Dr. Arthur K.M. Woo first exhibited his Zeppelins starting in 2004. This is a collecting area that is virtually limitless.

Originations, destinations, rates, frankings and cachets are just some of the challenges facing a collector of these colorful and historically fascinating flights.

Exhibiting this subject area is very difficult. The time period – 1930’s – is modern by philatelic standards. Very little contemporary information exists for the proper rates.

The exhibiting community recognizes just how the difficult it is to display this subject matter – an entirely separate category of exhibiting just for aerophilately exists.
Originations of Mail for the LZ127 and LZ129 Zeppelin Flights

The LZ127 ‘Graf Zeppelin’ was 236.6 meters in length with a width of 30.5 meters. It had a volume of 105,000 square meters and was capable of a speed of 110 km. per hour. It was powered by five Maybach 12-cylinder engines of 530 h.p. each. It was officially named “Graf Zeppelin” on 8 July 1928 on the occasion of the 90th birthday of Count Ferdinand Graf Zeppelin. It had its first test flight in September 1928 and it continued in service until the end of April 1937 when it was transferred from Friedrichshafen to Frankfurt. The airship had successfully completed 590 flights during this period. It was put on display in Frankfurt and was open to visitors until it was finally dismantled in March 1940.

The LZ129 ‘Hindenburg’ was 245 meters in length with a width of 41.2 meters. It had 16 separate buoyancy compartments and was capable of a speed of 130 km. per hour. It was powered by four Daimler Benz engines of 1050 h.p. each and could carry a payload of 60,000 kg. It had its first test flight in March 1936 and it continued in service for just over a year until it was destroyed by fire during the landing manoeuvre at Lakehurst, New Jersey on 7 May 1937.

Background

With the advent of the LZ127 “Graf Zeppelin” airship the German Zeppelin company were able to look at the commercial side of the airship business and one very immediate possible benefit was to speed up mail communications between Germany and other parts of the world, particularly the Americas, by utilizing the Zeppelin for the long haul transatlantic segments.

It must be remembered that, although the vast majority of Zeppelin mail is of a philatelic origin, one of the original ideals behind the Zeppelin flights, particularly to the Americas, was to create a viable commercial airmail service between Europe, its Colonies, and the Americas in the years prior to non-stop transatlantic airplane flights. The original attempts to set up the feeder services to Friedrichshafen from many different originating countries were legitimate ones with a sound commercial base.

The Exhibit

This 1929-1937 period was the heyday of the Zeppelin and interest in the airships was worldwide. The exhibit attempts to show the diverse range of countries and originations that exist for the various flights for the two Zeppelin airships. At the same time it attempts to cover a good range of different flights and years though, as a necessity, the emphasis tends to be on the trans-Atlantic flights.

Over 95% of the known recorded originations are represented in the collection plus, in addition, two unrecorded originations are also shown from St. Lucia and Thailand. Some of the rarely seen originations include Afghanistan, Ascension, Bahamas, Basutoland, Cameroons, Ceylon, Chad, Costa Rica, Cuba, Dahomey, Danzig (Polish), Ethiopia, Gabon, Gambia, Guinea, Haiti, Hejaz Nejd (Saudi Arabia), Honduras, India (British), India (French), Ivory Coast, Jamaica, Johore, Kuwait, Lebanon, Liberia, Madagascar, Malay, Middle Congo, Niger, Northern Rhodesia, Nyasaland, Reunion, Ruanda-Urundi, Sarawak, Senegal, Somalliland, Southern Rhodesia, Sudan, Swaziland, Syria, Tanganyika, Togo and Yemen. Originations from many other countries can be considered as scarce such as Canal Zone, Dominican Republic, Indochina, Iran, Kenya, Mauritania, Nicaragua, Panama, Surinam, etc. and then of course, there are a solid core of countries where Zeppelin acceptances are more familiar.

The exhibit is arranged alphabetically by countries using their contemporary names. Originations that were home to Foreign post offices (such as Morocco with British, French and Spanish offices) or originations that were under the auspices of more than one other country (such as Andorra with both its French and Spanish sides) are listed under the local name. For example French Andorra and Spanish Andorra are listed as ‘Andorra – French’ and ‘Andorra – Spanish’ respectively.

Colombia

1932 privately arranged acceptance from Cali for the LZ127 8th South American Flight from Rio de Janeiro to Friedrichshafen for onward delivery to Wurtemberg

There was no officially organised feeder service from Colombia for the Zeppelin flights. This cover was originally addressed to an agent in Rio de Janeiro in Brazil and was sent on the first leg of its journey from Cali by the private carrier service ‘Conducto Ribon’. The cover travelled via Barranquilla (2 October) to Rio de Janeiro (13 October) where the addressee relabelled the cover with an address in Wurtemberg and affixed Brazilian stamps (14 October) to pay the ongoing postal fees for the delivery by the Zeppelin. The cover duly arrived in Friedrichshafen on 19 October
1936 acceptance from San Jose for the return leg of the LZ129 1st North American Flight from Lakehurst, New Jersey to Frankfurt for onward delivery to Cottbus in Germany

A rare origination

The Costa Rican stamp paid the regular airmail rate to the USA and the added US stamps paid for the onward transmission to Germany by the Zeppelin service.
1932 acceptance from Habana for the LZ127 5th South American flight from Pernambuco (Recife) to Friedrichshafen for onward delivery to Hamburg

Worldwide Originations for Zeppelin Flights

Gambia

1935 acceptance from Bathurst for the return leg of LZ127 2nd Pendulum Flight from Pernambuco (Recife) to Bathurst and return

A very rare origination

Three round trip ‘pendulum’ flights were flown from Pernambuco to Bathurst and return in the late November / early December period during the course of the 16th South American Flight from Friedrichshafen. Mail was dropped by parachute and taken on board by rope at Bathurst - the Zeppelin did not land in Gambia. Virtually all the mail picked up originated from Europe and was flown to Bathurst on a Lufthansa feeder flight from Stuttgart.

During the course of this 2nd Pendulum Flight, a revolt broke out in Pernambuco and the Zeppelin was unable to land immediately upon its return to Brazil. The mails from Europe were dropped over the Air France landing site at Maceio (a little over 200 km. south of Pernambuco) on 25 November.

The Zeppelin had originally left Pernambuco at 10.30 p.m. on 22 November and did not land again in Pernambuco until 8.40 p.m. on the 27 November. This had actually been the 500th flight of the Zeppelin airship and inadvertently it became a record flight with just over 118 hours in the air!
Acceptances from Germany for the March 1929 LZ127 Orient Flight round trip from Friedrichshafen and for the July 1931 Polar Flight leg from Friedrichshafen to Leningrad with the latter item being mailed on board. The stamp on this latter cover shows the 'missing hyphen' error after POLAR.

For the former flight the mail was dropped at Ramle (now in Israel) for ongoing delivery to Jerusalem.
