Information for Bidders

Bidding
The following means are available for placing bids:

1) Attending the Live Auction in Person: All bidders must register for a paddle, and new bidders must provide references at least three business days in advance of the sale.

2) Live Internet Bidding: Instructions for participating as a Live Internet Bidder are provided on the page opposite.

3) Phone Bidding: Bidders can be connected to the sale by phone and bid through a member of staff. Requests for phone bidding are subject to approval (please contact our office at least 24 hours before the sale). A signed Bid Form is required.

4) Absentee Bids. All bids received in advance of the sale, either by mail, fax, phone, e-mail or internet, are Absentee Bids, which instruct the auctioneer to bid up to a specific amount on one or more lots in the sale. Absentee Bids sent by phone, fax or e-mail should arrive at least one hour prior to the start of the sale session. Bids entered through Live Internet Bidding will be visible to the auctioneer during the sale. Written bids should be entered legibly on the Bid Form in the sale catalogue. E-mail and internet bids should be carefully typed and double-checked. All new bidders must provide references. We recommend calling or e-mailing to confirm that Absentee Bids sent by mail, fax or e-mail have been received and entered.

Pre-Sale Viewing
Subject to availability, certain lots (except group lots) can be sent to known clients for examination. Requests must be made no later than 7 days prior to the sale. Lots must be returned on the day received. Postage/insurance costs will be invoiced.

In addition to regular viewing, clients may view lots by appointment. Our staff will be pleased to answer questions or provide additional information about lots.

Expert Certification
Individual items offered without a current certificate (PF dated within the past five years of sale; PSE dated January 2004 or later) may be purchased subject to independent certification of genuineness and our description. Please refer to the Conditions of Sale and Grading Terms for policies governing certification.

Shipping and Delivery
Procedures and charges for shipping lots are printed on the back of the Bid Form. Bidders are responsible for all prescribed shipping charges and any applicable sales tax or customs duties.

Price Realized
Prices realized are sent with each invoice. Bidders with e-mail will receive a Bid Results report after the sale. Session results are posted immediately to siegelauctions.com
Live Internet Bidding works by allowing registered bidders to observe and place bids.

Live Internet Bidding will work with any browser on both PC and Mac operating systems.

Before bidding by internet for the first time, we recommend finding a sale in progress and listening to the public broadcast or logging in as a registered bidder. This will help you develop a feel for the sale tempo and bidding interface.

Registering with STAMP AUCTION NETWORK & SIEGEL AUCTION GALLERIES

Live Internet Bidding is managed by Stamp Auction Network (SAN).

To bid, you must be registered and approved by both SAN and Siegel.

To decide what you need to do, choose the description below that best fits you.

I've already registered with SAN and have been approved by Siegel for internet bidding.

I'm a Siegel client, but I'm not registered with SAN.

Go to stampauctionnetwork.com/siegel and click on "Register" at the top. Check the box for Robert A. Siegel Auction Galleries (under "R") and submit the form, indicating you are a Siegel client. Once registered at SAN, you’re ready for internet bidding.

I've bid through SAN before, but this is the first time I've bid in a Siegel sale.

Then you just need to be approved by Siegel. Go to stampauctionnetwork.com/siegel and click on "Update Registration" at the top. Your SAN account information will be sent to us for approval (you might be asked for other trade references). Once approved by Siegel for bidding, you’re ready for internet bidding.

I've never bid with Siegel, nor registered with SAN.

Go to stampauctionnetwork.com/siegel and click on "Register" at the top. Check the box for Robert A. Siegel Auction Galleries (under “R”) and submit the form with your trade references (please, no family members or credit card companies as references). Once registered at SAN and approved by Siegel for bidding, you’re ready for internet bidding.

Log on to the auction at stampauctionnetwork.com/siegel.

You can also log on at siegelauctions.com

When you’re logged on as a Live Internet Bidder, the bidding interface shows a photo and description of the lot, the current bid (and your bidding status), options for placing competitive bids and buttons with bid increments.

• After you click on a bid amount, the auctioneer is immediately notified of your bid.

• Retracting a bid is usually not acceptable, so please bid carefully.

• If you bid and then decide to stop, the “Pass” button will tell the auctioneer you are no longer bidding.

• You can send messages to the auctioneer (for example, a request for extension).

• You can track prior realizations from the bidding screen.

“System Down” or “Lost Connection” events do occasionally happen.

If you have any problems with Live Internet Bidding please call 212-753-6421 for immediate assistance.
Conditions of Sale (please read carefully before bidding)

The property described in this catalogue will be offered at public auction by Robert A. Siegel Auction Galleries, Inc. ("Galleries") on behalf of various consignors and itself or affiliated companies. By bidding on any lot, whether directly or by or through an agent, in person, or by telephone, facsimile or any other means, the bidder acknowledges and agrees to all of the following Conditions of Sale.

1. The highest bidder acknowledged by the auctioneer shall be the buyer. The term "final bid" means the last bid acknowledged by the auctioneer, which is normally the highest bid offered. The purchase price payable by the buyer will be the sum of the final bid and a commission of 15% of the final bid ("buyer's premium"), together with any sales tax, use tax or customs duties due on the sale.

2. The auctioneer has the right to reject any bid, to advance the bidding at his discretion and, in the event of a dispute between bidders, to determine the successful bidder, to continue the bidding or to reoffer and resell the lot in dispute. The Galleries' record of the final sale shall be conclusive.

3. All bids are per numbered lot in the catalogue unless otherwise announced by the auctioneer at the time of sale. The right is reserved to group two or more lots, to withdraw any lot or lots from the sale, or to act on behalf of the seller. The Galleries will execute bidding instructions on behalf of clients, but will not be responsible for the failure to execute such bids or for any errors in the execution of such bids.

4. Lots with numbers followed by the symbol ° are offered subject to a confidential minimum bid ("reserve"), below which the lot will not be sold. The absence of the symbol ° means that the lot is offered without a reserve. If there is no reserve, the auctioneer has sole discretion to establish a minimum opening bid and may refuse an offer of less than half of the published estimate. Any lot that does not reach its reserve or opening bid requested by the auctioneer will be announced as "passed" and excluded from the prices realized lists after the sale. The Galleries may have a direct or indirect ownership interest in any or all lots in the sale resulting from an advance of monies or goods-in-trade or a guarantee of minimum net proceeds made by the Galleries to the seller.

5. Subject to the exclusions listed in 5(A), the Galleries will accept the return of lots which have been misidentified or which have obvious faults that were present when the lot was in the Galleries' custody, but not so noted in the lot description. All disputed lots must be received by the Galleries intact with the original packing material within 5 days of delivery to the buyer but no later than 30 days from the sale date. (5A) EXCLUSIONS: The following lots may not be returned for any reason: lots containing 10 or more items; lots from buyers who registered for the pre-sale exhibition or received lots by postal viewing, thereby having had the opportunity to inspect them before the sale; any lot described with "faults," "defects" or a specific fault may not be returned because of any secondary fault. Photographed lots may not be returned because of centering, margins, short/nibbed perforations or other factors shown in the illustrations. Lots may not be returned for any of the following reasons: the color of the item does not match the color reproduction in the sale catalogue or website listing; the description contains inaccurate information about the quantity known or reported; or a certification service grades a stamp lower than the grade stated in the description.

6. Successful bidders, unless they have established credit with the Galleries prior to the sale, must make payment in full before the lots will be delivered. Buyers not known to the Galleries must make payment in full within 5 days from the date of sale. The Galleries reserves the right to demand a cash deposit from anyone prior to bidder registration and/or to demand payment at the time the lot is knocked down to the highest bidder, for any reason whatsoever. In the event that any buyer refuses or fails to make payment in cash for any lot at the time it is knocked down to him, the auctioneer reserves the right to reoffer the lot immediately for sale to the highest bidder. Credit cards are not accepted as payment.

7. If the purchase price has not been paid within the time limit specified above, nor lots taken up within 7 days from the date of sale, the lots will be resold by whatever means deemed appropriate by the Galleries, and any loss incurred from resale will be charged to the defaulting buyer. Any account more than 30 days in arrears will be subject to a late payment charge of 1½% per month as long as the account remains in arrears. Any expenses incurred in securing payment from delinquent accounts will be charged to the defaulting buyer. A fee of $250.00 per check will be charged for each check returned for insufficient funds.

8. All lots are sold as genuine. Any lot accompanied by a certificate issued by The Philatelic Foundation within 5 years of the sale date or by Professional Stamp Experts since January 2004 is sold "as is" and in accordance with the description on the certificate. Such lots may not be returned for any reason, including but not limited to a contrary certificate of opinion. Buyers who wish to obtain a certificate for any item that does not have a P.F. or P.S.E. certificate (dated as above) may do so, provided that the following conditions are met: (1) the purchase price must be paid in full, (2) the item must be submitted to an acceptable expertizing committee with a properly executed application form within 21 days of the sale, (3) a copy of the application form must be given to the Galleries, (4) in the event that an adverse opinion is received, the Galleries retain the right to resubmit the item on the buyer's behalf for reconsideration, without time limit or other restrictions, (5) unless written notification to the contrary is received, items submitted for certification will be considered cleared 90 days from the date of sale, and (6) in the event any item is determined to be "not as described", the buyer will be refunded the purchase price and the certification fee up to $600.00 unless otherwise agreed.

9. Until paid for in full, all lots remain the property of the Galleries on behalf of the seller.

10. Agents executing bids on behalf of clients will be held responsible for all purchases made on behalf of clients unless otherwise arranged prior to the sale.

11. The buyer assumes all risk for delivery of purchased lots and agrees to pay for prescribed shipping costs. Buyers outside the U.S. are responsible for all customs duties.

12. The bidder consents that any action or proceeding against it may be commenced and maintained in any court within the State of New York or in the United States District Court for the Southern District of New York, that the courts of the State of New York and United States District Court for the Southern District of New York shall have jurisdiction with respect to the subject matter hereof and the person of the bidder. The bidder agrees not to assert any defense to any action or proceeding initiated by Galleries based upon improper venue or inconvenient forum. The bidder agrees that any action brought by the bidder shall be commenced and maintained only in a Federal Court in the United States District Court for the Southern District of New York or the State Court in the county in which Galleries has its principal place of business in New York. These Terms and Conditions shall be governed by and construed in accordance with the substantive laws of the State of New York.

Revised 10/2010
Grades and Centering

Our descriptions contain detailed information and observations about each item's condition. We have also assigned grades to stamps and covers, which reflect our subjective assessment. For stamps, the margin width, centering and gum are described and graded according to generally-accepted standards (an approximate correlation to numeric grades is provided at right). Although we believe our grades are accurate, they are not always exactly aligned with third-party grading terms or standards for all issues. A lot may not be returned because a certification service grades a stamp lower than the grade stated in the description. Information from the P.S.E. Stamp Market Quarterly and P.S.E. Population Report™ is the most current available, but lots may not be returned due to errors or changes in statistics or data.

Extremely Fine Gem (90-100): The term “Gem” describes condition that is the finest possible for the issue. This term is equivalent to “Superb” used by grading services.

Extremely Fine (80-90): Exceptionally large/wide margins or near perfect centering.

Very Fine (70-85): Normal-size margins for the issue and well-centered with the design a bit closer to one side. “Very Fine and choice” applies to stamps that have desirable traits such as rich color, sharp impression, freshness or clarity of cancel.

Fine (60-70): Smaller than usual margins or noticeably off center. Pre-1890 issues may have the design touched in places.

Very Good (below 60): Attractive appearance, but margins or perforations cut into the design.

Disturbed Original Gum: Gum showing noticeable effects of humidity, climate or hinging over more than half of the gum. The significance of gum disturbance in valuing a stamp in any of the Original Gum categories depends on the degree of disturbance, the rarity and normal gum condition of the issue and other variables affecting quality. For example, stamps issued in tropical climates are expected to have some gum disturbance due to humidity, and such condition is not considered a negative factor in pricing.

Catalogue Values and Estimates

Unless otherwise noted, the currently available Scott Catalogue values are quoted in dollars with a decimal point. Other catalogues are often used for foreign countries or specialized areas and are referred to by their common name: Stanley Gibbons (SG), Dietz, American Air Mail Catalogue (AAMC), Michel, Zumstein, Facit, etc. Estimates are indicated with an “E.” and reflect our conservative valuation in dollars. Reserves will never exceed the low end of the estimate range; they will sometimes exceed Scott Catalogue value for stamps in Extremely Fine condition.

Because of certain pricing inconsistencies in the Scott Catalogue—for example, blocks that have no gum, the absence of premiums for Mint N.H. items, etc.—we cannot guarantee the accuracy of values quoted for multiples, specialized items and collection lots. We generally try to be conservative, but buyers may not return a lot because of a discrepancy in catalogue value due to Scott pricing inconsistencies.

Revised 1/2008
ASK MOST KNOWLEDGEABLE PHILATELISTS WHICH UNITED STATES STAMP IS the rarest, and they will probably say the 1¢ Z Grill, Scott 85A. That would be incorrect. It might surprise many well-informed stamp collectors and dealers to learn that the rarest U.S. stamp—referring to major Scott listings for regular and commemorative postage issues—is Scott 423E, the 2¢ Compound Perf 10 x 12, of which there is just one recorded/certified example (there are two 1¢ Z Grill stamps).

Scott 423E looks like a common 2¢ Red stamp from the long-running Washington-Franklin series. But its special and rare feature, the perforations, are even more prominent than the embossed grill which separates the two recorded 1¢ Z Grill stamps from their vastly more common counterparts. Scott 423E is perforated 10 horizontally and 12 vertically, a combination of perforation gauges that occurred only for a brief period of production in 1914, when the Bureau of Engraving and Printing switched from 12-gauge perforations to 10-gauge perforations. Only a small number of 1¢, 2¢ and 5¢ sheets were produced with different gauge perforations running horizontally and vertically—so-called Compound Perforations—and as a group they are some of the rarest United States stamps in existence. The Compound Perfs received major Scott Catalogue numbers in 2003, in recognition of their “non-error” status and distinctive appearance (previously they were sub-listed “a” varieties).

The Siegel firm has maintained a census of examples of the Compound Perfs (available at siegelauctions.com), which has a current tally of 52 1¢ Perf 12 x 10 (Scott 423A), 32 2¢ Perf 12 x 10 (Scott 423B), 25 5¢ Perf 12 x 10 (Scott 423C), 41 1¢ Perf 10 x 12 (Scott 423D) and one example of the 2¢ Perf 10 x 12 (Scott 423E). These census figures make the Compound Perfs as rare or rarer than most major Scott-listed numbers. Unused examples of the Compound Perfs are even rarer, with 17 Scott 423A, one Scott 423B, and not a single known unused example of Scott 423C, 423D or 423E.

Also of great rarity are the sub-listed Perf 10 on One Side stamps. These varieties occurred during the process of perforating sheets on the standard 11-gauge machine. At a certain point, one of the perforating wheels developed a problem and had to be repaired. When the row of pins on the perforating wheel was reset, some were spaced unevenly and further apart than the others. The effect of this irregular spacing was that a few stamps in each sheet received perforations that gauge approximately 10 holes per centimeter instead of the standard 11 holes. Most Perf 10 on One Side stamps are the “at Top” or “at Bottom” varieties, because the off-gauge perforations run horizontally between the rows (the 25¢ 1922 Issue exists with Perf 10 at Left or Right). When the perforating pins changed from 11 to 10 gauge within the confines of a single stamp, it is known as a “Transitional Perf 11/10” variety. The 2¢ 1921 Rotary Waste Issue is also known with a uniform Perf 10 at Left (Scott 546a), but this was due to the use of a different gauge machine.

In addition to the Compound Perfs and Perf 10 on One Side varieties, there are many scarce or rare 20th Century perforation production varieties and errors. Major Scott numbers are given to “non-error” issues, such as the Rotary Waste stamps that were made from the excess “scrap” printed at the beginning or end of a rotary press run (“Sirron” was especially interested in the 1¢ Rotary Perf 11, Scott 544). Others are errors or production varieties never intended for release, such as imperforate and part-perforated multiples.

The “Sirron” Collection starts with the largest concentration of Compound Perf stamps ever assembled by one collector, and it continues with an equally impressive holding of perforation varieties from the Washington-Franklin series and 1922-25 Issue (and a few later issues). While most collectors would be content to own one example of each variety, “Sirron” acquired numerous examples of these rare stamps, which have been organized by category (unused, used, multiples, covers), shades, and cancellations (postal or precancel). This sale eclipses any previous offering of its kind, and it presents collectors with an opportunity to acquire some of the rarest United States stamps extant.

VERY FINE AND CHOICE. AN EXCEEDINGLY RARE SOUND EXAMPLE OF THE 8-CENT 1917 ISSUE PERF 10 AT TOP. ONE OF THE FINEST OF ONLY EIGHTEEN EXAMPLESRecorded in our census.

Of the 18 examples we record in our census (available at http://www.siegelauctions.com/dynamic/census/508c/508c.pdf and printed in Appendix of this catalogue), nine are sound or potentially sound (four of these have very low certificate numbers and need to be examined for condition). Eight are without a precancel. Most examples are centered strongly to one side, several are cut in, have faults or both. With an attractive cancel and choice centering, this should be considered a condition rarity among rarities. Only two other examples in our census compare favorably to this one.

2058° 8c Olive Bister, Perf 10 at Bottom (508c). Brilliant color, neat strike of Ind. oval cancel, diagonal crease

VERY FINE APPEARANCE. AN ATTRACTIVE AND RARE EXAMPLE OF THE 8-CENT 1917 ISSUE PERF 10 AT BOTTOM.

Of the 18 examples we record in our census (available at http://www.siegelauctions.com/dynamic/census/508c/508c.pdf), eight are without a precancel. Most examples are centered strongly to one side, several are cut in, have faults or both. Despite the small fault, this example is very desirable with the identifiable cancel and better than typical centering.

2081° 11c Light Green, Perf 10 at Top and Bottom, Transitional 10/11 Perfs at Top and Bottom (511a). Block of four containing four error stamps, left vertical pair Perf 10 horizontally between, right vertical pair with transitional perfs from 10 to 11 half way between, outside perforations all normal Perf 11, Galveston Tex. duplex cancels, rich color and attractive centering, some separations and rejoined perfs, small repaired tear at bottom right.

THE UNIQUE USED BLOCK OF FOUR OF THE 1917 11-CENT WITH ALL FOUR POSSIBLE PERF 10 ERROR VARIETIES. ONE OF THE MOST OUTSTANDING RARITIES OF 20TH CENTURY PHILATELY.

Many examples of the Perf 10 on One Side rarities show transitional perfs from 10 to 11 or from 11 to 10. This is because the out-of-gauge perforation pins would frequently cross the span of more than one stamp. Depending on where the wheel contacted the sheet, it is possible for surviving multiples to show a combination of Perf 11 and Perf 10 stamps or transitional perfs on one stamp. The four possible varieties are Perf 10 at top or bottom and transitional Perf 10/11 at top or bottom. This block is remarkable as the only certified example with all four varieties se-tenant and no normal stamps. The Galveston duplex cancel, rather than a precancel, only adds to its rarity.

**VERY FINE. AN EXCEPTIONALLY RARE MINT NEVER-HINGED EXAMPLE OF THE 1917 12-CENT PERF 10 AT TOP. ONE OF ONLY FOUR UNUSED STAMPS RECORDED IN OUR CENSUS AND MOST LIKELY THE ONLY MINT NEVER-HINGED EXAMPLE.**

Our unpublished census of Scott 512b contains 12 used and four unused stamps, which at one time constituted a block of four. This stamp is from the bottom right of the block and is most likely the only Mint N.H. example. The stamps from the left of the block still form a pair. The bottom stamp of the pair is lightly hinged and the hinging on the top stamp extends to the right perfs, making it likely that the fourth stamp from the block (upper right) is hinged as well.

A small quantity of 1c Rotary Press stamps was perforated 11 at the end of 1922, using remainder sheets from the earlier printings that were normally perforated in 10 gauge or 10/11 compound gauge. Its existence as a Perf 11 variety was discovered in 1956, and the stamp received its Scott Catalogue listing in 1938. Most of the recorded copies of Scott 544 are off-center or have been damaged — the result of poor production standards and mis-handling.

EXTREMELY FINE. A BEAUTIFUL EXAMPLE OF THE 1922 ONE-CENT ROTARY PERF 11 ON COVER. ONLY NINE POSTCARDS AND FIVE COVERS HAVE BEEN CERTIFIED AS GENUINE BY THE PHILATELIC FOUNDATION.

A small quantity of 1c Rotary Press stamps was perforated 11 at the end of 1922, using remainder sheets from the earlier printings that were normally perforated in 10 gauge or 10/11 compound gauge. Its existence as a Perf 11 variety was discovered in 1936, and the stamp received its Scott Catalogue listing in 1938.

Until the 2011 edition, the Scott Catalogue listed this cover as the earliest documented usage. The new edition lists the EDU as Dec. 17, 1922, based on a postcard expertized by APEX. This remains the earliest known use on a full cover. In addition to the 14 examples expertized by the P.F. there are a handful of others which have received A.P.S. certificates.

FINE-VERY FINE. THE UNIQUE TOP SHEET-MARGIN BLOCK CONTAINING TWO EXAMPLES OF THE 2-CENT 1921 ROTARY PRINTING PERFORATED 10 ON THE LEFT SIDE. A REMARKABLE SHOWPIECE.

Our records of Scott 546a contain this unique unused block, another block containing two examples of the error (which we believe has since been broken into two strips of four), and one used single, for a total of four unused and one used. We believe that the strip of four in our records (ex Grunin and Schilling) comes from a block mentioned in a 1956 letter from C. B. Durland to Eugene Costales. The block offered here is important, as it identifies the location on the sheet where the error occurred.

VERY FINE AND CHOICE. A DESIRABLE EXAMPLE OF THE 2-CENT 1923 IMPERFORATE HORIZONTALLY. VERY FEW ARE KNOWN. A GREAT RARITY OF THE ISSUE.

Gary Griffith states that 3 to 5 pairs are known. The most desirable (and most easily authenticated) originate from a block of twelve with plate no. 14213 which contained three pairs of the variety as well as a fourth pair with part perfs (the block was offered in our 1966 Rarities sale). The multiple had brown Bureau paste-up paper fixing tears at left, including the left most full error pair, located in the center of the block. The pair offered here appears to be the second pair from the right, next to the pair with the tears and therefore receiving a small part of the bureau paste-up paper.

1c Green, Rotary, Perf 11 (594). Perfectly centered, long full perfs all around, tied by "NEW YORK, N.Y. STA. Y" 1924 dateless machine cancel with "REGISTER OR INSURE VALUABLE MAIL" slogan in bars on unsealed circular-rate envelope with typewritten local address.

Extremely fine gem stamp and immaculate cover. The finest example of Scott 594 extant on cover and among the four best-centered of all known copies of this rarity. An important 20th century cover.

The 1c Green, Scott 594, is waste from a horizontal rotary printing used to make coils. At the beginning or end of a coil-stamp print run from the 170-subject rotary plates, some leading or trailing paper was produced that was too short for rolling into 500-stamp rolls. In 1919 the Bureau devised a plan to salvage this waste by perforating and cutting the sheets into panes. They were put through the 11-gauge flat-plate perforator in use at the time, giving the sheets full perforations on all sides. In 1923 coil waste from the new 1c and 2c rotary production was turned into stamps later classified as Scott 578-579 and 594-595. These were the last of the coil-waste issues. The existence of Scott 594 was not reported until four months after the final sheets were delivered, and the 1c Rotary Perf 11 was soon recognized as one of the rarest United States stamps.

There are today fewer than 100 confirmed examples of Scott 594. The first major find of this stamp was made in 1934 by Ernest E. Fairbanks, who retrieved nine pairs (18 stamps, one or two damaged) on nine separate covers that were returned by the post office years earlier from a bulk mailing. All were postmarked at New York City on October 4, 1924. The nine Fairbanks covers were cut down into pieces, and today there are perhaps five or six of these pieces intact. According to a survey of the Levi records and The Philatelic Foundation patient records, there are four Scott 594 usages. Two are postcards, each bearing a single stamp, cancelled at New York City on March 25 and October 16(?), 1924. A pair on cover (an envelope) is cancelled at New York City on October 13, 1924. The second cover (offered here) is a circular-rate unsealed envelope cancelled at New York City in 1924, but the machine postmark is dateless, as normal for third-class mail.

The stamp on this cover ranks among the four best-centered copies of Scott 594 that exist in any condition. It is the finest of the four recorded usages and the only single franking on an envelope. The perfs cut into the top of the pair on the other known envelope.

ONE-CENT PERF 11 X 10½ IMPERFORATE BETWEEN

2151°

1c Green, Perf 11 x 10½, Vertical Pair, Imperforate Between (632b). Mint N.H., deep rich color on bright paper, wide margins

VERY FINE AND CHOICE. A RARE MINT NEVER-HINGED EXAMPLE OF THE ONE-CENT COMPOUND PERF IMPERFORATE BETWEEN. VERY FEW ARE KNOWN, ESPECIALLY IN MINT NEVER-HINGED CONDITION.

According to Gary Griffith, this error was discovered in 1939 in Bergen N.Y. The find was reported as thirteen blocks of four and three pairs, but some were subsequently determined to have blind perfs and were disqualified.

Illustrated in United States Stamps 1927-32 by Gary Griffith and from his collection. Ex Floyd and Whitman. With 1996 and 2009 P.F. certificates.......................... 10,000.00
2-CENT WITH HORIZONTAL GUTTER

2152° ★★ 2c Carmine, Ty. II (634A). Mint N.H. vertical pair with full horizontal gutter, deep rich color, Very Fine and rare, this is the first example we have offered since 1992, with copy of 1995 P.F. certificate for block of four ......................... 1,400.00

7-CENT IMPERFORATE BETWEEN

2153° ★★ 7c Black, Vertical Pair, Imperforate Between (639a). Mint N.H. with selvage at left, intense shade and impression, fresh and Very Fine, quite scarce, according to Gary Griffith, this variety was first reported in 1939, the postmaster in a small town near Cleveland was annoyed that several panes had some rows of perforations missing, he cut some apart by hand and then gave up, throwing them in a box which was later purchased by a stamp collector, rumored to be Karl Koslowski, it is believed that about 20 pairs and two blocks of four were purchased, it is also known with a Mobile Ala. precancel, with 2000 P.F. certificate, ex Whitman, this is very undercatalogued in relation to its peers ....................... 1,000.00
LATER ISSUES

7-CENT ACADIA NATIONAL PARK, IMPERFORATE VERTICALLY

2154° ** 7c Acadia Park, Horizontal Pair, Imperforate Vertically (746a). Mint N.H., choice centering, intense shade and impression, fresh and Extremely Fine, very scarce, we have offered only one different example since 1993 (in 2000), ex Whitman, with 1975 (as block), 1997 and 2009 P.F. certificates........................................................ 1,200.00

10-CENT SPECIAL DELIVERY, IMPERFORATE BETWEEN

2155° ** 10c Gray Violet, Special Delivery, Horizontal Pair, Imperforate Between (E15c). Mint N.H., deep color, much better centered than most, Very Fine and choice, ex Floyd and Whitman, with 2001 P.F. certificate................................................................. 525.00
30c Deep Claret, Perf 10 at Top (J66b). Neat “St. Louis Mo.” precancel, deep rich color, central thin spot
FINE. THIS IS ONE OF ONLY TWO RECORDED EXAMPLES OF THE 30-CENT 1917 POSTAGE DUE ISSUE PERFORATED 10 ON ONE SIDE. THIS RARE PERFORATION VARIETY WAS ONLY RECENTLY LISTED IN THE SCOTT CATALOGUE, BASED ON THIS STAMP AND ANOTHER FOUND BY JOHN R. BOKER, JR.

Records indicate that the printing of this Postage Due issue in the Deep Claret shade occurred concurrently with the printing of the Washington-Franklin regular issues that were perforated on the machine with the pins in part of one row set at gauge 10 instead of 11. This stamp and the other known example were both discovered by John R. Boker Jr. as he was sorting his collection of precancels.

With 2008 P.F. certificate ................................................................. 21,000.00

Shipping and Transit Insurance

We will be pleased to arrange for shipping and transit insurance for purchases in this sale (except those described as “floor sale only”). To expedite billing and delivery of lots to hundreds of buyers per sale, we use standard charges for postage and insurance, based on the package weight and mailing requirements (see schedule). The standard charges are sometimes slightly more or less than the actual postage or Fedex fees, but we do not include any charge for our labor or packing costs. Therefore, we ask all buyers to remit the prescribed amount for shipping charges.

Transit insurance is provided in all cases, except when the buyer has furnished us with proof that insurance coverage is effective under another policy. Proof, in such cases, will be accepted in the form of a written certificate from the insurance carrier.

You are responsible for insurance charges, which will be added to your invoice. This coverage is provided for our mutual protection against theft or loss in transit.

Bidding Increments

The auctioneer may regulate the bidding at his discretion. However, to assist absentee bidders in establishing their maximum bid for each lot, the increments shown at right will be used in most cases. We recommend that written bids conform to these increments (those which do not will be reduced to the next level).

REVISED CHARGES FOR SHIPPING EFFECTIVE SEPTEMBER 1, 2009

We have reduced the Fedex Envelope charge to $20, reflecting the elimination of the fuel surcharge. All other charges remain the same.
