Conditions of Sale (please read carefully before bidding)

THE PROPERTY IN THIS CATALOGUE WILL BE OFFERED AT PUBLIC AUCTION BY ROBERT A. SIEGEL AUCTION GALLERIES, INC. (“GALLERIES”) ON BEHALF OF VARIOUS CONSIGNORS AND ITSELF OR AFFILIATED COMPANIES. BY BIDDING ON ANY LOT, WHETHER DIRECTLY OR THROUGH A THIRD PARTY, IN PERSON, BY TELEPHONE, FACSIMILE, INTERNET OR BY ANY OTHER MEANS, THE BIDDER ACKNOWLEDGES AND AGREES TO ALL OF THE FOLLOWING CONDITIONS OF SALE.

1. The highest bidder acknowledged by the auctioneer shall be the buyer. The term “final bid” means the last bid acknowledged by the auctioneer, which is normally the highest bid offered. The purchase price payable by the buyer will be the sum of the final bid and a commission of 18% of the final bid (“buyer's premium”), together with any sales tax, use tax or customs duties due on the sale.

2. The auctioneer has the right to reject any bid, to advance the bidding at his discretion and, in the event of a dispute, to determine the successful bidder, to continue the bidding or to reoffer and resell the lot in dispute. The Galleries' record of the final sale shall be conclusive.

3. All bids are per numbered lot in the catalogue unless otherwise announced by the auctioneer at the time of sale. The right is reserved to group two or more lots, to withdraw any lot or lots from the sale, or to act on behalf of the seller. The Galleries will execute bidding instructions on behalf of clients, but will not be responsible for the failure to execute such bids or for any errors in the execution of such bids.

4. Lots with numbers followed by the symbol ° are offered subject to a confidential minimum bid (“reserve”), below which the lot will not be sold. The absence of the symbol ° means that the lot is offered without a reserve. If there is no reserve, the auctioneer has sole discretion to establish a minimum opening bid and may refuse an offer of less than half of the published estimate. Any lot that does not reach its reserve or opening bid requested by the auctioneer will be announced as “passed” and excluded from the prices realized lists after the sale. The Galleries may have a direct or indirect ownership interest in any or all lots in the sale resulting from an advance of monies or goods-in-trade or a guarantee of minimum net proceeds made by the Galleries to the seller.

5. Subject to the exclusions listed in 5(A), the Galleries will accept the return of lots which have been misidentified or which have obvious faults that were present when the lot was in the Galleries' custody, but not so noted in the lot description. All disputed lots must be received by the Galleries intact with the original packing material within 5 days of delivery to the buyer but no later than 30 days from the sale date. (5A) EXCLUSIONS: The following lots may not be returned for any reason, or may not be returned for the reasons stated: i) lots containing 5 or more items; ii) items from buyers who registered for the pre-sale exhibition or received lots by postal viewing, thereby having had the opportunity to inspect them before the sale; iii) any lot described with “faults,” “defects” or a specific fault may not be returned because of any secondary fault; iv) photographed lots may not be returned because of centering, margins, short/nibbed perforations or other factors shown in the illustrations; v) the color of the item does not match the color reproduction in the sale catalogue or website listing; vi) the description contains inaccurate information about the quantity known or reported; or vii) a certification service grades a stamp lower than the grade stated in the description or on an accompanying certificate.

6. Successful bidders, unless they have established credit with the Galleries prior to the sale, must make payment in full before the lots will be delivered. Buyers not known to the Galleries must make payment in full within 3 days from the date of sale. The Galleries retains the right to demand a cash deposit from anyone prior to their participation and/or to demand payment at the time the lot is knocked down to the highest bidder, for any reason whatsoever. In the event that any buyer refuses or fails to make payment in cash for any lot at the time it is knocked down to him, the auctioneer reserves the right to reoffer the lot immediately for sale to the highest bidder. Credit cards (Visa, Mastercard and Discover only) can be accepted as payment but will be subject to a 3% non-refundable Convenience Fee, which will be added to the total of the entire invoice (including hammer price, buyer's premium, shipping and transit insurance charges and any applicable taxes). The buyer waives the right to dispute all credit card charges.

7. If the purchase price has not been paid within the time limit specified above, nor lots taken up within 7 days from the date of sale, the lots will be resold by whatever means deemed appropriate by the Galleries, and any loss incurred from resale will be charged to the defaulting buyer. Any account more than 30 days in arrears will be subject to a late payment charge of 15% per month as long as the account remains in arrears. Any expenses incurred in securing payment from delinquent accounts will be charged to the defaulter. A fee of $250.00 per check will be charged for each check returned for insufficient funds.

8. All lots are sold as genuine. Any lot accompanied by a certificate issued by The Philatelic Foundation, British Philatelic Association, Royal Philatelic Society of London or any other authority recognized by the A.I.E.P. in a specific area of expertise, and dated within 5 years of the sale date, is sold “as is” and in accordance with the description on the certificate. Such lots may not be returned for any reason, including but not limited to a contrary certificate of opinion. Buyers who wish to obtain a certificate for any item that does not have a certificate (dated as above) may do so, provided that the following conditions are met: (i) the purchase price must be paid in full, (ii) the item must be submitted to an acceptable expertizing committee with a properly executed application form within 21 days of the sale, (iii) a copy of the application form must be given to the Galleries; (iv) the Galleries retains the right to resubmit the item for reconsideration, without time limit or other restrictions, for the purpose of obtaining a satisfactory opinion, (v) lots submitted for certification will be considered cleared 90 days from the date of sale, whether or not a certificate has been issued, unless the Galleries issues written approval of a further extension of return privileges, and (vi) in the event the lot is determined to be misidentified or misdescribed, pursuant to 5 and 5(A) of these Conditions, the Galleries will issue a refund to the buyer for the full purchase price and actual certification fees up to $800.00, but the reimbursement for certificate fees (and related costs) shall not exceed 10% of the hammer price of the lot.

9. Until paid for in full, all lots remain the property of the Galleries on behalf of the seller.

10. Agents executing bids on behalf of clients will be held responsible for all purchases made on behalf of clients unless otherwise arranged prior to the sale.

11. The buyer assumes all risk for delivery of purchased lots and agrees to pay for prescribed shipping costs. Buyers who receive lots in the U.S. are obligated to pay whatever sales tax or compensating use tax might be due, at any time, and buyers outside the U.S. are responsible for all customs duties.

12. The bidder consents that any action or proceeding against it may be commenced and maintained by or in any forum within the State of New York or in the United States District Court for the Southern District of New York, that the courts of the State of New York and United States District Court for the Southern District of New York shall have jurisdiction with respect to the subject matter hereof and the person of the bidder. The bidder agrees not to assert any defense to any action or proceeding initiated by Galleries based upon improper venue or inconvenient forum. The bidder agrees that any action brought by the bidder shall be commenced and maintained only in a Federal Court in the United States District Court for the Southern District of New York or the State Court in the county in which Galleries has its principal place of business in New York. The bidder agrees not to use a public conflict resolution service and not to use any form of social media to publish comments or information about the Galleries and its employees which might harm the Galleries’ reputation or business. These Conditions of Sale shall be governed by and construed in accordance with the substantive laws of the State of New York, and shall constitute an agreement that shall be binding on the parties, and their respective heirs, administrators, distributees, successors and assigns.

Grades, Abbreviations and Values Used in Descriptions

Grades and Centering

Our descriptions contain detailed information and observations about each item’s condition. We have also assigned grades to stamps and covers, which reflect our subjective assessment. For stamps, the margin width, centering and gum are described and graded according to generally-accepted standards (an approximate correlation to numeric grades is provided at right). Although we believe our grades are accurate, they are not always exactly aligned with third-party grading terms or standards for all issues. A lot may not be returned because a certification service grades a stamp lower than the grade stated in the description. Information from the P.S.E. Stamp Market Quarterly and P.S.E. Population Report™ is the most current available, but lots may not be returned due to errors or changes in statistics or data.

PRE-1890 ISSUES

*Pre-1890 stamps in these categories trade at a premium over Scott value*

Scott Value for “O.G.”: Disturbed Original Gum: Gum showing noticeable effects of humidity, climate or hinging over more than half of the gum. The significance of gum disturbance in valuing a stamp in any of the Original Gum categories depends on the degree of disturbance, the rarity and normal gum condition of the issue and other variables affecting quality. For example, stamps issued in tropical climates are expected to have some gum disturbance due to humidity, and such condition is not considered a negative factor in pricing.

1890-1935 ISSUES

Scott “Never Hinged” Values for Nos. 219-771: Scott Value for “O.G.” (Actual value will be affected by the degree of hinging)

1935 TO DATE

Scott Value for “Unused”

Covers

Minor nicks, short edge tears, flap tears and slight reduction at one side are normal conditions for 19th century envelopes. Folded letters should be expected to have at least one file fold. Light cleaning of covers and small mends along the edges are accepted forms of conservation. Unusual covers may have a common stamp with a slight crease or tiny tear. These flaws exist in virtually all 19th century covers and are not always described. They are not grounds for return.

Catalogue Values and Estimates

For our International auctions, the number range in the right-hand column (e.g. E. 1,000-1,500) is our valuation in U.S. dollars. Our estimates tend to be conservative, as the vast majority of lots sell in the estimate range or above. These are not start prices, and if there is a reserve on a lot the reserve will never exceed the low end of the estimate range. We have quoted the Scott Catalogue value (if applicable) at the end of the description, along with any other appropriate catalogue values such as Stanley Gibbons (SG), Michel, Yvert, Unitrade, etc.).

Because of certain pricing inconsistencies in the Scott Catalogue—for example, blocks that have no gum, the absence of premiums for Mint N.H. items, etc.—we cannot guarantee the accuracy of values quoted for multiples, specialized items and collection lots. We generally try to be conservative, but buyers may not return a lot because of a discrepancy in catalogue value due to Scott pricing inconsistencies.

Revised 1/2012
Dawn of a New Day

It is now a little more than a year since all of our lives were upended by Covid-19. Faced with this new “enemy” and the fear of the unknown, we all did what we could to cope. Despite the terrible human and economic toll, we managed, innovated, created and persevered.

While there is still much more to do to eradicate the Covid-19 threat, and some countries are still experiencing terrible surges in infection rates, the new vaccines are helping much of the world to begin opening up. We are pleased to announce that not only has New York City started to welcome visitors, our saleroom is now open for “in person” auctions and lot viewings. There will be some simple measures to ensure the safety of our clients and staff, but it is starting to feel a lot like “normal” again.

During the past year, many of us turned to our hobbies for solace and comfort, including stamp collecting, which has experienced tremendous growth. With many starting to collect or reviving their interest, the demand and prices for stamps have strengthened, some to a remarkable degree.

We cannot think of a better auction to present to you – and to welcome you back – than this current Siegel International sale. It is filled with an impressive array of scarce and desirable stamps of the world. There is so much to see and view in this auction, we think it is the perfect opportunity to attend a Siegel auction and to view lots in person. You are invited! Of course, as we have seen throughout this past year, “virtual” participation in our auctions is seamless and fun, and has drawn record numbers of bidders from around the world. So, if you cannot join us, we welcome you to bid online via the Siegel website.

In addition to the individual stamps offered in this auction, a huge offering of large lots and collections of the world will be made during Thursday afternoon, May 27. This is the most impressive offering of worldwide collection lots we have made in years.

Those of you who have viewed, bid on and bought Siegel International large lots in past sales know that ours are unlike most offered by other auction houses. Our large lot offerings are filled with desirable material, not cobbled together from stripped-down “leftover” collections. They are enticingly and conservatively estimated. And all are offered without reserves. While these lots will definitely appeal to dealers, collectors should look carefully at them as a way to augment an existing collection or to get started in a new collecting area.

Because there is so much to see and view, we have extended the viewing times at our gallery. Starting on May 10 and continuing through May 24 (Monday through Friday, 10:00 a.m. to 4:00 p.m.), clients may come to our office and see for themselves that the large lots are extraordinarily desirable. In addition, we will have a special weekend viewing Saturday and Sunday, May 22 and 23. If you are unable to travel to see the lots in person, you can view PDFs and videos of most of the large lots from your computer at home.

In the United States, we are beginning to see the dawn of a new day, and we hope other countries succeed in their fight against Covid-19. It will be a pleasure to welcome you all to the auction, either in person for the first time in more than a year or from a distance by internet or phone.

NEARLY FINE. A RARE EXAMPLE OF THE 1850 8-CENT COTTON REEL. ONE OF THE CLASSIC AND ICONIC RARITIES OF WORLDWIDE PHILATELY.
The first stamps of British Guiana were issued in July 1850, in denominations of 2c, 4c, 8c and 12c. They were printed at the offices of the Royal Gazette of British Guiana newspaper. Quickly produced from printer’s type and a printer’s rule bent into a crude circle, the stamps earned the nickname “Cotton Reel” from collectors because they look similar to labels on the wooden ends of a reel of cotton thread. Each stamp was initialed as a control to prevent either theft or counterfeiting.

VERY FINE APPEARANCE. AN EXCEPTIONALLY RARE EXAMPLE OF THE 1856 4-CENT BLACK ON MAGENTA PROVISIONAL ISSUE. AN ICONIC BRITISH COMMONWEALTH RARITY.

The Provisional issue was printed in Georgetown by Baum and Dallas, who published the Official Gazette. Despite the minute areas of surface repair, the example offered here is in far better condition than most.

No more than 87 unused stamps can still exist, though the actual number of surviving copies is probably quite lower. In addition to these, 95 were used and 18 were defective and subsequently destroyed.

The first Pence Issues of Canada were printed by the New York firm of Rawdon, Wright, Hatch & Edson, the same firm that printed the New York Postmaster's Provisional and United States 5c and 10c 1847 Issue. The Pence issues show the same fine quality of engraving that distinguishes the U.S. 1847 Issue. The stamps were printed early in 1851 (3p issued April 23), at the same time that RWH&E’s contract for providing United States stamps was coming to an end. The 3p design was executed by Sandford Fleming and engraved by Alfred Jones.

A handsome unused example of the famous Canada 1851 12-pence black on laid paper. One of the world's most iconic and desirable classic rarities.

The first Pence Issues of Canada were printed by the New York firm of Rawdon, Wright, Hatch & Edson, the same firm that printed the New York Postmaster's Provisional and United States 5c and 10c 1847 Issue. The Pence issues, and particularly the 12-pence, show the same fine quality of engraving that distinguishes the U.S. 1847 Issue. The original die was engraved by Alfred Jones and is based upon the Chalon portrait, which was also used on the stamps of Queensland, Tasmania, Bahamas and New Zealand, among other British colonies. The stamps were printed early in 1851 (12p issued June 14), at the same time that RWH&E's contract for providing United States stamps was coming to an end.

A total of 50,000 stamps were printed from 250 sheets of 200 subjects (two panes of 100). Only 1,450 examples were sold with the balance being destroyed. Our census, available on our website at https://siegelauctions.com/census/canada/scott/3, records a total of 26 unused singles plus four pairs.

VERY FINE AND CHOICE. A BEAUTIFUL NEVER-HINGED EXAMPLE OF THE RARE $2.00 TRURO PROVINCIAL NORMAL SCHOOL INVERT.

This issue was printed in five lithographed colors, with engraved inscriptions. After printing on the lithographic press, they were cut into sheets of 100 consisting of four panes of 25, then put through a second press for the inscriptions. Four panes of 25 reached public hands, but these panes contain a total of 30 positions showing gutter guides or white space, so only 70 inverts were printed. Of these 70, many are still attached to the gutter guide positions. A block of 15 was lost, so this leaves approximately 37 singles available to collectors.

1964 SIX PENCE H.M.S. GLASGOW
A CHOICE EXAMPLE OF THIS FAMOUS ERROR RARITY

Original gum, barest trace of hinging, rich colors, well-centered and fresh

VERY FINE. A LOVELY EXAMPLE OF THE FAMOUS H.M.S. "GLASGOW" ERROR OF VIGNETTE. PERHAPS 25 ARE KNOWN.

This issue was produced to commemorate the 50th anniversary of the Battle of the Falkland Islands. It is believed this error occurred when a sheet with the center showing the "Glasgow", which was used for the 2½p value, was accidentally included among the supply of the 6p value, where it received the wrong frame. Stanley Gibbons notes about 25 have been recorded. The reason the majority have not been found is that most were included in new issue shipments, and the error was not discovered until the vast majority were dispersed. Collectors and dealers received them without knowing their special significance. Many collectors hinged them in their albums, making for an unusually large percentage of hinged examples in the marketplace.

One of the key error rarities of the Queen Elizabeth II era. Scott $30,000.00. SG £40,000

**VERY FINE. A RARE EXAMPLE OF THE 1920 ONE-SHILLING STATUE OF QUEEN VICTORIA WITH FRAME INVERTED. AN IMPORTANT JAMAICAN RARITY AND ONE OF THE MOST FAMOUS INVERTED CENTERS OF THE WORLD.**

In March 1922, a small number (reported to be ten) of the One Shilling stamps with the frame inverted were found at the Manchioneal post office, a small village on the north east coast. It is certain that a full sheet of 60 was printed, but that only 30 were sent to Manchioneal. Most of these 30 were used on telegrams or on thrift savings cards. However, examples removed from telegrams cannot be distinguished from postally used, as the canceling device was the same. The other half of the sheet was probably sold over the counter in Kingston, as used copies with Kingston cancels exist. It is believed no more than twenty five (unused or used) are known.

VERY FINE AND RARE EXAMPLE OF THE 6-CENT ON 8-CENT SURCHARGE ON THE ARMS STAMP INSCRIBED “POSTAGE”. ONE OF THE KEY RARITIES TO NORTH BORNEO.

This provisional was placed into use due to the change in postal rates to 6c for postcards (April 1891) and letters (June 1891) to most destinations. The 8c stamps were used since the rate had been abolished and stocks were plentiful. It is theorized that one, possibly two, sheets of the Arms with “Postage” were used rather than those inscribed “Postage & Revenue” — perhaps by accident or due to availability.

The first example we have offered since keeping computerized records. With 2012 Sismondo certificate. Scott $9,000.00. SG £9,000 ................. E. 3,000-4,000
NORTHERN NIGERIA 1904 £25 KING EDWARD VII

Despite the inscription “Postage & Revenue” along the sides, it is almost unfathomable to consider what would cost £25 for postal fees. For perspective, a regular envelope to England would be a couple pence. The intention of this stamp was to be used for revenue purposes only, such as liquor licenses.

1847, (5c) Blue, Lady McLeod (SG 1). Certificate states “unused with the corner skimmed”, expert repairs which includes the addition of margins at top, left and bottom, extensively repainted along edges of margin and whole bottom left quadrant of stamp.

Very fine appearing example of the rare 1847 Lady McLeod stamp.

This private-issue stamp appeared six months before the “Post Office” Mauritius and is the earliest stamp used in any British Colony. The stamp was issued in April 1847 to prepay the private conveyance of mails on the Lady McLeod between Port of Spain and San Fernando. Details regarding the printing of this stamp have never been found, but it has been surmised that they were likely printed at the offices of the local newspaper, as were several other early British Colonial stamps and the Hawaiian Missionaries. The full story of this stamp is told on pp. 196-199 of Stamps of Fame by L.N. & M. Williams.

Peter Ford Census No. U19 (which can be found on the British West Indies Study Circle website). This stamp has always been traded as unused. With the certificate noting a corner skimmed, some may consider this used. With 1969 R.P.S. certificate as noted above. Scott $50,000.00 as unused - $12,000.00 as used - $5,500.00 as skimmed. THE GORDON N. JOHN COLLECTION OF URUGUAY 1858 FIRST ISSUE

We are pleased to present another offering from the Gordon N. John collection, comprising the Uruguay 1858 Issue, widely known as the “Sun” Issue. This issue is represented mainly by what G.N.J. refers to as “mint multiples,” a facet of philately he has held in high regard for many years. The collection is replete with scarce shades, Thick Paper varieties, plate varieties and multiples. For the serious philatelist, this offering is of monumental importance.

120-CENTESIMOS UNUSED BLOCK OF SIX
THE ONLY KNOWN BLOCK

2827 (★) 1858, 120c Blue (4). Transfer Types 4-5-6/10-11-12, horizontal block of six, unused (no gum) with blue oval official Montevideo post office handstamp and some lightened manuscript on back, clear to ample margins all around, bright shade and fresh color, a few scattered black specks, thinned along top

VERY FINE APPEARANCE. THE ONLY KNOWN BLOCK OF THE 120-CENTESIMOS 1858 FIRST ISSUE OF URUGUAY. ONE OF THE MOST IMPORTANT MULTIPLES OF CLASSIC SOUTH AMERICAN PHILATELY.

This unused block of six is the only recorded multiple of the 120c 1858 Issue, besides the three vertical tête-bêche pairs. It is one of the most important multiples known to philately.

The 120c block of six was owned by Ferrary, but it was not included in the massive Uruguay collection lot sold in the first auction. It was offered in a smaller collection of 1,275 items in the third sale (lot 457) and must have been acquired by Alfred F. Lichtenstein, who included it in his exhibit of Uruguay at the International Philatelic Exhibition held in Montevideo in April 1931 (reported by E. J. Lee in The Postage Stamps of Uruguay, page xii), and in the display at the May 1940 Centenary exhibition at The Collectors Club of New York. After Lichtenstein’s death in 1947, his daughter, Louise Boyd Dale, sold the block and other Uruguay rarities to Robert Hoffmann, who featured it in his Uruguay exhibit, which captured the Grand Award at the 1956 FIPEX exhibition in New York City. The current owner acquired the block in the 1982 Corinphila sale of the Hoffmann collection.

EXTREMELY FINE. ONE OF THREE RECORDED BLOCKS OF THE 1858 180-CENTESIMOS FIRST ISSUE. THIS IS THE ONLY KNOWN BLOCK OF THE DARK GREEN SHADE.

Only three blocks of the 180c 1858 Issue are recorded. The three blocks have been in important collections of Uruguay for the past century, and no other blocks have been discovered in all of that time. The only other multiple larger than a pair is one strip of three, offered as lot 2849.

Each of the three known blocks of four is unused and has unique characteristics. This block is the only one in the Dark Green shade. One of the three blocks is on thick paper (lot 2861). The third known block is in the regular shade on normal paper.

This Dark Green block was owned by Alfred F. Lichtenstein and his daughter, Louise Boyd Dale, for approximately fifty years. It was among the items retained by Mrs. Dale after her father's death in 1947 and after she sold a selection of Uruguay rarities to Robert Hoffmann. The collector acquired the block in the 1970 H.R. Harmer sale of the South America portion of the Dale-Lichtenstein collection.

2856 (★) 1858, 180c Dark Green (5a). Transfer Types 16/22A, vertical pair from bottom two rows showing “squeezed transfers” and defective transfer Type 22A, unused (no gum), large to huge margins including bottom sheet margin, beautiful deep shade, very fresh, couple faint creases

EXTREMELY FINE APPEARANCE. THE ONLY RECORDED MULTIPLE CONTAINING THE “SQUEEZED TRANSFER” VARIETY. AN OUTSTANDING AND VISUALLY STRIKING MULTIPLE OF CLASSIC URUGUAY.

To build up a lithographic printing stone, the printer had to use an intermediate transfer unit to create the subjects on the stone. The three values of the 1858 Issue each appear to have had 30 transfer types arranged in five horizontal rows of six in the intermediate transfer block.

The 240c printing stone of 204 subjects, arranged in 17 rows of 12, was created by making six separate transfers from the intermediate transfer block of 30 for the first 15 rows (180 subjects), and dividing the transfer block into two blocks of 12 for the remaining two rows at bottom. While we know the precise configuration of the 240c stone, owing to the discovery of the sheet of 204, the rarity of 120c and 180c multiples makes it impossible to prove the exact relative positions of the types in the intermediate transfer block, or even to determine the size and configuration of the printing stones for these two values.

This “squeezed transfer” pair, of which only one multiple is known (there are also a few singles from these positions), is printed in Dark Green. The lower stamp is a severely deformed transfer which impinges on the subject above. The faulty transfer shows a white line through “Montevideo” and missing “1” in the denomination, creating a virtual “80” centésimos value.

The 180c continues to challenge specialists trying to reconstruct the positions on the printing stone. This transfer variety, from the bottom two rows, is one of the keys to the solution and was acquired by Robert Hoffmann in the Alfred H. Caspary sale after he won the Grand Award at FIPEX in 1956.

180-CENTESIMOS GREEN ON THICK PAPER

2861 ★★★ 1858, 180c Green, Thick Paper (5c). Transfer Types 7-8/13-14, block of four, original gum, h.r., bright shade and strong impression, diagonal crease affects three stamps but not very noticeable without magnification.

EXTREMELY FINE. ONE OF THREE RECORDED BLOCKS OF THE 1858 180-CENTESIMOS FIRST ISSUE. THIS IS THE ONLY KNOWN BLOCK ON THICK PAPER.

Only three blocks of the 180c 1858 Issue are recorded. The three blocks have been in important collections of Uruguay for the past century, and no other blocks have been discovered in all of that time. The only other multiple larger than a pair is one strip of three, offered as lot 2849.

Each of the three known blocks of four is unused and has unique characteristics. This block is the only one on thick paper (Scott 5c). One of the three blocks is the Dark Green shade (lot 2855). The third known block is in the regular shade on normal paper.

This block on thick paper was exhibited by Robert Hoffmann at the 1956 FIPEX international, where he captured the Grand Award. When Hoffmann’s collection was sold by Corinphila in 1982, this block was acquired by Enrique Martin de Bustamante and included in the collection exhibited by his wife, Angel Ruiz Vegas, which won the Grand Prix International in Argentina in 1985 and the Grand Prix d’Honneur in 1987 and 1992.

EXTREMELY FINE. THE ONLY RECORDED MULTIPLE CONTAINING THE TYPE 4 AND 20 MIXED TRANSFER POSITIONS. AN OUTSTANDING MULTIPLE OF THIS CLASSIC URUGUAY ISSUE.

To build up a lithographic printing stone, the printer had to use an intermediate transfer unit to create the subjects on the stone. The three values of the 1858 Issue each appear to have had 30 transfer types arranged in five horizontal rows of six in the intermediate transfer block.

The 240c printing stone of 204 subjects, arranged in 17 rows of 12, was created by making six separate transfers from the intermediate transfer block of 30 for the first 15 rows (180 subjects), and dividing the transfer block into two blocks of 12 for the remaining two rows at bottom. While we know the precise configuration of the 240c stone, owing to the discovery of the sheet of 204, the rarity of 120c and 180c multiples makes it impossible to prove the exact relative positions of the types in the intermediate transfer block, or even to determine the size and configuration of the printing stones for these two values.

This vertical pair helps prove that the transfer types were placed in mixed positions on the bottom two rows of the 180c printing stone. Rather than the usual configuration of Type 4 over 10, or 14 over 20, in the transfer block of 30, this pair has a large bottom margin, so we know a Type 20 transfer was made in the bottom row of the printing stone, and Type 4 was transferred directly above in a slightly “squeezed” position.

The 180c continues to challenge specialists trying to reconstruct the positions on the printing stone. This transfer variety, from the bottom two rows, is one of the keys to the solution.

2863 1858, 180c Green, Thick Paper (5c). Transfer Types 18/24B, vertical pair from bottom two rows with defective transfer Type 24B at bottom and also showing tightly spaced transfers, original gum, h.r., large to huge margins including bottom right corner sheet margins, bright shade shade, very fresh, horizontal crease in bottom stamp almost appears to be an artifact of manufacturing

EXTREMELY FINE APPEARANCE. THE ONLY RECORDED MULTIPLE CONTAINING THE TYPE 24B DEFECTIVE TRANSFER. A MARVELOUS CLASSIC URUGUAY RARITY.

This vertical pair on thick paper comes from the bottom right corner of the printing stone. The lower stamp is a severely deformed transfer, which was placed close to the row above. This stamp is missing a significant part of the design at bottom — it is not a printing variety, but reflects the incomplete transfer, identified by specialists as Type 24B.

The 180c continues to challenge specialists trying to reconstruct the positions on the printing stone. This transfer variety, from the bottom two rows, is one of the keys to the solution.

VERY FINE DESPITE LIGHT CREASING. ONE OF THE RAREST AND MOST FASCINATING TRANSFER VARIETIES OF SOUTH AMERICAN PHILATELY. VERY FEW MULTIPLES OF THE 240-CENTESIMOS 1858 ISSUE ARE KNOWN WITH THE BLANK SPACE POSITION.

The 240c printing stone of 204 subjects, arranged in seventeen rows of twelve, was created by making six separate transfers from the intermediate transfer block of thirty for the first fifteen rows (180 subjects). To make the two bottom rows (24 subjects), the printer divided the transfer block into two blocks of twelve. The transfer block of thirty included one 180c design in error, which was transferred to seven positions on the printing stone. After a short print run, the printer erased the 180c transfers and left seven blank spaces, rather than entering the correct 240c transfers. The strip offered here comes from the middle left section of the sheet (Positions 100-[101]-102), containing blank space 3.

THE GORDON N. JOHN COLLECTION OF URUGUAY 1858 FIRST ISSUE

240-CENTESIMOS BROWN RED UNUSED BLOCK OF FOUR
THE ONLY RECORDED BLOCK OF THE BROWN RED SHADE

2882 ★ 1858, 240c Brown Red (6b), block of four, original gum, h.r., large margins, intense shade and sharp impression, very fresh, horizontal crease in margin between stamps and another in top pair
EXTREMELY FINE APPEARANCE. THIS IS THE ONLY RECORDED BLOCK OF THE 1858 240-CENTESIMOS IN THE RARE AND DISTINCTIVE BROWN RED COLOR. AN IMPORTANT CLASSIC MULTIPLE OF URUGUAY.

The normal color of the 240c is Vermilion (in dull, bright or deep shades), but the stamps were also printed in a distinctive Brown Red (listed in Scott as Brick Red), which is an entirely different ink mixture. It is reported that one multiple of the Brown Red was divided and sold by Jean-Baptise Moens, a 19th century Belgian stamp dealer, but the existence of duplicate positions (see lots 2883 and 2884) prove that at least two different multiples reached collectors. Single examples of the Brown Red are very scarce and desirable, and only two multiples have been recorded, both of which are in the Gordon N. John collection — the only known block offered here and the strip of four with blank space in lot 2883.

Robert Hoffmann displayed this block in the exhibit of Uruguay that won the Grand Award at FIPEX in 1956. In the inventory accompanying the exhibit Hoffmann described it as “unique,” and gave its provenance as “ex-Guinle collection,” referring to Dr. Guglielmo Guinle, a noted South American philatelist during the 1930s.

THE ONLY RECORDED 240-CENTESIMOS BROWN RED MULTIPLE WITH BLANK SPACE

2883 ★ 1858, 240c Brown Red, Se-Tenant with Blank Space (6b variety). Transfer Types 21-22-[23]-24, horizontal strip of four with blank space 6 from the lower right section of the sheet, Positions 165-166-[167]-168, original gum, h.r., large margins, intense shade and sharp impression, very fresh, vertical and diagonal creases in blank space (one reinforced with hinge).

EXTREMELY FINE APPEARANCE. THIS IS THE ONLY RECORDED EXAMPLE OF A BLANK SPACE IN A MULTIPLE OF THE 1858 240-CENTESIMOS IN THE RARE AND DISTINCTIVE BROWN RED COLOR. ONE OF THE GREAT RARITIES OF CLASSIC URUGUAY.

The 240c printing stone of 204 subjects, arranged in seventeen rows of twelve, was created by making six separate transfers from the intermediate transfer block of thirty for the first fifteen rows (180 subjects). To make the two bottom rows (24 subjects), the printer divided the transfer block into two blocks of twelve. The transfer block of thirty included one 180c design in error, which was transferred to seven positions on the printing stone. After a short print run, the printer erased the 180c transfers and left seven blank spaces, rather than entering the correct 240c transfers. The strip offered here comes from the lower right section of the sheet (Positions 165-166-[167]-168), containing blank space 6, which can be identified by the tiny dot outside the top left corner of the stamp at right (lightly circled in pencil on this strip).

The normal color of the 240c is Vermilion (in dull, bright or deep shades), but the stamps were also printed in a distinctive Brown Red (listed in Scott as Brick Red), which is an entirely different ink mixture. It is reported that one multiple of the Brown Red was divided and sold by Jean-Baptiste Moens, a 19th century Belgian stamp dealer, but the existence of duplicate positions (this strip and lot 2884) prove that at least two different multiples reached collectors. Single examples of the Brown Red are very scarce and desirable, and only two multiples have been recorded, both of which are in the Gordon N. John collection — the only known block offered in lot and the strip of four with blank space offered here.

This strip was owned by Alfred F. Lichtenstein, who included it in his exhibit of Uruguay at the International Philatelic Exhibition held in Montevideo in April 1931 (reported by E. J. Lee in The Postage Stamps of Uruguay, page xii). After Lichtenstein’s death in 1947, his daughter, Louise Boyd Dale, sold the strip and other Uruguay rarities to Robert Hoffmann, who featured it in his Uruguay exhibit, which captured the Grand Award at the 1956 FIPEx exhibition in New York City. In the inventory accompanying the exhibit Hoffmann described it as “unique.” It was sold in the 1982 Corinphila sale of the Hoffmann collection to Enrique M. de Bustamante and was part of his wife’s Grand Prix International exhibit. The current owner acquired it in the 1993 Feldman sale of the de Bustamante collection.

240-CENTESIMOS DULL VERMILION ON THICK PAPER
THE “CROSS” BLOCK WITH BLANK SPACE

1858, 240c Dull Vermilion, Thick Paper, Se-Tenant with Blank Space (6d variety).
Transfer Types 17/22-[23]-24/29 in a cross-shaped block of five with blank space 1 at center. Positions 29/40-[41]-42/53, original gum, bright shade on Thick Paper, vertical crease between stamps at right, tiny margin tears at top left and top right of stamp at bottom, small ink mark on bottom stamp.

VERY FINE. ONE OF PERHAPS TWO OR THREE 1858 240-CENTESIMOS MULTIPLES ON THICK PAPER CONTAINING THE BLANK SPACE VARIETY. A WONDERFUL EXHIBITION ITEM.

The 240c printing stone of 204 subjects, arranged in seventeen rows of twelve, was created by making six separate transfers from the intermediate transfer block of thirty for the first fifteen rows (180 subjects). To make the two bottom rows (24 subjects), the printer divided the transfer block into two blocks of twelve. The transfer block of thirty included one 180c design in error, which was transferred to seven positions on the printing stone. After a short print run, the printer erased the 180c transfers and left seven blank spaces, rather than entering the correct 240c transfers. The block offered here comes from the top left section of the sheet (Positions 29/40-[41]-42/53), containing blank space 1.

The vast majority of 1858 Issue stamps are found on normal paper, but the 180c and 240c are also found on a very thick paper, single examples of which are quite scarce. Only one block of the 180c on thick paper is recorded (offered in lot 2861), and very few blocks of 240c on thick paper are recorded. The cross-shaped block offered here contains blank space 1. It is a Dull Vermilion color, and the paper is very thick. The blank space shows tiny traces of the erased 180c transfer.

The 1936 Plumridge & Co. sale of the Emmanuel J. Lee collection of Uruguay listed a block of four “cast as a cross, dull vermillion” (lot 1444), which must be this block on thick paper. The Hoffmann collection contained a block of nine which he described as “very thick paper,” but it was not described as such in the 1982 Corinphila sale. We are not aware of any other 240c blank space examples on thick paper.

Worldwide Valuable Collection. Housed in two insanely bulging Stanley Gibbons New Ideal Albums, 1840 to the mid-1930s, even before perusing the pages one can sense this collection is not just any ordinary collection, as it was tenaciously and relatively neatly assembled by a true lover of stamps, one will certainly find easily recognizable valuable commercial items such as the Dollfuss stamp of Austria and a Liechtenstein Vaduz souvenir sheet (both mint), but the real virtue of this collection are the thousands of more modestly priced stamps of the world you do not find with any frequency anymore, the collection contains all areas of the world, but is especially strong in Western Europe, French and Italian Colonies, Scandinavia and other regions, by far the most valuable section is the strong representation of United States stamps that is especially well filled (even with auxiliary pages stuffed inside the bound pages), running the gamut from early used classics to complete 1893 Columbians (mixed unused and used), to even a never hinged set of 1930 Graf Zeppelins, the collection as a whole is not overburdened with faulty early classics, and while there is mixed quality on many early issues, the collection contains many Fine to Very Fine stamps, examination is highly recommended to confirm one does not see collections like this offered anymore........................ There will be no added insurance charge for shipments of less than $75,000 value. Shipments valued in excess of $75,000 may require supplemental insurance and/or special courier service, the estimated cost of which will be furnished to the buyer prior to shipment. If the buyer refuses to pay the estimated charges or furnish proof of self-insured coverage, the buyer will be responsible for picking up the lots at our office and any resulting sales tax.

### Bidding Increments

The auctioneer may regulate the bidding at his discretion. However, to assist absentee bidders in establishing their maximum bids, the increments shown here will be used in most cases. We recommend that written bids conform to these increments—bids that do not will be reduced accordingly.
