article by Hall, but sometime between then and 1959, it was cut down into two se-tenant strips of three (Types A/10/5 in one strip and B/1/2 in the other, both of which are now in the Jaretzky collection of Peru). The only other block containing the Medio Peso Error is the ex-Ferrary block offered in the following lot. Although a rare artifact, the Ferrary block’s condition cannot compare to the “Small Weinberger Block” offered here.

The se-tenant Medio Peso Error pair on this cover shows the unusual configuration of the bloc report that produced it. The error, Type A, is the first position in the bottom row of the 10-unit bloc report. Normally, the stamp above this position in the bloc report would be Type 10. However, the One-peseta is Type 5, which indicates that Types 5-2-8-6-9 were in the top row of the error bloc report rather than their normal position at the bottom. This means that not only were the five Medio Peso denominations transferred to the stone, but the entire bloc report of ten was uniquely configured with the bottom row positioned at the top and the error transfers at the bottom (see diagram on page 34).
